List of Tables vi
List of Figures ix
List of Abbreviations xi

1. General introduction 1

2. Literature review 4
2.1 Origin and evolution of chicken domestication 4
2.2 Poultry production and importance in Africa 5
2.3 Rural poultry production and breeding systems in Malawi 6
2.3.1 Free-range (extensive) system 6
2.3.2 Breeding systems 7
2.3.3 Constraints to rural poultry production in Malawi 8
2.4 Current state of research studies on rural poultry in Malawi 9
2.5 Studies on village (rural, indigenous) poultry in other countries 12
2.6 Improvement strategies for rural poultry 15
2.7 Ecotype and phenotype characterisation in rural chickens 17
2.8 Are local chickens breeds? 18
2.9 Methods of phenotypic and genetic evaluation in poultry 19
2.9.1 Growth curve analysis 19
2.9.2 Estimating genetic parameters 20
2.10 Rate and level of improvement required in rural chickens 21
2.11 Production efficiency and economic evaluation 22
2.12 Role of gender in livestock and rural poultry husbandry 23

3. Overview of study area, farmer demography and study concepts 25
3.1 Overview of Malawi 25
3.2 The study area 25
3.3 Farmers and their demography 26
3.4 Livestock status and distribution 27
3.5 Responsible members of household for keeping chickens 29
3.6 Chicken phenotypes 29
3.7 Nature and scope of the study 30

4. Local chicken production system in Malawi: Household flock structure, dynamics, management and health 34
4.1 Abstract 34
4.2 Introduction 34
4.3 Materials and methods 35
4.3.1 The study area 35
4.3.2 Data collection 35
4.3.3 Data manipulation and analyses 36
4.4 Results 36
4.4.1 Household flock status and structure 36
4.4.2 Household flock dynamics and use pattern for chickens 36
4.4.3 Age and live weights at migration 39
4.4.4 Farm-gate prices of birds 39
4.4.5 Housing for rural chickens 39
4.4.6 Feeding management 40
4.4.7 Flock health 41
4.5 Discussion 43
4.5.1 Flock characteristics 43
4.5.2 Flock dynamic 43
4.5.3 Housing system 44
4.5.4 Feeding system 44
4.5.5 Flock health 45
4.6 Conclusion 47

5. Breeding structure of local chickens under scavenging production system in Malawi 48
5.1 Abstract 48
5.2 Introduction 48
5.3 Materials and methods 49
5.3.1 The study area 49
5.3.2 Data collection 49
5.3.3 Data editing and analysis 49
5.4 Results 50
5.4.1 Prevalence of breeding cocks in household flocks 50
5.4.2 Flock hen composition and trends 51
5.4.3 Community breeding flocks 52
5.4.4 Breeding population size and structure 52
5.4.5 Estimated inbreeding 54
5.5 Discussion 54
5.5.1 Breeding structure 54
5.5.2 Effective population size 54
5.5.3 Implications of estimated effective population size 55
5.6 Conclusion 56

6. Marketing system and channels for scavenging local chickens in Lilongwe, Malawi 57
6.1 Abstract 57
6.2 Introduction 57
6.3 Materials and methods 58
6.3.1 Choice of markets of study 58
6.3.2 Study protocol 58
6.3.3 Price portfolios and profit margins 59
6.3.4 Data analysis 59
6.4 Results 59
6.4.1 Market channels and players in local chicken marketing 59
6.4.2 Number of chickens for sale, their live weights and prices 60
6.4.3 Sources and demography of chickens sold 60
6.4.4 Where are farmers in the marketing chain for local chickens? 63
6.4.5 Profit margins of the middlemen 63
6.4.6 Effect of sex, phenotypes and live weights of chickens on price and margins 63
6.5 Discussion 66
6.5.1 Marketing of local chickens 66
6.5.2 Transaction costs and profit margins 66
6.5.3 Effect of sex, phenotypes and live weights 67
6.6 Conclusion 68

7. Phenotypic and genetic analysis of growth and growth curve parameters of local chickens raised under scavenging conditions on-farm and on-station in Malawi 69
7.1 Abstract 69
7.2 Introduction 69
7.3 Materials and methods 70
7.3.1 Study area 70
7.3.2 Study animals 70
7.3.3 Management of chickens 70
7.3.4 Pedigree structure on-station 71
7.3.5 Bird identification and sex determination 72
7.3.6 Data collection 72
7.3.7 Data analyses 72
7.3.7.1 Growth and growth functions 72
7.3.7.2 Growth curve functions 73
7.3.7.3 Models 74
7.3.7.4 Heritability estimates and genetic correlations 74

7.4 Results 75
7.4.1 Live body weights 75
7.4.2 Growth rates 76
7.4.3 Growth curve parameters 76
7.4.4 Phenotypic correlations 82
7.4.5 Heritability estimates 82
7.4.6 Genetic correlations 82
7.5 Discussion 83
7.5.1 Growth performance 83
7.5.2 Growth curves and parameters of growth function 84
7.5.3 Heritability and correlation between traits 85
7.6 Conclusion 86

