Contents

1 Introduction **1**

2 Foundations of Density Functional Theory **3**

2.1 The electronic problem 3

2.2 Density Functional Theory 5

2.2.1 The Hohenberg-Kohn theorems 5

2.2.2 The Kohn-Sham approach 6

2.2.3 Approximate Exchange-Correlation Functionals 6

2.3 Approximation of the Coulomb term 7

2.3.1 The RI-J approximation 8

2.3.2 The MARI-J approximation 9

3 Calculations on Metal Clusters **13**

3.1 Introduction 13

3.2 Choice of the exchange-correlation functional 13

3.3 Choice of basis sets 14

3.4 Fractional occupation numbers 16

3.5 Characterizing cluster energetics 17

3.6 Case studies 18

3.6.1 Pd_2 18

3.6.2 PdCO 18

3.6.3 Pd_2CO 20

3.7 Discussion 21

4 Ligand-Free Clusters of Palladium **23**

4.1 Between clusters and bulk phase 23

4.1.1 Geometrically closed structures 23

4.1.2 Structures of known clusters 26
4.1.3 Proposed pathways for the growth of Pd clusters 29
4.1.4 The problems 30
4.2 Computational details 31
4.3 Small palladium clusters 33
4.3.1 Cluster description 35
4.3.2 Summary 38
4.4 Icosahedral cores of palladium 39
4.4.1 Structure 39
4.4.2 Energetics 42
4.5 Towards the bulk 43
4.5.1 Structure 43
4.5.2 Energetics 46
4.6 Conclusions 48

5 Ligand-Stabilized Clusters of Palladium 49
5.1 Introduction 49
5.1.1 Computational details for ligand-stabilized clusters 50
5.2 Ligand effects on known clusters 52
5.2.1 $Pd_{16}(CO)_{13}L_9$ (**1**) 53
5.2.2 $Pd_{35}(CO)_{23}L_{15}$ (**2**) and $Pd_{39}(CO)_{23}L_{16}$ (**3**) 55
5.2.3 Summary 57
5.3 Small complexes 57
5.4 Ligand-stabilized Pd_{13} 61
5.4.1 Interaction with carbonyls and phosphines 67
5.5 Ligand-stabilized Pd_{19} 69
5.5.1 Octahedral metallic core 71
5.5.2 Bi-icosahedral metallic core 76
5.5.3 Comparison 78
5.6 Ligand-stabilized Pd_{23} 79
5.7 Conclusions 80

6 Characterization of a Silver-Indium Compound 83
6.1 The problem 83
6.2 Computational details 84

6.3 Preliminary considerations 84
6.4 Results and discussion 86
6.4.1 Assignment of atom positions 86
6.4.2 Effect of basis sets 90
6.4.3 Effects of phosphine ligands on the model system 90
6.5 Conclusions 93

7 Conclusions - Zusammenfassung 95
