

TABLE OF CONTENTS

1	INTRODUCTION	1
1.1	Background	1
1.2	Motivation	2
1.3	Objectives.....	5
1.4	Organization of thesis	5
2	LITERATURE REVIEW	7
2.1	Scale and scaling effects	7
2.1.1	The meaning of scale.....	7
2.1.2	Scaling issues.....	8
2.1.3	Methods of scaling	11
2.2	The theory of wavelets	19
2.2.1	What are wavelets?.....	20
2.2.2	A brief history of wavelets	20
2.2.3	Why do we employ wavelet methods?.....	22
2.2.4	Wavelets and multiresolution analysis	23
2.2.5	The Wavelet transform	25
2.2.6	Summary of properties of wavelet families.....	37
2.3	Description of landscape metrics	39
2.3.1	Total area	39
2.3.2	Largest patch index.....	40
2.3.3	Number of patches.....	40
2.3.4	Patch density.....	40
2.3.5	Mean patch area.....	41
2.3.6	Patch area standard deviation	41
2.3.7	Patch area coefficient of variation.....	41
2.3.8	Total edge	42
2.3.9	Edge density	42
2.3.10	Landscape shape index	43
2.3.11	Mean shape index	43
2.3.12	Area-weighted mean shape index.....	43
2.3.13	Mean fractal dimension index	44
2.3.14	Area-weighted mean fractal dimension index.....	44
2.3.15	Shannon's diversity index	45
2.3.16	Patch richness	45
2.3.17	Patch richness density.....	45
2.3.18	Contagion	46
3	DATA SETS AND METHODS	47
3.1	Description of data sets	47
3.1.1	The study area.....	47
3.1.2	The data sets	48
3.1.3	Data summaries	52
3.1.4	Problems with the data sets	55
3.2	Analysis of moving window statistics of NDVI and DEM data sets.....	55

3.2.1	Size of the moving window	56
3.2.2	Proportional effect	57
3.3	Analysis of wavelet variance	57
3.3.1	Definition of wavelet variance	59
3.3.2	Estimation of wavelet variance	59
3.3.3	Distribution of the wavelet variance estimator.....	60
3.3.4	The choice of suitable wavelet filter	62
3.4	Determination of scaling behavior of data sets with wavelets.....	64
3.4.1	Definition of statistical self-similarity.....	64
3.4.2	Determination of statistical self-similarity of wavelet coefficients.....	66
3.5	Indirect multiscale analysis of pattern metrics.....	66
3.5.1	Description of aggregation procedure	67
3.5.2	Estimation of landscape metrics from maps with changing grain size 68	
3.5.3	Estimation of landscape metrics from maps with changing extent	69
4	RESULTS AND DISCUSSION.....	72
4.1	Heteroscedasticity and proportional effect in NDVI and DEM data sets.....	72
4.2	Results of wavelet variance analysis of NDVI and DEM data sets	78
4.3	Scaling characteristics of NDVI and DEM data sets	83
4.4	Effects of changing grain size on landscape pattern metrics	87
4.5	Effects of changing the method of aggregation on pattern analysis	94
4.6	Effects of changing the extent on landscape pattern metrics	98
4.7	Effects of changing the direction on pattern analysis	104
4.8	Comparing the effects of changing grain size and extent on landscape pattern metrics	108
5	SUMMARY AND CONCLUSION	115
5.1	Summary	115
5.2	Conclusion.....	118
5.3	Suggestions for further research.....	119
6	REFERENCES	121
7	APPENDICES	128
