TABLE OF CONTENTS

1	GENERAL INTRODUCTION	1
1.1	Background and problem statement	1
1.2	Objectives, hypotheses and significance of the study	6
1.3	Structure of the thesis	7
2	LITERATURE REVIEW	8
2.1	Some theoretical perspectives	8
2.1.1	Agricultural change and land degradation	8
2.1.2	Current perspectives on population-environment connection	10
2.2	Land degradation: Concepts and definitions	11
2.2.1	Processes and causes of land degradation.....	13
2.2.2	Measuring soil erosion: state-of-the-art	14
2.2.3	Severity and resilience of land degradation	15
2.3	The state of land degradation in Ethiopia.....	16
2.3.1	Socioeconomic conditions and the physiographical settings.....	16
2.3.2	Forest conversion and soil degradation in the central and northern highlands	20
2.3.3	Forest conversion and soil degradation in the southwestern highlands	22
2.3.4	Land rehabilitation efforts and soil and water conservation activities	24
2.3.5	Resettlement: a solution or a threat to land degradation?	24
2.4	Summary.....	27
3	DESCRIPTION OF THE STUDY AREA AND GENERAL METHODOLOGY	29
3.1	The study area: Kefa Zone.....	29
3.1.1	Location and description.....	29
3.1.2	Physical characteristics	30
3.1.3	Forest vegetation.....	33
3.1.4	Population and resettlements	36
3.1.5	Land use and farming systems.....	37
3.2	General methodology	42
3.2.1	Analysis of forest conversion and the associated land use/land cover change and dynamics	43
3.2.2	Estimation of rate of soil erosion using the ¹³⁷ Cs method and the Universal Soil Loss Equation.....	44
3.2.3	Soil fertility decline: physicochemical property analysis	47
3.2.4	Farmers' perception: logistic regression analysis of determinants	47
4	FOREST CONVERSION AND LAND USE / LAND COVER DYNAMICS IN THE CBF AND PBF SYSTEMS.....	50
4.1	Introduction	50
4.2	Methods	51

4.2.1	Representative sub-catchments.....	51
4.2.2	Pre-processing analysis and identification of the LULC types.....	52
4.2.3	Classification and analysis of LULC dynamics.....	54
4.3	Results	55
4.3.1	Land use/land cover change.....	55
4.3.2	Land use/land cover dynamics.....	62
4.3.3	Trend of forest conversion	65
4.4	Discussion.....	66
4.4.1	LULC change and dynamics.....	66
4.4.2	Trend of forest conversion and its implication	70
4.5	Conclusion.....	71
5	IMPACT OF FOREST CONVERSION ON SOIL EROSION IN THE CBF AND PBF SYSTEMS	73
5.1	Introduction	73
5.2	Materials and methods.....	74
5.2.1	Sample fields, reference sites and soil sampling	75
5.2.2	Analyses of ¹³⁷ Cs activity	77
5.2.3	Determination of ¹³⁷ Cs inventory and estimation of rates of soil erosion	77
5.2.4	Data analyses	77
5.3	Results	78
5.3.1	Reference ¹³⁷ Cs inventory and the depth distribution pattern.....	78
5.3.2	Distribution of ¹³⁷ Cs inventories in the cultivated fields	79
5.3.3	Estimated rates of soil erosion	82
5.4	Discussion.....	86
5.5	Conclusion.....	88
6	IMPACT OF FOREST CONVERSION ON SOIL FERTILITY DECLINE IN THE CBF AND PBF SYSTEMS	89
6.1	Introduction	89
6.2	Materials and methods.....	90
6.2.1	Sample fields, soil sampling and soil property analyses.....	90
6.2.2	Data analyses	91
6.3	Results	92
6.3.1	Impact of forest conversion on soil properties in the CBF system.....	92
6.3.2	Comparison of the impact of forest conversion on soil properties in the CBF and the PBF systems.....	98
6.4	Discussion.....	99
6.5	Conclusion.....	100
7	FARMERS' PERCEPTION OF SOIL EROSION AND SOIL FERTILITY PROBLEMS	102
7.1	Introduction	102
7.2	Methods	103
7.2.1	Sampling and data collection.....	103
7.2.2	Data analyses	106

7.3	Results and discussion	107
7.3.1	Socioeconomic characteristics of households.....	107
7.3.2	Socioeconomic and biophysical determinants of farmers’ perception of soil erosion.....	112
7.3.3	Perceived causes and indicators of soil erosion.....	117
7.3.4	Farmers’ response to soil erosion and their coping mechanisms.....	118
7.3.5	Socioeconomic and biophysical determinants of farmers’ perception of soil fertility problems.....	121
7.3.6	Farmers’ response to soil fertility problems and coping mechanisms.....	125
7.4	Conclusion.....	128
8	DISCUSSION AND SUMMARIZING SYNTHESIS.....	129
8.1	Introduction	129
8.2	Synthesis of the major findings: forest conversion-soil degradation- farmers’ perception nexus	129
8.3	Implications for sustainable land use.....	133
9	CONCLUSIONS AND RECOMMENDATIONS.....	135
10	REFERENCES	138
