Contents

1 Introduction **1**

1.1 Contribution and Overview 4

2 Background **7**

2.1 Hidden-Surface Removal 7

2.1.1 View Transformations 8

2.1.2 Z-Buffer 9

2.1.3 Painter's Algorithm 10

2.2 Lighting and Shading 11

2.2.1 Radiometry 11

2.2.2 Reflectance Models 12

2.2.3 Light Sources 13

2.2.4 Shadows 15

2.3 Hardware-accelerated Rendering 18

2.3.1 Application 19

2.3.2 Geometry Stage 19

2.3.3 Rasterization Stage 22

2.3.4 Graphics Architectures 24

3 Overview of Shadow Techniques **27**

3.1 Classification of Shadow Techniques 27

3.1.1 Object-space vs. Image-space Shadow Computation . . . 27

3.1.2 Hard vs. Soft Shadows 28

3.1.3 Hardware-accelerated vs. Software-based Methods 29

3.2 A Review of Shadow Techniques 30

3.2.1 Shadow Rays 30

3.2.2 Geometric Analysis 30

3.2.3 Shadows on Planar Receivers 31

3.2.4 Shadow Maps 34

3.2.5 Shadow Volumes 40

I Advanced Shadow Mapping Techniques for Point Light Sources 47

4 Practical Shadow Mapping 49
4.1 Distribution of depth values 49
4.1.1 Second Depth Shadow Maps 51
4.1.2 How near, how far ? 52
4.2 Concentrating on the visible part 55
4.2.1 Axis aligned bounding rectangle 56
4.2.2 Optimal bounding rectangle 56
4.2.3 Examples 57
4.3 Discussion 60

5 Shadow Map Filtering 61
5.1 Hardware-based Percentage Closer Filtering 61
5.2 Fast PCF for Real-Time Applications 63
5.3 Results 65
5.4 Discussion 67

6 Dual-Paraboloid Shadow Mapping 69
6.1 Shadow Mapping for Hemispherical and Omnidirectional Light Sources 69
6.1.1 Theory of Paraboloid Mapping 71
6.1.2 Dual-Paraboloid Shadow Mapping 72
6.2 Implementation 74
6.2.1 Generation of Paraboloid Shadow Maps 74
6.2.2 Shadow Mapping with Paraboloid Shadow Maps 75
6.3 Results 77
6.4 Discussion 77

7 Extended Light Maps 81
7.1 Extended Light Maps 81
7.1.1 Shadow Channel 82
7.1.2 Light Channel 83
7.2 Results 85
7.3 Discussion 88

II Advanced Shadow Volumes Techniques for Point Light Sources 89

8 Shadow Volumes for Interactive Global Illumination 91
8.1 Motivation 92
8.2 Global Illumination 93
8.3 Direct Illumination 93
8.3.1 Goniometric Diagrams 94
8.4 Results 95

8.5 Discussion 97

9 Shadow Volumes on Programmable Graphics Hardware 99
9.1 Motivation 100
9.2 Silhouette Detection 101
9.3 Generation of Shadow Volumes 102
9.4 Implementation 103
9.5 Results 105
9.6 Discussion 106

III Soft Shadow Techniques 109

10 Soft Shadow Maps for Linear Lights 111
10.1 Soft Shadow Maps 112
10.1.1 Generating the Visibility Map 115
10.1.2 Linear Light Sources With More Samples 116
10.1.3 Extension to Area Light Sources 118
10.1.4 Soft Shadow Map Implementation 120
10.2 Results 120
10.3 Discussion 122

11 Single Sample Soft Shadows using Depth Maps 125
11.1 Single Sample Soft Shadows 125
11.2 A Sampling Based Approach 127
11.2.1 Handling of Hard Shadow Regions 131
11.3 Implementation 131
11.3.1 Generating the Input Data 131
11.3.2 Shadow Computation 133
11.3.3 Improvements 133
11.4 Results 135
11.5 Discussion 137

12 Conclusions, Summary, and Future Work 141
12.1 Conclusions 141
12.2 Summary 142
12.3 Future Work 144

Bibliography 147
