

TABLE OF CONTENTS

1	INTRODUCTION	1
2	TROPICAL RAIN FOREST AND GLOBAL CLIMATE CHANGE.....	2
2.1	Global climate change	2
2.1.1	The role of forest in the global climate change.....	4
2.2	Tropical rain forest	6
2.3	Secondary forest	7
2.4	Bragantina region	8
3	STRUCTURE AND FLORISTIC COMPOSITION OF SECONDARY FOREST	10
3.1	Introduction	10
3.1.1	Regeneration process in fallow vegetation	11
3.1.2	Development stages in secondary succession.....	12
3.1.3	Diversity of secondary forest	13
3.1.4	Structural characteristics of secondary forest	14
3.1.5	Age estimation	15
3.2	Objectives	16
3.3	Methodology.....	16
3.3.1	Study site.....	16
3.3.2	Fieldwork activities.....	17
3.3.3	Analysis process.....	22
3.4	Results	23
3.4.1	Canopy strata	23
3.4.2	Age estimation	24
3.4.3	Stem density	29
3.4.4	Floristic composition	32
3.4.5	Stand structure characteristics.....	44
3.4.6	Crown position and shape.....	51
3.4.7	Uncontrolled fire.....	52
3.5	Conclusions	53
4	SECONDARY FOREST BIOMASS	55
4.1	Introduction	55
4.2	Forest biomass	56
4.2.1	Methods for predicting forest biomass	56
4.2.2	Forest biomass prediction	59
4.2.3	Biomass prediction by remote sensing	60
4.2.4	Biomass of secondary forest	61
4.2.5	Litter biomass.....	64
4.2.6	Wood density	65
4.3	Objectives	66
4.4	Methodology.....	67
4.4.1	Study site.....	67
4.4.2	Fieldwork activities.....	68

4.4.3	Tree aboveground biomass	74
4.4.4	Total live tree aboveground biomass	79
4.4.5	Biomass of standing dead trees.....	79
4.4.6	Litter biomass.....	80
4.4.7	Total stand aboveground biomass.....	80
4.4.8	Forest growth models.....	81
4.5	Results	81
4.5.1	Average wood density.....	81
4.5.2	Litter biomass.....	84
4.5.3	Total standing dead tree biomass.....	86
4.5.4	Stand biomass	88
4.5.5	Tree height	101
4.5.6	Tree aboveground biomass	101
4.6	Conclusions	102
5	CARBON STOCK IN DIFFERENT LAND COVERS IN THE AGRICULTURAL LANDSCAPE OF EASTERN AMAZONIA.....	104
5.1	Introduction	104
5.1.1	Carbon stock in different land covers	105
5.1.2	Municipality of Igarapé Açu.....	107
5.2	Objectives	112
5.3	Methodology.....	112
5.3.1	Study sites	112
5.3.2	Remote sensing	114
5.3.3	Biomass and carbon stock in land covers	117
5.3.4	Biomass and carbon stock in farms	119
5.3.5	Carbon sequestration project.....	120
5.4	Results	121
5.4.1	Land-cover classification.....	121
5.4.2	Land covers on farms.....	124
5.4.3	Carbon sequestration potential.....	127
5.4.4	Economic benefits from the sequestration of carbon.....	132
5.5	Conclusions	133
6	FINAL CONCLUSIONS	135
7	REFERENCES	137
8	GLOSSARY	150
9	APPENDICES	152

ACKNOWLEDGEMENTS
