

TABLE OF CONTENTS

Table of contents.....	I
List of abbreviations.....	III
List of tables.....	IV
List of figures.....	VII
List of tables and figures in the appendix.....	X
1 Introduction.....	1
1.1 Background	1
1.2 Objectives.....	4
2 Materials and methods	5
2.1 Sewage sludge and animal meal.....	5
2.2 Soil characteristics.....	6
2.3 Experimental design.....	7
2.4 Analytical methods.....	11
2.5 Statistical analysis	13
3 Results	14
3.1 Element composition of sewage sludge and meat and bone meal	14
3.2 Results of the material comparison trial - MCT.....	17
3.2.1 Effect of source of P and rate of P source applied on soil chemical properties.....	17
3.2.1.1 Soil pH.....	17
3.2.1.2 Soil P _{CAL} and P _{H2O}	19
3.2.1.3 Soil total N, K _{CAL} , and Mg _{CaCl2}	22
3.2.1.4 Essential micronutrients (Fe _{EDTA} , Mn _{EDTA} , Cu _{WH} and Zn _{WH})	25
3.2.1.5 Cadmium	28
3.2.2 Effects of source of P and rate of P source applied on dry matter yield of grass...30	
3.2.3 Effects of source of P and rate of P source applied on plant tissue composition...35	
3.2.3.1 Phosphorus	35
3.2.3.2 K, Ca and Mg	37
3.2.3.3 Essential micronutrients (Fe, Mn, Cu and Zn)	43
3.2.4 Effect of source of P and rate of P source applied on nutrient uptake of grass.....51	
3.2.4.1 Phosphorus	51
3.2.4.2 K, Ca and Mg	57
3.2.4.3 Essential micronutrients (Fe, Mn, Cu and Zn)	60

3.3	Results of the P mobilization trial - PMT	63
3.3.1	Effect of “in situ” digestion of P sources on soil chemical properties.....	63
3.3.1.1	Soil pH.....	63
3.3.1.2	Soil P _{CAL} and P _{H2O}	65
3.3.1.3	Soil total N, K _{CAL} and Mg _{CaCl2}	70
3.3.1.4	Essential micronutrients (Fe _{EDTA} , Mn _{EDTA} , Cu _{WH} and Zn _{WH}).....	72
3.3.1.5	Cadmium	75
3.3.2	Effect of “in situ” digestion of P sources on the dry matter yield	77
3.3.3	Effect of “in situ” digestion of P sources on plant tissue composition.....	79
3.3.3.1	Phosphorus	79
3.3.3.2	K, Ca and Mg.....	83
3.3.3.3	Essential micronutrients (Fe, Mn, Cu and Zn).....	86
3.3.4	Effect of “in situ” digestion of P sources on nutrient uptake of grass	90
3.3.4.1	Phosphorus	90
3.3.4.2	K, Ca and Mg.....	95
3.3.4.3	Essential micronutrients (Fe, Mn, Cu and Zn).....	98
3.3.5	Effect of S ^o addition and <i>Thiobacillus</i> inoculation on <i>Thiobacillus</i> count and soil microbial activity.....	103
3.3.5.1	<i>Thiobacillus</i> count	103
3.3.5.2	Dehydrogenase activity of soil micro-organisms.....	104
3.3.5.3	Phosphatase activity of soil micro-organisms	105
4	Discussion.....	106
4.1	Assessment of chemical changes in element composition induced by incineration...	106
4.2	Assessment of changes in P availability of incinerated sewage sludge and meat and bone meal.....	111
4.3	Assessment of changes in micronutrients and heavy metals of incinerated sewage sludge and meat and bone meal	115
4.4	Impact of S ^o addition and <i>Thiobacillus</i> inoculation on plant P availability	118
4.5	Assessment of heavy metal release by S ^o addition and <i>Thiobacillus</i> inoculation.....	122
5	Summary.....	124
6	References	132
7	Appendix
