# **Characterisation of viruses of pepper (*Capsicum spp.*) and sweet potato (*Ipomoea batatas*) from Ethiopia**

Institut für Pflanzenkrankheiten  
der

Rheinischen Friedrich-Wilhelms- Universität Bonn

Characterisation of viruses of pepper (*Capsicum spp.*) and sweet potato  
(*Ipomoea batatas*) from Ethiopia

**Inaugural-Dissertation**  
zur  
Erlangung des Grades

Doktor der Agrarwissenschaften  
(Dr. agr.)  
der  
Hohen Landwirtschaftlichen Fakultät  
der  
Rheinischen Friedrich-Wilhelms- Universität  
zu Bonn

Vorgelegt am  
21 Januar 2004  
von  
**Tameru Alemu (B. Sc., M. Sc.)**  
aus  
Shewa, Äthiopien

<b>Table of Contents</b>	<b>Page</b>
List of abbreviations	I
Codes of Amino acids	III
List of virus names and acronyms	IV
List of tables and figures	V
<b>Introduction .....</b>	<b>1</b>
<b>1 The crop plant virus pathosystems .....</b>	<b>3</b>
1.1 <i>Capsicum</i> spp .....	3
1.2 Sweet potato ( <i>Ipomoea batatas</i> ) .....	5
1.3 An overview of potyviruses in general .....	7
1.4 Viruses as problems of pepper production .....	9
1.5 Potyviruses on pepper .....	9
1.6 Viruses as problems of sweet potato production .....	11
1.7 Potyviruses on sweet potato .....	13
<b>Materials and Methods .....</b>	<b>16</b>
<b>1 Survey of pepper and sweet potato infecting viruses .....</b>	<b>16</b>
1.1 Characteristics of the survey districts .....	17
1.2 Virus disease assessment in pepper .....	17
1.3 Collection of pepper leaf samples .....	18
1.4 Collection of sweet potato and wild <i>Ipomoea</i> samples .....	18
<b>2 Establishment and maintenance of samples .....</b>	<b>19</b>
2.1 Pepper samples and reference isolates .....	19
2.2 Samples of sweet potato cuttings .....	20
<b>3 Transmission of viruses and isolates .....</b>	<b>20</b>
3.1 Mechanical inoculation .....	20
3.2 Graft inoculation of sweet potato viruses .....	22
3.3 Evaluation of seed transmission of <i>Ethiopian pepper mottle virus</i> (EPMV) .....	23
3.4 Aphid transmission studies of EPMV isolates .....	25
3.5 Determination of weed reservoirs as hosts of EPMV and other viruses .....	24
<b>4 Evaluation of pepper lines for resistance to EPMV .....</b>	<b>24</b>
4.1 Virus isolate and its maintenance .....	24
4.2 Plant materials used and their cultivation .....	25
4.3 Inoculation of plants .....	25
4.4 Data collection and analysis .....	25

<b>5 Serology .....</b>	25
5.1 Double antibody sandwich ELISA (DAS) ELISA .....	26
5.2 Plate trapped antigen ELISA (PTA) ELISA .....	27
5.3 Triple antibody sandwich (TAS) ELISA.....	27
5.4 Nitrocellulose membrane (NCM) ELISA .....	28
5.5 Quantitative DAS-ELISA .....	29
5.6 Virus purification .....	29
5.7 Production of antiserum .....	30
5.8 Preparation of IgG .....	30
5.9 Labelling of IgG with alkaline phosphatase .....	31
<b>6 Electron microscopy .....</b>	31
6.1 Adsorption preparation .....	31
6.2 Immunosorbent electron microscopy (ISEM) .....	32
6.3 Decoration and decoration titre determination .....	32
6.4 Cytopathology of infected tissue .....	32
<b>7 Molecular cloning .....</b>	33
7.1 Extraction of total RNA from SPFMV infected leaves .....	33
7.2 Synthesis of complementary DNA cDNA) .....	34
7.3 Amplification of viral nucleic acids .....	34
7.4 Agarose gel electrophoresis .....	35
7.5 Purification of fragments and cloning to PGEM-T vector .....	36
7.6 Transformation into <i>Escherichia coli</i> .....	36
7.7 Identification of insert-containing clone .....	37
7.8 Extraction of plasmid DNA from <i>E. coli</i> .....	37
7.9 Sequencing and sequence analysis .....	38
7.10 RNA extraction from SPVG infected leaves, RT-PCR and PCR .....	39
7.11 Purification, cloning and transformation of DNA products .....	39
7.12 Sequencing and sequence analysis of SPVG isolates .....	40
<b>Results .....</b>	41
<b>1 Incidence, diversity and distribution of pepper infecting viruses .....</b>	41
1.1 Relevance of viral infection to farmers .....	41
1.2 Symptoms and incidences of viral diseases in pepper fields .....	41
1.3 Diversity and incidence of viruses in collected samples .....	44
1.4 Distribution and prevalence of pepper viruses .....	46

<b>2 Biological and serological variability of EPMV .....</b>	48
2.1 Indicator hosts reactions .....	48
2.2 Symptoms reactions of pepper lines .....	51
2.3 Cytopathology of EPMV .....	52
2.4 Serological variability .....	54
2.4.1 Purification of EPMV and production of antiserum .....	54
2.4.2 DAS-ELISA experiment .....	56
2.4.3 Decoration titer experiment .....	56
<b>3 Studies on transmission properties of EPMV .....</b>	58
3.1 Growth out test of field collected seeds .....	58
3.2 Evaluation of seed transmission in successive generations .....	58
3.3 Effect of virus EPMV infection on seed germination .....	59
3.4 Aphid transmission tests .....	60
3.5 Roles of wild hosts as reservoirs of EPMV .....	60
<b>4 Identification of sources with resistance in pepper lines against EPMV .....</b>	62
4.1 Evaluation of pepper lines based on phenotypic expressions .....	63
4.2 Evaluation based on concentration of EPMV .....	64
<b>5 Identity and incidence of sweet potato viruses in southern Ethiopia .....</b>	65
5.1 Symptoms of sweet potato viruses in the field .....	67
5.2 Identification of viruses .....	67
5.3 Incidence of SPFMV in relation of cultivars .....	68
5.4 Incidence of SPFMV in relation to sources of cuttings .....	69
<b>6 Characterisation of SPFMV isolates .....</b>	70
6.1 Biological characterization .....	70
6.2 Serological detection of SPFMV isolates .....	72
6.3 Molecular characterization .....	73
<b>7 Biological and molecular characterisation of SPVG .....</b>	79
7.1 Biological characterization .....	79
7.2 Molecular characterization .....	80
<b>Discussion .....</b>	86
<b>Conclusion and recommendation.....</b>	99
<b>References .....</b>	101
<b>Curriculum vitae .....</b>	125
<b>Acknowledgement .....</b>	126
