Abstract xi

1. Introduction 1

2. Objectives 3

3. Materials and methods 4

3.1 Khao Ang Runai Wildlife Sanctuary 4
3.1.1 General information 4
3.1.2 Climate 6
3.1.3 Forest types 6
3.1.4 Wildlife 8
3.2 Forest inventory and sampling designs used in Thailand 8
3.2.1 Line plot system 9
3.2.2 Camp-unit system 10
3.2.3 Modified camp-unit system 10
3.2.4 Point sampling 12
3.2.5 Unit system 12
3.2.6 National forest inventory 12
3.2.7 FAO Project TCP/THA/8853(A) 14
3.2.8 Continuous monitoring system for the sustainable management of Thailand's forest resources 14
3.3 Cluster sampling 16
3.3.1 Definition 16
3.3.2 Intracluster correlation coefficient 17
3.3.3 Cost function 20
3.3.4 Optimum number of elements in a cluster unit 20
3.3.5 Plot shape and size 22
3.4 Remote sensing 25
3.4.1 Overview of Landsat-5 25
3.4.2 Spectral reflectance of vegetation 28
3.4.3 Application of remote sensing in forest inventory and forest resource assessment 30
3.4.4 Vegetation indices 33
3.5 Forest inventory model 36
3.5.1 Pilot project 36

3.5.1.1 Line plot system 36
3.5.1.2 A 100 x 100 m plot 38
3.5.1.3 Position analysis 38
3.5.1.4 Preliminary analysis of the normalized difference vegetation index 39
3.5.2 Forest inventory design 40
3.5.2.1 Sample size 40
3.5.2.2 Sampling designs 40
3.5.2.3 Variables 42
3.5.2.4 Data collection 43
3.5.3 Remote sensing 44
3.5.3.1 Geometric correction 46
3.5.3.2 Vegetation indices 46
3.5.4 Analysis of inventory techniques and the link to remote sensing 48

4. Results 50

4.1 Pilot project 50
4.1.1 Forest characteristics of the study area 50
4.1.2 Plot size efficiency 54
4.1.3 Correlation of forest parameters and normalized difference vegetation index 57
4.2 Forest inventory design 59
4.2.1 General information 59
4.2.2 Species composition 60
4.2.3 Intracluster correlation coefficient 69
4.2.4 Cost efficiency 71
4.2.5 Optimum number of sample plots in a cluster 74
4.3 Remote sensing 75
4.3.1 Image processing 75
4.3.2 Relationship between forest inventory and remote sensing . 76

5. Discussion 88

5.1 Optimum sample plot size 88
5.2 Cluster sampling analysis 89
5.3 Relationship between forest parameters and radiation values of Landsat-5 TM 91
5.4 Recommendations for the inventory design 93

6. Summary 97

7. Zusammenfassung 100

8. References 103

9. Appendices 110