8. Reproductive performance and survival of local chickens under scavenging conditions in Malawi 87
8.1 Abstract 87
8.2 Introduction 87
8.3 Materials and methods 88
8.3.1 Study area 88
8.3.2 Study animals 88
8.3.2.1 Reproduction performance 88
8.3.2.2 Management 89
8.3.2.3 Chick growth and survival 90
8.3.3 Data collection and analyses 90
8.3.3.1 Reproduction performance 90
8.3.3.2 Reproduction efficiency 91
8.4 Results 93
8.4.1 Egg production and hatching performance 93
8.4.2 Hen reproductive history 95
8.4.3 Chick survival and mortality 95
8.4.4 Annualized output from chicks per unit hen 97
8.4.5 Reproductive efficiency 97
8.5 Discussion 99
8.5.1 Reproductive performance 99
8.5.2 Chick survival 101
8.5.3 Live weights of laying hens 102
8.5.4 Hen output and reproductive rates 102
8.6 Conclusion 103

9. Valuing functions and losses, and input – output efficiency of scavenging chickens in rural communities of Malawi 104
9.1 Abstract 104
9.2 Introduction 104
9.3 Materials and methods 105
9.3.1 Study area 105
9.3.2 Source of data 105
9.3.3 Annualised and weighted valuing of primary flock outputs 105
9.3.4 Valuing breeding flocks 106
9.3.5 Input-output relationship and efficiency 106
9.3.6 Data analysis 106
9.4 Results 107
9.4.1 Annual values for output and losses per flock 107
9.4.2 Input – output efficiency 108
9.5 Discussion 108
9.6 Conclusion 110

10. Growth potential of local chickens in Malawi 111
10.1 Abstract 111
10.2 Introduction 111
10.3 Materials and methods 112

10.3.1 Experimental site 112
10.3.2 Experimental chickens in cages 112
10.3.3 Feeding in cages 112
10.3.4 Health management of chicks in cages 112
10.3.5 Experimental chickens under free-range 113
10.3.6 Data collected 113
10.3.7 Data calculation and analysis 114
10.3.8 Model of analysis 115
10.3.9 Economic evaluation of feed costs 115
10.4 Results 116
10.4.1 Fixed effects of growth performance 116
10.4.2 Growth performance between cage-fed and scavenging chicken mates 116
10.4.3 Variance components and GxE interaction 116
10.4.4 Economic evaluation of feed cost in cages 119
10.5 Discussion 119
10.5.1 Growth potential 119
10.5.2 Variance components 120
10.5.3 GxE interaction 121
10.5.4 Economic evaluation of feeding local chickens 121
10.6 Conclusion 121

11. Feed intake, metabolism and utilisation efficiency of local chickens under cage managed conditions in Malawi 123
11.1 Abstract 123
11.2 Introduction 123
11.3 Materials and methods 124
11.3.1 Metabolic cages and chicken management 124
11.3.2 Feeding management 124
11.3.3 Data collected 124
11.3.4 Data calculation and analyses 124
11.3.5 Model of analysis 125
11.3.6 Nutrient metabolism in local chickens 126
11.4 Results 127
11.4.1 Feed intake (FI) and dry matter intake (DMI) 127
11.4.2 Feed and protein conversion efficiencies 127
11.4.3 Determination of nutrient metabolism 130
11.5 Discussion 131
11.5.1 Feed intake and stomach capacity 131
11.5.2 Feed and protein utilisation efficiencies 131
11.5.3 Dry matter and protein metabolism 132
11.6 Conclusion 132

12. Comparative growth performance of Black Australorp and local chickens under free-ranging village conditions in Malawi 133
12.1 Abstract 133
12.2 Introduction 133
12.3 Materials and methods 134
12.3.1 Study area 134
12.3.2 Study birds and their management 134
12.3.3 Data collection and analysis 135
12.4 Results 136
12.4.1 Live weights and weight gains 136
12.4.2 Growth efficiency 137
12.4.3 Mortality 138
12.5 Discussion 138
12.6 Conclusion 139

13. General Discussion 141
13.1 Local chicken production system 141
13.1.1 Flock sizes and structure 141
13.1.2 Housing, feeding and health 141
13.1.3 Breeding system and structure 142
13.1.4 Flock output 143
13.1.5 Marketing 143
13.1.6 LC production system is likely to prevail 144
13.2 Productivity of local chickens 144
13.3 Input – output relationship and efficiency 146
13.4 On-station versus on-farm performance 146
13.5 Is there scope to improve local chickens? 147
13.6 A proposed village poultry development model 148
13.6.3. Flock health strategies 149
13.6.4. Feeding management 149
13.6.5. Breeding strategies 150
