Table of contents

Table of contents	I
List of abbreviations	IV
List of companies	VI
1. Introduction	1
1.1 Saline environments	1
1.2 Salt resistance: a widespread property in Nature?.....	2
1.3 The impact of salt stress on plant performance	2
1.4. Strategies to survive high salinity.....	3
1.4.1 Adaptations on the whole-plant level.....	4
1.4.2 Adaptations on the cellular level	6
1.5. <i>P. euphratica</i> : a highly salt resistant tree	10
1.6 Objectives	12
2. Materials and Methods	13
2.1 Plant material.....	13
2.2 Chemicals, enzymes and reagents	14
2.3 Molecular biology	14
2.3.1 RNA and DNA preparation.....	14
2.3.1.1 Isolation of RNA	15
2.3.1.2 Preparation of plasmid DNA (pDNA)	17
2.3.1.3 Isolation of genomic DNA (gDNA).....	18
2.3.2 Gel electrophoresis	18
2.3.3 cDNA synthesis.....	21
2.3.4 Radioactive labeling of DNA size markers.....	21
2.3.5 Cloning DNA fragments	22
2.3.6 Plasmids	24
2.3.7 Polymerase Chain Reaction (PCR)	24
2.3.7.1 Primer and primer design	24
2.3.7.2 DNA polymerases	25
2.3.7.3 PCR standard protocol	25
2.3.7.4 Reverse Transcription PCR (RT-PCR)	26
2.3.7.5 Rapid Amplification of cDNA Ends (RACE).....	30

2.3.8 Sequencing	31
2.4 Characterization of putative Na ⁺ /H ⁺ antiporters.....	31
2.4.1 Isolation of <i>PeNhaD1</i>	31
2.4.2 <i>In-silico</i> analyses of <i>PeNhaD1</i>	32
2.4.3 Isolation of <i>PcNhaD1</i>	32
2.4.4 Isolation of <i>PeNhxI</i>	33
2.5 Ecophysiological measurements	33
2.5.1 Chlorophyll fluorescence	33
2.5.2 Water potential	34
2.5.3 Electrolyte leakage test.....	34
2.5.4 Soluble protein level.....	35
2.5.5 Chlorophyll content.....	35
2.5.6 Biometric measurements	35
2.6 Experimental treatments.....	36
2.6.1 <i>P. euphratica</i> and <i>P. x canescens</i>	36
2.6.1.1 Experiments on soil.....	36
2.6.1.2 Experiments in hydroponics.....	36
2.6.1.3 Feeding experiments	36
2.6.2 Characterization of <i>A. thaliana</i> knock-out mutants	37
2.6.2.1 Selection of <i>A. thaliana</i> plants carrying T-DNA.....	37
2.6.2.2 PCR based isolation of homozygous knock-out mutant lines.....	38
2.6.2.3 Screening putative knock-out lines for gene expression by RT-PCR.	39
2.6.2.4 Gaining seeds from homozygous knock-out lines	39
2.6.2.5 Salt-tolerance assays	40
2.6.2.6 Bolting assays.....	41
2.6.3 Complementation studies on <i>E. coli</i> EP432 knock-out mutants	41
2.7 Leaf anatomy and morphometry	42
2.8 Element quantification	43
2.8.1 Inductively coupled plasma-optical emission spectrometry (ICP-OES).....	43
2.8.2 Chloride quantification.....	43
2.8.3 Energy dispersive X-ray microanalysis (EDAX).....	43
2.9 Statistical analyses.....	44

3. Results	45
3.1 Differences in plant performance between salt-resistant <i>P. euphratica</i> and salt-sensitive <i>P. x canescens</i>	45
3.1.1 Effects of salt stress on shoot tip water potential	45
3.1.2 Effects of salt stress on chlorophyll content.....	46
3.1.3 Effects of salt stress on membrane integrity	47
3.1.4 Effects of short term salt stress on quantum yield of PSII (ϕ) and element distribution in leaves	49
3.1.5 Effects of salt stress on growth	50
3.2 Changes in leaf morphology of <i>P. euphratica</i> under salt stress.....	52
3.3 Effects of salt stress on the ion distribution in <i>P. euphratica</i>	54
3.3.1 Ion distribution on the whole-plant level	54
3.3.2 Ion distribution on the subcellular level.....	55
3.4 Putative involvement of plasma membrane ATPases in salt exclusion	59
3.5 Characterization of the putative Na^+/H^+ antiporter <i>PeNhaD1</i> and <i>PeNhx1</i>	63
3.5.1 Isolation and sequencing of <i>PeNhx1</i>	63
3.5.2 Molecular characterization of <i>PeNhaD1</i>	64
3.5.3 Expression analyses in <i>P. euphratica</i> and <i>P. x canescens</i>	68
3.6 Functional analyses using “Reverse Genetics”	71
3.6.1 Functional analysis of <i>AtNhaD1</i> using <i>A. thaliana</i> knock-out mutants	71
3.6.2 Functional analysis of <i>PeNhaD1</i> using <i>E. coli</i> mutant complementation....	85
4. Discussion.....	91
4.1 Ecophysiological responses to salt stress of <i>P. euphratica</i> and <i>P. x canescens</i>	91
4.1.1 Effects of salt stress on water potential, membrane integrity and chlorophyll fluorescence	91
4.1.2 Differential ion accumulation on the whole-plant level upon salt stress	92
4.1.3 Effects of salt stress on ion compartmentation within leaves of <i>P. euphratica</i>	95
4.1.4 Leaf succulence as a strategy to counteract salt stress	97
4.2 Linking genotype and phenotype	98
4.2.1 Molecular characterization of <i>PeNhaD1</i>	98
4.2.2 NhaD1 expression patterns in <i>P. euphratica</i> and <i>P. x canescens</i>	99
4.2.3 Conclusions from the “ <i>loss of function</i> ” approach.....	100

4.2.4	Conclusions from the “ <i>gain of function</i> ” approach	102
4.3	Outlook	103
5.	Summary	105
6.	References	107
7.	Appendix	121
7.1	Media and nutrient solutions	121
7.2	Buffers and solutions.....	123
7.3	Vector maps.....	126
7.4	Primer	127
7.5	Sequences	128
7.5.1	<i>PeNhx1</i> (<i>Populus euphratica</i> Na^+/H^+ exchanger 1)	128
7.5.2	<i>PeNhaD1</i> (<i>Populus euphratica</i> Na^+/H^+ antiporter D1).....	128
7.5.3	<i>PcNhaD1</i> (<i>Populus x canescens</i> Na^+/H^+ antiporter D1).....	129
7.5.4	<i>AtNhD1</i> (<i>Arabidopsis thaliana</i> Na^+/H^+ antiporter D1)	129
7.6	Supplemental information	130
