List of figures.....	vi
List of tables.....	viii
List Maps.....	x
Abbreviations.....	xi
Acknowledgements.....	xii
1. Introduction	2
1.1 Hypothesis and objectives	3
1.2 Present state of the Problem	5
1.2.1 Impact of the soil in the area of Investigation	5
2. State of knowledge and ethnopedology	8
2.1 Global function of the soil and sustainability of soil.	8
2.2 Necessities of the soil conservation	9
2.3 Health and quality of soils	10
2.4 Local soil knowledge and management	12
2.5 The Concept of Indicators and Criteria for its Selection	13
2.5.1 Local indicators of soil quality	14
2.5.2 Chemical Indicators	18
2.5.2.1 The acidity: pH and the aluminium content	19
2.5.2.2 Nutrients of soils	20
2.5.2.3 Organic matter and Organic carbon	20

2.5.3	Soil Physical Indicators	22
2.5.4	Soil Biological Indicators	22
2.6	Erosion and depth of the Horizon A	24
2.7	Ethnopedology	24
2.7.1	How the peasants classify their soils	24
2.7.1.1	Descriptive classification	25
2.7.1.2	Peasants' knowledge and scientific knowledge	26
2.7.1.3	Scientific evaluation of local soil classification	29
2.8	Peasants' conception of soil fertility and management	35
2.8.1	Local concepts of soil fertility	31
2.9	Agroecosystem	33
2.9.1	Agroforestry system	34
2.10	Advantages of sustainable agriculture in Latin America	33
2.10.1	Agroecology as a fundamental scientific basis for natural resource management.	35
2.11	Effects of natural areas on agriculture	39
3.	The Investigation Site	41
3.1	Climatology	41
3.2	Vegetation	45
3.3	Geology	45
3.3.1	Soil association	45
3.3.1.1	Silvia Association	46
3.3.1.2	Pescador Asociation	46
3.3.1.3	Suarez Association	46
3.3.1.4	Usenda Association	46
3.3.1.5	Farallones Association	46
3.3.1.6	Alsacia Association	46
3.3.1.7	Dominguito Association	47
3.4	Chemical soil characterization	48
3.5	Land Use and vegetation	49
3.6	Agroforestry system in Cabuyal	51
3.7	Characteristics of peasants in Cabuyal watershed	52

4. Field and Lab Methods	55
4.1 Taking and analysis of data	55
4.1.1 Informal visits to the agriculturists	55
4.1.2 Accomplishment of survey and interviews	55
4.1.3 Maps and distribution of the farmers	58
4.1.4 Taking of soil samples.	58
4.1.4.1 Samples of soil	58
4.1.4.2 Data bank of soils	59
4.1.5 Taking of plant samples as indicators of soils	59
4.2 Technique used in the chemical soil analyses	61
4.2.1 Organic Carbon	61
4.2.2 Exchangeable cations	61
4.2.3 Calcium	61
4.2.4 Potassium	62
4.2.5 Exchangeable acidity	62
4.2.6 Percentage of Aluminum Saturation	62
4.2.7 Effective Cation Exchange Capacity (CECe)	62
4.3 Color	63
4.4 Texture	63
5. Results and Discussion	64
5.1 The peasants	64
5.2 Land Use	65
5.2.1 Cultivations	65
5.2.2 Pastures	68
5.2.3. The fallow area	68
5.2.4 Forest	69
5.3 Cultivation management	70
5.3.1 Soil preparation	70
5.3.2 Fertilization	70
5.3.3 Weeding	17
5.3.4 Watering	71

5.3.5 Barriers	72
5.4 Land Use and Chemical soils Indicators	72
5.5 Soil Erosion in the zone	73
5.6 Characteristics of main Chemical soil Indicators	74
5.6.1 Organic matter	74
5.6.2 Phosphorus	77
5.6.3 pH	79
5.6.4 Cation exchange capacity	80
5.6.4.1 Calcium	83
5.6.4.2 Magnesium	84
5.6.4.3 Potassium	85
5.6.4.4 Aluminium	86
5.6.5 Correlation of chemical parameters	88
5.7 Local evaluation of the soil quality	89
5.7.1 Specific soil qualities	89
5.7.1.1 Black soil	90
5.7.1.3 Ceruda soil	90
5.7.1.4 Loose soil (Suelta soil)	91
5.7.1.5 Granosa soil-polvosa	91
5.7.1.6 Humid soil-dry soil	91
5.7.1.7 Hill-plane soil	91
5.7.2. Cultural categories	94
5.7.2.1 Good Soils	94
5.7.2.2 Bad Soil	96
5.7.2.3 Tired (Cansada) soil	98
5.8 Development and variation of the horizon A during the last 30 years by peasants	99
5.9 Local Indicators soils quality	100
5.10 Index of soil fertility	102
5.11 Local Plants used by the peasants as indicator for soil quality	105
5.12 Local knowledge and Scientific Knowledge of soils	109
5.12.1 Comparison of chemical parameters of soils and local clasification	109

5.12.2 Comparison of chemical parameters of soil and indicators plant	111
5.12.3 Analysis of soil groups, according to the peasants	113
5.13 Importance of the local soil classification	117
6. Soil planning, conservation and local participation	119
6.1. Agroforestry	120
6.1.1 Benefits of agroforestry	121
7. Conclusions	124
8. Summary	127
9. Reference	131
10. Appendices	143
