CONTENTS

	Page
List of abbreviations	
Chapter 1 General introduction	1
Chapter 2 Analytical methods	21
Chapter 3 Natural folate form for prevention of neural tube defects: Effect of supplementation with (6S)-5-methyltetrahydrofolate versus folic acid on red cell folate concentration	43
Chapter 4 Change in distribution of folate derivatives in red cells and plasma after supplementation with (6S)-5-methyltetrahydrofolate and folic acid in young women	61
Chapter 5 Supplementation with (6S)-5-methyltetrahydrofolate or folic acid equally reduces plasma total homocysteine concentrations in healthy women	75
Chapter 6 Impact of the 1298A>C and 677C>T methylenetetrahydrofolate reductase polymorphisms on the treatment effect of different folate administrations in young women	89
Chapter 7 Effect of long-term supplementation with (6S)-5-methyltetra- hydrofolate and folic acid on plasma vitamin B ₁₂ concentrations in young, non-pregnant women	105
Chapter 8 Pooled analysis of intervention studies investigating single and combined B-vitamin supplementation strategies on homocysteine lowering in pregnancy-aged women	121
Chapter 9 General discussion	139
Summary	153
Zusammenfassung	155
