

Table of contents

	Abbreviations	
1	Introduction	1
2	Materials and methods	8
2.1	Animals.....	8
2.1.1	Description and laboratory breeding.....	8
2.1.2	Animal preparation.....	10
2.2	Recording and staining techniques.....	11
2.2.1	Intracellular recording.....	11
2.2.2	Lucifer yellow staining.....	12
2.2.3	Neurobiotin staining.....	12
2.3	Helium-Cadmium Laser.....	13
2.4	Stimulation.....	13
2.4.1	Frequency programs.....	13
2.4.2	Directional programs (LR programs).....	13
2.4.3	Calibration.....	13
2.5	Data evaluation.....	13
2.5.1	Digitization.....	13
2.5.2	Evaluation.....	14
2.5.3	Frequency tuning curves.....	14
2.5.4	Normalization.....	14
2.6	Description of the experiments.....	14
2.6.1	Basic scheme.....	14
2.6.2	Auditory receptor cell vs. auditory interneuron experiments.....	14
2.6.3	Directional experiments.....	15
2.6.4	Frequency-specific inhibition experiments.....	16
2.6.5	Connections between intersegmental interneurons.....	16
2.6.6	Control experiments.....	17
2.6.6.1	Control with lucifer yellow.....	17
2.6.6.2	Control with neurobiotin.....	17
2.6.6.3	Control: non-LY stained cell vs. auditory neuron.....	17
2.6.6.4	Control: non-auditory vs. auditory neuron.....	17
2.7	Ganglia treatment.....	18

2.7.1	Ganglia fixation.....	18
2.7.2	Lucifer yellow confirmation.....	18
2.7.3	Neurobiotin staining.....	18
2.7.4	Simultaneous LY and neurobiotin confirmation.....	19
2.8	Auditory interneurons in <i>Ancistrura nigrovittata</i>	19
3	Results	23
3.1	Neuron staining and morphological confirmation.....	23
3.2	Control experiments.....	23
3.2.1	Control with lucifer yellow.....	23
3.2.2	Control with neurobiotin.....	27
3.2.3	Control: non-LY stained cell vs. auditory neuron.....	28
3.2.4	Control: non-auditory vs. auditory neuron.....	31
3.3	Auditory receptor cell's connections with auditory interneurons.....	32
3.3.1	Effect of single auditory receptor cell photoinactivation.....	32
3.3.2	Effect of multiple auditory receptor cell photoinactivation.....	36
3.4	Contralateral inhibition.....	41
3.4.1	Contralateral inhibition between the two mirror-image partners ON1.	42
3.4.1.1	ON1 vs. ON1 without cutting the contralateral leg.....	44
3.4.1.2	ON1 vs. ON1 with cutting the contralateral leg.....	45
3.4.2	Contralateral inhibition of the Ascending interneuron 1 (AN1) by ON1.....	50
3.4.2.1	ON1 vs. AN1 directional information.....	51
3.4.2.2	AN1 frequency tuning curve after ON1 photoinactivation.....	55
3.4.3	Contralateral inhibition of the T-interneuron 1 (TN1) by ON1.....	55
3.4.3.1	Contralateral inhibition.....	57
3.4.3.2	TN1 frequency tuning curve after ON1 photoinactivation.....	59
3.4.4	Contralateral inhibition of the Ascending interneuron 5 (AN5-AG7) by ON1.....	60
3.4.4.1	Contralateral inhibition.....	61
3.4.4.2	AN5-AG7 frequency tuning curve after ON1 photoinactivation.....	61
3.4.5	Test of ON1 influence on T-interneuron 3 (TN3).....	64
3.4.5.1	Contralateral inhibition.....	64
3.4.5.2	TN3 frequency tuning curve after ON1 photoinactivation.....	66
3.5	Frequency-specific inhibitions.....	67

3.6	Test for connections between descending interneurons.....	69
3.7	Connections between intersegmental interneurons.....	69
3.7.1	Local interneurons vs. intersegmental interneurons.....	70
3.7.1.1	ON1 input vs. AN5-AG7.....	70
3.7.1.2	ON1 input vs. TN1.....	72
3.7.1.3	ON1 input vs. Descending cells.....	72
3.7.2	Intersegmental interneurons vs. intersegmental interneurons.....	73
3.7.2.1	TN1 vs. auditory interneurons.....	73
3.7.2.2	AN1 vs. auditory interneurons.....	75
3.7.2.3	AN5-AG7 vs. auditory interneurons.....	80
3.8	Preliminary auditory network in <i>A. nigrovittata</i>	86
3.9	Results in other Phaneropteridae.....	87
3.9.1	ON1 vs. ON1 in <i>Barbitistes ocskayi</i>	87
3.9.2	ON1 vs. AN1 in <i>Leptophyes laticauda</i>	90
4	Discussion	92
4.1	Control experiments and photoinactivation of neurons.....	92
4.2	Transmission of information between the peripheric and the central nervous system.....	95
4.2.1	Theoretical background: Peripheric Nervous System (PNS) in Ensifera.....	95
4.2.1.1	Auditory receptor cells in Ensifera.....	95
4.2.1.2	Connections between auditory receptors and first order interneurons.....	96
4.2.2	PNS and CNS connections in <i>A. nigrovittata</i>	97
4.3	Contralateral inhibition at the level of first order auditory interneurons.....	104
4.3.1	Theoretical background of directional information in Ensifera.....	104
4.3.2	Contralateral inhibition in <i>A. nigrovittata</i>	107
4.3.2.1	Auditory interneurons without directional information.....	107
4.3.2.2	Auditory interneurons with directional information.....	108
4.4	Frequency tuning and frequency-specific inhibition.....	114
4.4.1	Frequency-specific inhibition by DUM-cells.....	115
4.4.2	Frequency-specific inhibitions by other interneurons.....	116
4.5	Partial prothoracic auditory network in <i>A. nigrovittata</i>	117

4.6	Auditory processing in <i>A. nigrovittata</i>	119
5	Summary	122
6	References	124
7	Appendix	141
