Abstract	I
List of abbreviations	VII
List of tables	XI
List of figures	XII
1 Introduction	1
2 Literature review	3
2.1 Cattle embryo production	3
2.1.1 Developmental competence	3
2.1.2 Oocyte maturation	4
2.1.3 Nitric oxide in embryo growth and development	5
2.1.4 Genetic control of early embryonic development	6
2.2 Nitric oxide synthase genes	7
2.2.1 Nitric oxide synthase structure	8
2.2.2 Other NOS: mitochondrial NOS	9
2.2.3 Regulation of NOS	9
2.2.3.1 Regulation of NOS activity	9
2.2.3.2 Regulation of NOS localization	13
2.2.3.2 Nitric oxide synthase inhibition	15
2.3 NOS expression in female reproductive tract and gonad tissue	19
2.3.1 Uterus and vagina	19
2.3.2 Ovary	19
2.4 NO/NOS expression in embryo	21
2.5 The role of nitric oxide	24
2.5.1 Nitric oxide and infertility	26
2.5.2 Nitric oxide and hypothalamic- pituitary- gonadal axis	26
2.5.3 Nitric oxide in oocyte maturation, fertilization and embryo development	26

2.5.4	Nitric oxide and apoptosis in embryos	28
3	Materials and methods	30
3.1	Materials	30
3.1.1	Media used for IVP	30
3.1.2	Reagents and other media	32
3.1.3	Buffers and solutions	34
3.1.4	Equipments	38
3.1.5	Software programmes	38
3.1.6	Biological material	39
3.2	Methods	39
3.2.1	Biotechnology methods	40
3.2.1.1	Oocyte collection and maturation	40
3.2.1.2	<i>In vitro</i> fertilization	40
3.2.1.3	<i>In vitro</i> culture	41
3.2.1.4	Nitric oxide inhibition and embryo development study	41
3.2.1.5	Statistical analysis	42
3.2.2	Molecular genetics methods	42
3.2.2.1	RNA isolation	43
3.2.2.2	cDNA synthesis	44
3.2.2.3	Nitric oxide synthase genes primer design	44
3.2.2.4	Polymerase chain reaction (PCR)	45
3.2.2.5	DNA extraction from agarose gel	46
3.2.2.6	Cloning and sequencing of PCR fragments	46
3.2.2.7	Plasmid isolation	48
3.2.2.8	Plasmid serial dilutions	49
3.2.3	Real-time quantitative PCR	49
3.2.3.1	Optimization of the PCR conditions	49
3.2.3.2	Quantification: precision/reproductibility of the replicates	50
3.2.3.3	Statistical analysis	51

3.3	NOS proteins detection and localization in bovine oocytes and embryos	31
3.3.1	Immunohistochemistry	51
3.3.2	Immunofluorescence	52
3.3.2.1	Pre-treatment of samples	52
3.3.2.2	Incubation with specific NOS antibodies	53
3.3.2.3	Identification of antigen-antibody complex by FITC secondary antibody	53
3.3.2.4	Propidium iodide staining	54
3.3.2.5	Image capture and analysis	54
3.4	Nitric oxide synthase proteins immunoblotting	54
3.4.1	Protein isolation	55
3.4.2	Sodium dodecyl sulphate-polyacrylamide gel electrophoresis (SDS-PAGE)	55
3.4.3	Semi dry blotting and blocking	56
3.4.4	Immunodetection (antibody affinity)	56
3.4.5	Bands identification	57
4	Results	58
4.1	Nitric oxide and bovine embryo development <i>in vitro</i>	58
4.2	Qualitative identification of endothelial and inducible NOS genes	61
4.3	Quantitative expression profile of NOS in oocytes and embryos	62
4.4	Expression and localization of NOS during preimplantation development	65
4.5	Western blot analysis for endothelial NOS	67
5	Discussion	68
5.1	Inhibitory effects of L-NAME on development of embryos <i>in vitro</i>	68
5.2	Expression profile of NOS genes	70

5.3	Expression and localization of eNOS and iNOS during preimplantation development	72
5.4	Nitric oxide role	74
5.5	Future prospects	77
6	Summary	79
7	References	83
