List of tables	ix
Summary	xi
Zusammenfassung	xii
1. Introduction	1
1.1 Certification of forest and agroforestry products	1
1.2 Clean Development Mechanism	1
1.3 Forest resources and ecosystem services	2
1.4 Agroforests and forest resources in Southern Cameroon	3
2. Literature review	5
2.1 Cocoa agroforest characteristics	5
2.1.1 Associated plants	5
2.1.2 Structure of cocoa plantation	7
2.1.3 Litter fall	8
2.1.4 Pest management	9
2.1.5 Production	10
2.1.6 Farmers' knowledge and preferences	12
2.2 Cocoa agroforests in the landscape	12
2.2.1 Forest degradation	12
2.2.2 Biodiversity conservation	14
2.2.3 Carbon sequestration	14
2.2.4 Interaction with the local vegetation	14
2.2.5 Other factors	16
3 Material and methods	17
3.1 Study site	17
3.2 Soils of the study area	19
3.3 Analytical methods	19
3.3.1 Site and field selection	19
3.3.2 Data collection	24
3.3.3 Chemical analysis	26
3.4 Data compilation and analysis	27
3.4.1 Experiment 1. Ethnobotany and household characteristics	27
3.4.2 Experiment 2. Floristic composition and diversity of cocoa plantations	28
3.4.3 Experiment 3. Structure of cocoa agroforest	29
3.4.4 Experiment 4. Phytomass in cocoa agroforests	30
3.4.5 Experiment 5. Litter in the cocoa agroforestry system	31
3.4.6 Experiment 6. Cocoa production	32
3.4.7 Experiment 7. Carbon stock in cocoa agroforests	32
3.5 Statistical analysis	32
4 Findings	33
4.1 Farmers' characteristics and choice of plants to associate with cocoa	33
4.1.1 Socio-economic data on farmers and characteristics of cocoa agroforests	33
4.1.2 Farmers' choice of plants to associate with cocoa	35
4.2 Diversity of plants associated with cocoa in complex agroforestry systems	38
4.2.1 Species richness and diversity	38
4.2.2 Species frequency	39
4.2.3 Species abundance and density	40
4.2.4 Basal area of plant species associated with cocoa	42
4.2.5 Main uses of plants	43

4.3 Structure and typology of complex cocoa agroforests	45
4.3.1 Density of cocoa agroforests	45
4.3.2 Average height and diameter	45
4.3.3 Distribution of cocoa according to diameter.....	46
4.3.4 Distribution of plants according to strata.....	46
4.3.5 Basal area.....	47
4.3.6 Distribution of plants associated with cocoa according to diameter.....	48
4.3.7 Distribution of plants associated with cocoa according to main use	49
4.3.8 Difference in structure between cocoa agroforests: typology.....	49
4.4 Plant biomass in cocoa agroforests	51
4.4.1 Plant biomass in cocoa agroforests in different ecological zones.....	51
4.4.2 Plant biomass of cocoa agroforests under different management methods	52
4.4.3 Plant biomass for different plant species	52
4.4.4 Plant biomass per plant species	53
4.5 Litter and nutrient dynamics in cocoa agroforestry systems.....	55
4.5.1 Litter dynamics in different ecological zones.....	55
4.5.2 Litter dynamics in different management conditions	62
4.6 Smallholder cocoa production in complex agroforestry systems.....	71
4.6.1 Number of biological pods per cocoa tree	72
4.6.2 Wilt incidence.....	73
4.6.3 Black pod disease	73
4.6.4 Damage by rodents	73
4.6.5 Production of good pods per cocoa tree	73
4.6.6 Weight of cocoa pods	74
4.6.7 Number of beans per cocoa pod	74
4.6.8 Dry bean production per hectare.....	74
4.6.9 Prediction of cocoa production by regression equations	75
4.7 Carbon stock in complex cocoa agroforests.....	76
4.7.1 Carbon stock of cocoa agroforests in different ecological zones	76
4.7.2 Carbon stock in different cocoa management methods	77
4.7.3 Carbon store in different plant species associated with cocoa.....	77
4.7.4 Carbon storage by main plant species	78
5 Discussion	81
5.1 Farmers' characteristics and preferences.....	81
5.2 Diversity of plants associated with cocoa	82
5.3 Structure of the cocoa agroforest	83
5.4 Phytomass and carbon sequestration.....	85
5.5 Litter and nutrient dynamics	86
5.6 Cocoa production	88
6 General conclusion.....	90
References	92
Annexes.....	100
Curriculum vitae.....	112
