List of Symbols and Acronyms	viii
Summary	x
1 Introduction	1
2 Representation of Polarized Optical Signals	4
2.1 Jones Representation	4
2.1.1 Optical Signals in Jones Space	4
2.1.2 Optical Systems in Jones Space	7
2.2 Stokes Representation	8
2.2.1 Monochromatic Optical Signals in Stokes Space	8
2.2.2 State of Polarization	9
2.2.3 Broadband Optical Signals in Stokes Space	10
2.2.4 Partially Polarized Signals and Degree of Polarization	11
2.2.5 Optical Systems in Stokes Space	12
2.2.6 Differences Between Jones and Stokes Calculus, System Theoretical Aspects	13
3 PMD in Optical Communication Systems	15
3.1 Polarization in Optical Single-Mode Fibers	16
3.1.1 First- and Second-Order PMD	16
3.1.2 Modeling Real Fibers - The Waveplate Model	18
3.2 PMD Tolerance of Optical Communication Systems	20

3.2.1	Eye-Opening Penalty for First-Order PMD	21
3.2.2	Estimating the Maximum Tolerable Fiber PMD	26
3.2.3	Monte-Carlo Simulations	26
3.2.4	Analytical Treatment of System Outages	28
3.3	Experimental Results	31
3.3.1	PMD Tolerance of a 40 Gbit/s NRZ System	31
3.3.2	PMD Tolerance of a 10 Gbit/s NRZ System	33
3.3.3	PMD Tolerance of an 80 Gbit/s RZ OTDM System	34
3.3.4	Summary	35
4	SOP Measurement Techniques	37
4.1	Direct Implementation of a Stokes Polarimeter	37
4.2	Generalized Stokes Polarimeter	39
4.3	Calibration With Known SOPs	42
4.4	Calibration With Unknown SOPs	44
4.5	Miniaturized Implementation of a Stokes Polarimeter	46
5	PMD Measurement Techniques	50
5.1	PMD Measurement Using Known Input SOPs	51
5.1.1	Jones Matrix Eigenanalysis (JME)	51
5.1.2	Müller Matrix Method	52
5.2	PMD Measurement Using Unknown Input SOPs	54
5.3	PMD Measurement in Systems Having PDL or PDG	55
5.3.1	Müller Matrix Eigenanalysis	57
5.4	Coherent Interferometric PMD Measurement	61
5.4.1	Frequency Domain Group Delay Measurement	61
5.4.2	Frequency Domain PMD Measurement	67
6	PMD Compensation Techniques	74
6.1	Concepts of PMD Compensation	74
6.1.1	Feed-Back and Feed-Forward Structures	74

6.1.2	PMD Equalizers	75
6.1.3	PMD Detection / Error Signals	76
6.2	Error Signals for PMD Compensation	76
6.2.1	Spectrally Resolved SOP Measurement	77
6.2.2	DOP as Distortion Monitor	82
6.2.3	DOP Measurement with Input Polarization Scrambling	85
6.3	Tunable PMD Equalizers	87
6.3.1	Motor-Driven Tunable DGD Element	87
6.3.2	Grating-Based Tunable DGD Element	89
6.3.3	Magneto-Optically Controlled DGD Element	91
6.4	Compensation Experiments	95
6.4.1	PMDC with Spectrally Resolved Error Signal	95
6.4.2	PMDC with Input Polarization Scrambling	96
6.4.3	PMDC with Magneto-Optically Tuned DGD Element	98
7	Conclusions	102
