

Tinnagon Tartragoon (Autor)

Study of Phosphorus Availability in some Plant Feedstuffs and the Effects of Supplemental Phytase on Performance and Phosphorus Excretion in Pigs

Tinnagon Tartragoon

STUDY OF PHOSPHORUS AVAILABILITY IN
SOME PLANT FEEDSTUFFS AND THE EFFECTS OF
SUPPLEMENTAL PHYTASE ON PERFORMANCE
AND PHOSPHORUS EXCRETION IN PIGS

2.6.	Effect of microbial phytase on nutrient digestibility and animal performance	23
2.6.1.	Effect of microbial phytase on nutrient digestibility.....	23
2.6.2.	Effect of microbial phytase on pig performance.....	24
2.7.	Effect of microbial phytase on P surplus in the environment	25
2.7.1.	Environmental effects of phosphorus	25
2.7.2.	Effect of microbial phytase on phosphorus excretion in pigs.....	27
2.8.	Conclusion	29
3.	EXPERIMENTS 1-4: STUDIES ON PHOSPHORUS AVAILABILITY IN PROTEIN RICH PLANT FEEDSTUFFS:SOYBEAN MEAL (EXP. 1) AND SUNFLOWER MEAL (EXP. 2) AND ENERGY RICH PLANT FEEDSTUFFS:CORN (EXP. 3) AND RICE BRAN (EXP. 4) FED WITHOUT AND WITH PHYTASE SUPPLEMENT TO GROWING PIGS.	30
3.1.	Objectives	30
3.2.	Materials and Methods	30
3.2.1.	Experimental animals and housing.....	30
3.2.2.	Design of experiments	31
3.2.3.	Experimental feeds and feeding procedure	31
3.2.4.	Measurements	32
3.2.5.	Chemical analyses.....	38
3.2.6.	Digestibility calculations.....	38
3.2.7.	Statistical analysis	41
3.3.	Results from preliminary experiment	41
3.3.1.	Chemical analyses of experimental diets	41
3.3.2.	Phosphorus intake, excretion and digestibility.....	41
3.4.	Results from experiment 1	42
3.4.1.	Chemical analyses of experimental diets.....	42
3.4.2.	Phosphorus intake and excretion	43

3.4.3.	Phosphorus absorption, retention and digestibility.....	43
3.5.	Results from experiment 2	45
3.5.1.	Chemical analyses of experimental diets	45
3.5.2.	Phosphorus intake and excretion	46
3.5.3.	Phosphorus absorption, retention and digestibility.....	48
3.6.	Results from experiment 3	49
3.6.1.	Chemical analyses of experimental diets	49
3.6.2.	Phosphorus intake and excretion	49
3.6.3.	Phosphorus absorption, retention and digestibility.....	50
3.7.	Results from experiment 4	52
3.7.1.	Chemical analyses of experimental diets	52
3.7.2.	Phosphorus intake and excretion	52
3.7.3.	Phosphorus absorption, retention and digestibility.....	53
3.8.	Discussion for experiments 1-4	54
3.9.	Conclusion for experiments 1-4	59
4.	EXPERIMENT 5: THE EFFECTS OF FEEDING DIETS WITH NORMAL AND LOW PHOSPHORUS CONTENTS SUPPLEMENTED WITH PHYTASE ON PHOSPHORUS EXCRETION IN GROWING PIGS	60
4.1.	Objectives	60
4.2.	Materials and Methods	60
4.2.1.	Experimental animals	60
4.2.2.	Design of experiment.	60
4.2.3.	Experimental feeds and feeding procedure	61
4.2.4.	Measurements	61
4.2.5.	Chemical analyses	63
4.2.6.	Data calculations.....	63
4.2.7.	Statistical analysis.....	64

4.3.	Results	64
4.3.1.	Chemical analyses of experimental diets	64
4.3.2.	Phosphorus intake and excretion	64
4.3.3.	Phosphorus absorption, retention and digestibility	65
4.4.	Discussion	68
4.5.	Conclusion	70
5.	EXPERIMENT 6: THE EFFECTS OF FEEDING DIETS WITH NORMAL AND LOW PHOSPHORUS CONTENTS SUPPLEMENTED WITH PHYTASE ON PRODUCTIVE PERFORMANCE IN GROWING-FINISHING PIGS	71
5.1.	Objectives	71
5.2.	Materials and Methods	71
5.2.1.	Experimental animals	71
5.2.2.	Design of experiment	71
5.2.3.	Experimental feeds and feeding procedure	72
5.2.4.	Measurements	72
5.2.5.	Statistical analysis	73
5.3.	Results	75
5.3.1.	Chemical analyses of experimental diets	75
5.3.2.	Productive performance of growing pigs (30-60 kg BW)	75
5.3.3.	Productive performance of finishing pigs (60-90 kg BW)	77
5.3.4.	Productive performance of growing-finishing pigs (30-90 kg BW)	77
5.3.5.	Carcass characteristics of slaughtered pigs	78
5.3.6.	Ash and P content in bones of slaughtered pigs	79
5.4.	Discussion	80
5.5.	Conclusion	84

LIST OF TABLES

	Page
Table 2.1. Total phosphorus and phytate-P concentration in selected feedstuffs.....	7
Table 2.2. P digestibility coefficients (% of intake) of some feedstuffs of plant origin for pigs.....	8
Table 2.3. Phosphorus concentration and bioavailability in macro mineral sources (data on as-fed basis).....	9
Table 2.4. Endogenous phytase activity of some feed ingredients.....	18
Table 2.5. Effect of phytase supplement on growth performance and apparent digestibility of energy, nitrogen and mineral in growing-finishing pigs...	26
Table 2.6. Phosphorus balance of piglets (15 kg LW) without and with 1000 U phytase supplementation kg ⁻¹ diet.....	28
Table 2.7. Mean excretion of P of growing-finishing pigs from 25 to 110 kg in the Netherlands.....	28
Table 3.1. Feed ingredients (g kg ⁻¹ as-fed basis) and the calculated contents of diets in preliminary experiment.....	33
Table 3.2. Feed ingredients (g kg ⁻¹ as-fed basis) and the calculated contents of diets in experiment 1.....	34
Table 3.3. Feed ingredients (g kg ⁻¹ as-fed basis) and the calculated contents of diets in experiment 2.....	35
Table 3.4. Feed ingredients (g kg ⁻¹ as-fed basis) and the calculated contents of diets in experiment 3.....	36
Table 3.5. Feed ingredients (g kg ⁻¹ as-fed basis) and the calculated contents of diets in experiment 4.....	37
Table 3.6. Composition (g kg ⁻¹ DM) of experimental diets in preliminary experiment.....	41
Table 3.7. The effect of phytase SP 1002 on P balance in experimental diets and P digestibility of cassava in growing pigs.....	42
Table 3.8. Composition (g kg ⁻¹ DM) of experimental diets in experiment 1.....	42
Table 3.9. The effect of phytase SP 1002 on P balance in experimental diets and P digestibility of SBM in growing pigs.....	44
Table 3.10. Composition (g kg ⁻¹ DM) of experimental diets in experiment 2.....	46
Table 3.11. The effect of phytase SP 1002 on P balance in experimental diets and P digestibility of SFM in growing pigs.....	47
