CONTENT

1 Introduction

1.1 Forest and land degradation in Namibia	1
1.2 Management of dry deciduous forests in Namibia	6
1.3 Development challenges	8
1.4 Object of the study	9
1.5 Hypothesis	10

2 Materials and methods

2.1 Site selection	11
2.2 Potential concept and plant water relations	16
2.3 Evaluation of suitable planting techniques	
2.3.1 Planting material	24
2.3.2 Planting trials in Okahandja	26
2.3.3 Planting trials in Katima Mulilo	29
2.4 Statistical analysis	35

3 Results and discussion

3.1 Site - vegetation relations in the Namib Desert	
3.1.1 Location Namibrand, South Namib	36
3.1.2 Location Sossusvlei, South Namib	49
3.1.3 Location Homeb, Kuiseb River	56
3.1.4 Location Salt Hill, Swakop River	70
3.2 Site - vegetation relations in the dry deciduous forest of East Caprivi	77
3.3 Planting for arid zones	
3.3.1 Planting trials in Okahandja: assessment of 'planting methods' and 'water catchment measures'	96
3.3.2 Planting trials in Katima Mulilo: 'planting methods', 'water-catchment measures', the use of different 'container sizes' and 'hardening-off intensities'	106

4	Afforestation, restoration and bio-monitoring approaches	
4.1	Assessment of guidelines for afforestation activities	126
4.2	Approaches for restoration measures	132
4.3	Bio-monitoring approaches	138
5	Summary	143
6	References	151
7	Appendices	162
