Contents

Part I: Introduction	1
1.1 Crisis of traditional Internal Combustion Engines	1
1.2 Hydrogen economy	7
1.3 Application of Hydrogen as Fuel.....	8
1.4 Object of the Thesis	13
Part II: Basic Research on FIRE Simulation.....	15
2.1 Introduction	15
2.2 General approach to reliable simulation.....	16
2.3 FIRE V&V study on supersonic gas injection.....	18
2.4 FIRE Validation with hydrogen injection experiments	26
2.5 Brief summary.....	31
Part III: Simulation of Hydrogen Injection and Mixture Formation.....	33
3.1 Introduction	33
3.2 Characteristics of Hydrogen Injection.....	34
3.3 Influence of engine speed	36
3.4 Influence of Injector Construction	37
3.5 Influence of initial swirl.....	39
3.6 Mixture formation process analysis	40
3.7 Brief summary.....	45
Part IV: Validation of Different Combustion Models in FIRE.....	46
4.1 Introduction	46
4.2 Validation of Eddy Breakup model.....	52
4.3 Validation of CFM model.....	58
4.4 Validation of PDF model.....	62
4.5 Validation of TFSC Model	67
4.6 Brief summary.....	81
Part V: Research on Hydrogen Engine Combustion	82
5.1 General Characteristics of combustion process in Hydrogen Engine ...	82
5.2 Hydrogen engine Simulation Modeling	86
5.3 Influence of Ignition timing	90
5.4 Influence of Mixture Concentration.....	94

5.5 Other parameter study	95
5.6 Optimum design of hydrogen engine	99
Part VI: Main Conclusions	101
6.1 Hydrogen engine will be prospective at least in near future	101
6.2 FIRE is capable for hydrogen injection simulation	101
6.3 Hydrogen injection and Mixture formation.....	101
6.4 Combustion models study.....	101
6.5 Optimization of Hydrogen engine combustion.....	102
Appendix I: Flame Speed Calculation	104
A1.1 Flame surface radius calculation	104
A1.2 Laminar flame speed calculation.....	106
Appendix II: Nomenclature	109
Acknowledgements	111
Resume	112
Reference	113
R1 Articles	113
R2 Websites	113
