## Table of Content

Acknowledgements .....	i
Table of contents .....	ii
I. Introduction .....	1
1.1. Background .....	1
1.2. Objectives .....	4
II. Literature review .....	5
2.1. Introduction to <i>Oryzaephilus surinamensis</i> .....	5
2.1.1. The biology and ecology .....	5
2.1.2. The maintaining methods of <i>Oryzaephilus surinamensis</i> .....	6
2.1.3. The economic loss due to the infestation of <i>Oryzaephilus surinamensis</i> .....	7
2.2. The potential of thermal method for insect control .....	8
2.3. Theoretical aspects of high frequency .....	10
2.4. Factors influencing the dielectric properties of materials .....	13
2.4.1. Frequency .....	13
2.4.2. Temperature .....	14
2.4.3. Moisture content .....	16
2.4.4. Density .....	18
2.4.5. Other factors .....	19
2.5. The potential of using microwave energy for insect control .....	20
2.6. The quality of wheat flour .....	21
2.6.1. Moisture content .....	21
2.6.2. Starch .....	22
2.6.3. Falling number .....	22
2.6.4. Flour viscosity .....	22
2.6.5. Damaged starch .....	22
2.6.6. Gluten content .....	23
2.6.7. Dough properties and baking test .....	23
III. Material and methods .....	24
3.1. Laboratory microwave applicator .....	24

3.2.	Materials .....	26
3.2.1.	Grain preparation .....	26
3.2.2.	Insect preparation .....	27
3.3.	Study on heating uniformity.....	27
3.3.1.	Experimental design .....	27
3.3.2.	Procedures .....	29
3.3.3.	Determination of temperature profile .....	29
3.3.4.	Determination of temperature range on the image .....	30
3.3.5.	Determination of temperature distribution .....	31
3.3.6.	Determination of uniformity index .....	32
3.3.7.	Determination of hot and cold spot areas .....	33
3.4.	Study on the mortality of <i>Oryzaephilus surinamensis</i> .....	34
3.4.1.	Experimental design .....	34
3.4.2.	Procedures .....	35
3.4.2.1.	Binding grains and insects with plastic wrap .....	35
3.4.2.2.	Microwave treatment .....	36
3.4.2.3.	Determination of mortality .....	36
3.4.2.4.	Statistical analysis .....	36
3.5.	Study on germination rate .....	37
3.5.1.	Procedure .....	37
3.5.2.	Statistical analysis .....	37
3.6.	Analysis on flour quality .....	37
3.6.1.	Experimental design .....	37
3.6.2.	Determination of starch content .....	38
3.6.3.	Determination of falling number .....	39
3.6.4.	Measurement of flour viscosity .....	40
3.6.5.	Determination of damaged starch .....	40
3.6.6.	Determination of gluten content .....	42
3.6.7.	Micro-scale baking test .....	42
3.6.7.1.	Determination of dough properties with farinograph ....	42
3.6.7.2.	Baking test .....	43
3.6.8.	Statistical analysis .....	43
IV.	Results .....	44

4.1. Heating uniformity .....	44
4.1.1. Temperature profile during temperature increase period .....	45
4.1.2. Temperature distribution .....	45
4.1.3. The uniformity index .....	47
4.1.3.1. The uniformity index after 5 min microwave heating with different initial moisture contents and surface temperatures .....	47
4.1.3.2. The uniformity index after microwave heating at temperature 50 °C with different initial moisture contents and exposure times .....	48
4.1.4. Hot and cold spot areas .....	49
4.1.4.1. Hot and cold spot areas after 5 min microwave heating with different initial moisture contents and surface temperatures.....	49
4.1.4.2. Hot and cold spot areas after microwave heating at temperature 50 °C with different moisture contents and exposure times .....	54
4.2. The mortality of <i>Oryzaephilus surinamensis</i> .....	54
4.2.1. The mortality after 5 min microwave heating with different initial moisture contents and surface temperatures .....	54
4.2.2. The mortality after microwave heating at temperature 50 °C with different initial moisture contents and exposure times ....	58
4.3. Germination rate .....	61
4.3.1. Germination rate after 5 min microwave heating with different initial moisture contents and surface temperatures ...	61
4.3.2. Germination rate after microwave heating at temperature 50 °C with different initial moisture contents and exposure times .....	62
4.4. The quality of flour .....	64
4.4.1. The moisture loss under effect of microwave heating .....	64
4.4.2. The quality of flour after 5 min microwave heating with different initial moisture contents and surface temperatures....	65
4.4.2.1. Starch content .....	65

4.4.2.2. Falling number .....	66
4.4.2.3. Flour viscosity .....	66
4.4.2.4. Damaged starch .....	68
4.4.2.5. Gluten content .....	70
4.4.2.6. Dough properties .....	73
4.4.2.7. Loaf volume .....	74
4.4.3. The quality of flour after microwave heating at temperature 50 °C with different initial moisture contents and exposure times .....	76
4.4.3.1. Starch content .....	76
4.4.3.2. Falling number .....	77
4.4.3.3. Flour viscosity .....	78
4.4.3.4. Damaged starch .....	79
4.4.3.5. Gluten content .....	81
4.4.3.6. Dough properties .....	83
4.4.3.7. Loaf volume .....	84
4.4.4. The correlation between quality parameters .....	85
4.4.4.1. The correlation between flour quality parameters and dough properties after 5 min microwave heating with different initial moisture contents and surface temperatures .....	85
4.4.4.2. The correlation between flour quality parameters and dough properties after microwave heating at temperature 50 °C with different initial moisture contents and exposure times .....	87
V. Discussion .....	89
5.1. Heating uniformity .....	89
5.1.1. Heating uniformity based on the uniformity index .....	88
5.1.2. Heating uniformity based on hot and cold spot areas .....	90
5.1.3. Improving the quality of heating uniformity under microwave heating .....	92
5.2. The mortality of <i>Oryzaephilus surinamensis</i> .....	94

5.2.1. The mortality of <i>Oryzaephilus surinamensis</i> as the influence of initial moisture contents.....	94
5.2.2. The mortality of <i>Oryzaephilus surinamensis</i> as the influence of surface temperatures .....	96
5.2.3. The mortality of <i>Oryzaephilus surinamensis</i> as the influence of exposure times .....	98
5.2.4. The mortality at different life stages of <i>Oryzaephilus surinamensis</i> .....	99
5.2.5. The effect of heating uniformity on the mortality of <i>Oryzaephilus surinamensis</i> .....	100
5.3. The influence of microwave heating on germination rate .....	100
5.3.1. The influence of initial moisture contents on germination rate	100
5.3.2. The influence of surface temperatures on germination rate .....	101
5.3.3. The influence of exposure times on germination rate .....	102
5.4. The influence of microwave heating on the flour quality .....	103
VI. Recommendation .....	108
VII. Summary .....	109
References .....	112
