Table of contents

List of	Tables	v
List of	Figures	ix
List of	Abbreviations	xi
1.	General introduction	1
2.	Literature review	4
2.1	Origin and evolution of chicken domestication	4
2.2	Poultry production and importance in Africa	5
2.3	Rural poultry production and breeding systems in Malawi	6
	2.3.1 Free-range (extensive) system	6
	2.3.2 Breeding systems	/
0.4	2.3.3 Constraints to rural poultry production in Malawi	ð 0
2.4	Current state of research studies on rural poultry in Malawi	10
2.0	Studies of village (fural, indigenous) poulity in other countries	12
2.0	Ecotype and phenotype characterisation in rural chickens	17
2.1	Are local chickens breeds?	18
2.0	Methods of phenotypic and genetic evaluation in poultry	19
2.0	2.9.1 Growth curve analysis	19
	2.9.2 Estimating genetic parameters	20
2.10	Rate and level of improvement required in rural chickens	21
2.11	Production efficiency and economic evaluation	22
2.12	Role of gender in livestock and rural poultry husbandry	23
3.	Overview of study area, farmer demography and study concepts	25
3.1	Overview of Malawi	25
3.2	The study area	25
3.3	Farmers and their demography	26
3.4	Livestock status and distribution	27
3.5	Responsible members of household for keeping chickens	29
3.6	Chicken phenotypes	29
3.7	Nature and scope of the study	30
4.	Local chicken production system in Malawi: Household flock structure,	
	dynamics, management and health	34
4.1	Abstract	34
4.2	Introduction	34
4.3	Materials and methods	35
	4.3.1 The study area	35
	4.3.2 Data collection	35
11	Populte	30
4.4	4.4.1 Household flock status and structure	36
	4.4.2 Household flock dynamics and use pattern for chickens	36
	4 4 3 Age and live weights at migration	39
	4.4.4 Farm-gate prices of birds	39
	4.4.5 Housing for rural chickens	39
	4.4.6 Feeding management	40
	4.4.7 Flock health	41
4.5	Discussion	43
	4.5.1 Flock characteristics	43
	4.5.2 Flock dynamic	43
	4.5.3 Housing system	44
	4.5.4 Feeding system	44
4.0		45
4.0	CONCIUSION	47

5.	Breeding structure of local chickens under scavenging production			
	system in Malawi	48		
5.1	Abstract	48		
5.2	2 Introduction			
5.3	Materials and methods	49		
	5.3.1 The study area	49		
	5.3.2 Data collection	49		
	5.3.3 Data editing and analysis	49		
5.4	Results	50		
	5.4.1 Prevalence of breeding cocks in household flocks	50		
	5.4.2 Flock hen composition and trends	51		
	5.4.3 Community breeding flocks	52		
	5.4.4 Breeding population size and structure	52		
	5.4.5 Estimated inbreeding	54		
5.5	Discussion	54		
	5.5.1 Breeding structure	54		
	5.5.2 Ellective population size	54		
56	Conclusion	50		
5.0	Conclusion	00		
6	Marketing system and channels for scavenging local chickens in			
0.	Lilongwe Malawi	57		
61	Abstract	57		
6.2	Introduction	57		
63	Materials and methods	58		
0.0	6.3.1 Choice of markets of study	58		
	6.3.2 Study protocol	58		
	6.3.3 Price portfolios and profit margins	59		
	6.3.4 Data analysis	59		
6.4	Results	59		
	6.4.1 Market channels and players in local chicken marketing	59		
	6.4.2 Number of chickens for sale, their live weights and prices	60		
	6.4.3 Sources and demography of chickens sold	60		
	6.4.4 Where are farmers in the marketing chain for local chickens?	63		
	6.4.5 Profit margins of the middlemen	63		
	6.4.6 Effect of sex, phenotypes and live weights of chickens on price and margins	63		
6.5	Discussion	66		
	6.5.1 Marketing of local chickens	66		
	6.5.2 I ransaction costs and profit margins	66		
~ ~	6.5.3 Effect of sex, phenotypes and live weights	67		
6.6	Conclusion	68		
7	Phenotypic and genetic analysis of growth and growth curve parameters			
	of local chickens raised under scavenging conditions on farm and on			
	of local chickens raised under scavenging conditions off-latin and off-	00		
74		65		
7.1	ADSI/ACI	65		
1.Z 73	Materials and methods	70		
7.5	7 3 1 Study area	70		
	7.3.2 Study animals	70		
	7.3.3 Management of chickens	70		
	7.3.4 Pedigree structure on-station	71		
	7.3.5 Bird identification and sex determination	72		
	7.3.6 Data collection	72		
	7.3.7 Data analyses	72		
	7.3.7.1 Growth and growth functions	72		
	7.3.7.2 Growth curve functions	73		
	7.3.7.3 Models	74		
	7.3.7.4 Heritability estimates and genetic correlations	74		

