## Contents

|   |     |
|---|-----|
| Abstract.....   | v   |
| Advance publications relevant for the work discussed in this thesis ..... | vii |
| Journal: .....  | vii |
| Conference:.....  | vii |
| 1 Introduction .....  | 1   |
| 2 Theory of single-color all-optically induced photocurrents .....        | 5   |
| 2.1 Single-color difference-frequency mixing .....                        | 5   |
| 2.2 Shift current .....   | 8   |
| 2.2.1 Generation of shift currents in non-centrosymmetric crystals .....  | 8   |
| 2.2.2 Shift current: The microscopic model .....                          | 10  |
| 2.3 Injection current.....  | 12  |
| 2.3.1 Non-degeneracy of spin subbands .....                               | 13  |
| 2.3.2 Injection current: The microscopic model.....                       | 15  |
| 3 Sample properties and experimental setup .....                          | 19  |
| 3.1 Sample properties .....   | 19  |
| 3.2 Experimental setup .....  | 20  |
| 3.2.1 Description of the experimental setup.....                          | 21  |
| 3.2.2 Specific feature for shift current experiments .....                | 22  |
| 3.2.3 Specific feature for injection current experiments .....            | 23  |
| 3.3 Electro-optic detection of THz radiation .....                        | 24  |
| 3.4 Data analysis.....  | 26  |
| 4 Spectral dependence of shift and injection currents .....               | 31  |
| 4.1 Shift current .....   | 31  |
| 4.1.1 Shift current enhancement at lhX energy .....                       | 32  |

|  |    |
|--|----|
| 4.1.2 Shift current dynamics.....                                  | 36 |
| 4.2 Injection current.....   | 43 |
| 4.2.1 Oscillatory spectral dependence of injection current .....   | 43 |
| 4.2.2 Microscopic analysis of single color injection current.....  | 45 |
| 4.2.3 Reason for the bandmixing-induced current reversal.....      | 48 |
| 4.2.4 Influence of asymmetry of QWs on injection current .....     | 50 |
| 5 Using photocurrents for symmetry investigation .....             | 55 |
| 5.1 Symmetry investigation by employing shift current .....        | 55 |
| 5.1.1 Coherent control scheme for symmetry investigation.....      | 56 |
| 5.1.2 Results and discussions .....                                | 58 |
| 5.2 Injection currents in asymmetric QWs .....                     | 63 |
| 6 Generation of alternating photocurrents .....                    | 69 |
| 6.1 Connection between quantum beats and charge oscillations ..... | 69 |
| 6.2 Observation of in-plane alternating photocurrents .....        | 71 |
| 7 Outlook.....   | 79 |
| References .....   | 85 |
| Acknowledgement.....   | 97 |
