<b>1. Preface</b>	<b>1</b>
1.1 Introduction	1
1.2 Overview of the thesis	3
<b>2. Neural Networks (NNs) as automatic classifiers</b>	<b>5</b>
2.1 Definition and principles of NNs	5
2.1.1 History and potential applications of NNs	5
2.1.2 Common principles	6
2.1.3 Learning types and strategies	8
2.2 Neural Network categorization	10
2.3 Neural Network examples	12
2.3.1 Competitive Learning (CL)	12
2.3.2 Multilayer Perceptron (MLP)	13
2.3.3 Radial Basis Function (RBF) network	13
2.3.4 Self-Organizing Map (SOM) and Learning Vector Quantizer (LVQ)	14
2.3.5 Counterpropagation (CP)	15
2.3.6 Adaptive Resonance Theory (ART)	15
2.4 Requirements for an automatic classifier	16
2.4.1 Properties critical for automation	16
2.4.2 Advantageous functional properties	18
2.5 Analysis of NN potential for automatic classification	20
<b>3. ART Fuzzy Network (ARTFN) background</b>	<b>23</b>
3.1 ART essentials	23
3.1.1 Overview	23
3.1.2 Neural dynamics	25
3.1.2.1 STM equations	25
3.1.2.2 LTM equations (instar and outstar modules)	26
3.1.3 Simple neural architectures	27
3.1.3.1 On-center off-surround shunting fields	28
3.1.3.2 Competitive Learning (CL) network	30
3.1.3.3 Instar-outstar mapping network	31
3.1.4 ART architecture	32
3.2 ARTMAP	34
3.3 ART networks for analog inputs	38
3.4 Neuro-fuzzy hybridization	39
3.4.1 Fuzzy set theory and fuzzy logic	39
3.4.2 Fuzzy Systems (FSs)	41
3.4.3 Neuro-Fuzzy Systems (NFSs)	41
<b>4. ARTFNs: state-of-the-art</b>	<b>45</b>
4.1 ARTFNs	45

4.1.1	Fuzzy ART	45
4.1.1.1	<i>Geometrical interpretation</i>	46
4.1.2	Fuzzy ARTMAP (FAM)	48
4.1.2.1	<i>A classification example for FAM</i>	50
4.1.3	Fuzzy Min-Max Network (FMMN)	53
4.1.4	Properties of ARTFNs and related models	55
4.2	Problems of ARTFNs	56
4.2.1	Sensitivity to ordering of training patterns	56
4.2.2	Category proliferation problem	57
4.2.3	Tuning the hyperbox size threshold	58
4.3	Existing solutions	59
4.3.1	Voting strategy	59
4.3.2	Ordering algorithm	60
4.3.3	Modified learning algorithm	60
4.3.4	Adaptive resolution min-max classifier	60
4.3.5	Modified choice function	61
4.3.6	Algorithms with hyperellipsoid prototypes	61
4.3.6.1	<i>Gaussian ART/ARTMAP</i>	61
4.3.6.2	<i>Ellipsoid ART/ARTMAP</i>	62
4.3.7	Models for distributed coding: dART, dARTMAP	63
4.3.8	Modifications of FAM using probabilistic information	64
4.3.8.1	<i>PROBART</i>	65
4.3.8.2	<i>Boosted ARTMAP</i>	65
4.3.8.3	<i><math>\mu</math>ARTMAP</i>	66
4.3.9	Slow learning in the Map Field	67
4.3.10	Category pruning	67
4.3.11	General Fuzzy Min-Max Network (GFMM)	68
4.4	Motivation behind AFC	69
4.5	Summary	73
<b>5.</b>	<b>ART-based Fuzzy Classifiers (AFCs)</b>	<b>75</b>
5.1	Design methodology for AFC	75
5.1.1	Common principles	75
5.1.2	Cluster prototype shape	76
5.1.3	Choice functions (CFs)	78
5.1.3.1	<i>Desirable properties of an ARTFN choice function</i>	78
5.1.3.2	<i>FAM choice functions</i>	80
5.1.3.3	<i>FMMN choice functions</i>	83
5.1.3.4	<i>Alternative choice functions</i>	85
5.1.3.5	<i>Comparison of choice functions</i>	88
5.1.4	Match criteria	90
5.1.5	Prototype overlap	91
5.1.5.1	<i>Prototype overlap in FAM</i>	92
5.1.5.2	<i>Prototype overlap in FMMN</i>	94
5.1.5.3	<i>Discussion</i>	96
5.2	Solving the ARTFN problems	97
5.2.1	Category proliferation	97
5.2.2	Automatic parameter tuning	100
5.2.3	AFC and AFCA building blocks	101
