

## TABLE OF CONTENTS

1	INTRODUCTION .....	1
1.1	Background.....	1
1.2	Research objectives .....	2
2	STATE OF KNOWLEDGE .....	3
2.1	Savanna fires and emissions .....	3
2.2	Fuel load and nutrient losses .....	4
2.3	Effect of fire on soil.....	5
2.4	Fire effect on albedo and surface energy fluxes .....	7
2.5	Satellite remote sensing and estimation of burnt areas.....	8
3	GENERAL DESCRIPTION OF THE STUDY AREA .....	11
3.1	Location.....	11
3.2	Climate.....	13
3.3	Soil.....	14
3.4	Vegetation.....	14
3.5	Land use.....	16
4	MATERIAL AND METHODS.....	17
4.1	Characterization of vegetation in the study area .....	17
4.1.1	Site selection and description .....	17
4.1.2	Vegetation description system based on Dansereau's diagrams .....	27
4.1.3	Scale requirements.....	28
4.1.4	Field activity and data collection.....	29
4.1.5	Description of land use and land cover based on satellite imagery .....	29
4.2	Fuel load estimation and bushfire experiment.....	32
4.2.1	Site selection and description .....	32
4.2.2	Layout of field experiments.....	34
4.3	Fuel load sampling.....	35
4.4	Bushfire experiment .....	36
4.5	Albedo measurement .....	37
4.6	Modeling surface energy budget and moisture indicators with BATS .....	38
4.7	Remote sensing of burnt areas.....	41
4.7.1	Brief characteristics of Landsat 7 ETM+ system .....	41
4.7.2	Image selection and analysis .....	42
4.8	Chemical analyses .....	46
4.8.1	Plant sample analyses .....	46
4.8.2	Soil sample analyses.....	46
4.9	Statistical analyses and software applied.....	46

5	RESULTS AND DISCUSSION.....	48
5.1	Soil characteristics of study area .....	48
5.2	Vegetation of study area .....	49
5.2.1	Vegetation cover at landscape level .....	50
5.2.2	Structural analysis.....	52
5.2.3	Vegetation cover at site level.....	52
5.3	Bushfire experimental sites .....	62
5.3.1	Site characteristics .....	62
5.3.2	Weather conditions and fire behavior.....	65
5.4	Fuel load assessment .....	67
5.4.1	Fuel load and ash .....	67
5.4.2	Carbon pool .....	70
5.4.3	Seasonal patterns of fuel load fluxes .....	72
5.5	Nutrient fluxes .....	73
5.5.1	Nutrient concentrations of fuel load and ash.....	73
5.5.2	Nutrient stocks prior to bushfire.....	77
5.5.3	Nutrient stocks in ash .....	78
5.5.4	Nutrient losses through volatilization and ash transport .....	82
5.5.5	Seasonal patterns in nutrient fluxes .....	87
5.5.6	Nutrient losses and balances.....	88
5.6	Effect of fire on soil properties.....	92
5.7	Post-fire surface albedo and surface temperature.....	96
5.7.1	Bushfire impact on surface albedo .....	97
5.7.2	Bushfire effect on soil surface temperature.....	98
5.8	Impact of bushfire on surface energy fluxes and moisture indicators.....	99
5.8.1	Diurnal simulations of energy fluxes of burnt and unburnt plots.....	100
5.8.2	Diurnal simulations of moisture indicators of burnt and unburnt plots	108
5.9	Emissions from bushfire.....	115
5.9.1	Estimate of greenhouse gas emissions from bushfires .....	116
5.9.2	Emissions at landscape level .....	117
5.9.3	Implications of the emissions .....	120
6	SUMMARY AND CONCLUSIONS.....	122
6.1	Summary.....	122
6.1.1	Vegetation heterogeneity .....	122
6.1.2	Fuel load and nutrient losses .....	123
6.1.3	Bushfire impact on soil properties, albedo and soil temperature .....	123
6.1.4	Carbon and nitrogen emissions.....	124
6.2	Conclusions .....	124
6.3	Outlook .....	126
7	REFERENCES .....	127
8	APPENDIX .....	141

## ACKNOWLEDGEMENTS