7.4	Results7.4.1Live body weights7.4.2Growth rates7.4.3Growth curve parameters7.4.4Phenotypic correlations7.4.5Heritability estimates7.4.6Genetic correlations	75 75 76 82 82 82
7.5	Discussion7.5.1Growth performance7.5.2Growth curves and parameters of growth function7.5.3Heritability and correlation between traits	83 83 84 85
7.6	Conclusion	86
8.	Reproductive performance and survival of local chickens under	
8.1 8.2 8.3	Scavenging conditions in Malawi Abstract Introduction Materials and methods 8.3.1 Study area 8.3.2 Study animals	87 87 87 88 88 88
	 8.3.2.1 Reproduction performance 8.3.2.2 Management 8.3.2.3 Chick growth and survival 8.3.3 Data collection and analyses 8.3.3.1 Reproduction performance 8.3.3.2 Reproduction efficiency 	88 89 90 90 90 91
8.4	Results8.4.1Egg production and hatching performance8.4.2Hen reproductive history8.4.3Chick survival and mortality8.4.4Annualized output from chicks per unit hen8.4.5Reproductive efficiency	93 93 95 95 97 97
8.5	Discussion 8.5.1 Reproductive performance 8.5.2 Chick survival 8.5.3 Live weights of laying hens 8.5.4 Hen output and reproductive rates	99 99 101 102 102
8.6	Conclusion	103
9.	Valuing functions and losses, and input – output efficiency of scavenging chickens in rural communities of Malawi	104
9.1 9.2 9.3	Abstract Introduction Materials and methods 9.3.1 Study area 9.3.2 Source of data 9.3.3 Annualised and weighted valuing of primary flock outputs 9.3.4 Valuing breeding flocks 9.3.5 Input-output relationship and efficiency 9.3.6 Data analysis	104 104 105 105 105 105 106 106
9.4 9.5 9.6	Results 9.4.1 Annual values for output and losses per flock 9.4.2 Input – output efficiency Discussion Conclusion	107 107 108 108 108
10. 10.1 10.2 10.3	Growth potential of local chickens in Malawi Abstract Introduction Materials and methods	111 111 111 112

	10.3.1 Experimental site	112
	10.3.2 Experimental chickens in cages	112
	10.3.3 Feeding in cages	112
	10.3.4 Health management of chicks in cages	112
	10.3.5 Experimental chickens under free-range	113
	10.3.6 Data collected	113
	10.3.7 Data calculation and analysis	114
	10.3.8 Model of analysis	115
10.4	10.3.9 Economic evaluation of feed costs	115
10.4	Results	110
	10.4.1 Fixed effects of growin performance 10.4.2 Growth performance between cage fed and scavenging chicken mates	110
	10.4.3 Variance components and GyE interaction	116
	10.4.4 Economic evaluation of feed cost in cages	119
10.5	Discussion	119
	10.5.1 Growth potential	119
	10.5.2 Variance components	120
	10.5.3 GxE interaction	121
	10.5.4 Economic evaluation of feeding local chickens	121
10.6	Conclusion	121
11.	Feed intake, metabolism and utilisation efficiency of local chickens	
	under cage managed conditions in Malawi	123
11.1	Abstract	123
11.2	Introduction	123
11.3	Materials and methods	124
	11.3.1 Metabolic cages and chicken management	124
	11.3.2 Feeding management	124
	11.3.3 Data collected	124
	11.3.4 Data calculation and analyses	124
	11.3.5 Model of analysis	125
11 1	11.3.6 Nutrient metabolism in local chickens	120
11.4	Results 11.4.1 Ecod intake (EI) and dry matter intake (DMI)	127
	11.4.1 Feed induce (FI) and dry maller induce (Divit)	127
	11.4.3 Determination of nutrient metabolism	130
11 5	Discussion	131
	11.5.1 Feed intake and stomach capacity	131
	11.5.2 Feed and protein utilisation efficiencies	131
	11.5.3 Dry matter and protein metabolism	132
11.6	Conclusion	132
12.	Comparative growth performance of Black Australorp and local chickens	
	under free-ranging village conditions in Malawi	133
12.1	Abstract	133
12.2	Introduction	133
12.3	Materials and methods	134
	12.3.1 Study area	134
	12.3.2 Study birds and their management	134
	12.3.3 Data collection and analysis	135
12.4	Results	136
	12.4.1 Live weights and weight gains	136
	12.4.2 Growth efficiency	137
	12.4.3 Mortality	138
12.5	Discussion	138
12.6	Conclusion	139

13.	General Discussion	141
13.1	Local chicken production system	141
	13.1.1 Flock sizes and structure	141
	13.1.2 Housing, feeding and health	141
	13.1.3 Breeding system and structure	142
	13.1.4 Flock output	143
	13.1.5 Marketing	143
	13.1.6 LC production system is likely to prevail	144
13.2	Productivity of local chickens	144
13.3	Input – output relationship and efficiency	146
13.4	On-station versus on-farm performance	146
13.5	Is there scope to improve local chickens?	147
13.6	A proposed village poultry development model	148
	13.6.3. Flock health strategies	149
	13.6.4. Feeding management	149
	13.6.5. Breeding strategies	150
14.	Summary	153
