

Table of contents

	Page
A. Introduction	1
1. Strawberry plant	1
1.1. Origin	1
1.2. Nutritional value	1
1.3. World production	2
2. Salinity	3
2.1. Sources of salinity	3
2.2. Salinity measurements	5
2.3. Salinity due to sodium chloride	6
2.4. Biological stress	7
2.5. Effects of salt on plants	7
2.5.1. Osmotic stress	8
2.5.2. Nutrient deficiency	9
2.5.3. Ion toxicity	10
2.6. Responses of plant to salt stress	11
3. Objectives	12
References	14
B. Differences in NaCl stress tolerance of strawberry cvs ‘Elsanta’ and ‘Korona’:	
Growth analysis	
1. Introduction	21
2. Materials and methods	22
2.1. Plant material and growth conditions	22
2.2. Treatments	22
2.3. Measurements	23
2.4. Statistical analysis	24
3. Results	24
3.1. Visual appearances	24
3.2. Growth analysis	26
3.2.1. Leaf growth	26
3.2.2. Net assimilation rate and relative growth rate	28

3.2.3. Dry weight	29
3.2.4. Rate of dry matter production	30
3.2.5. Dry weight ratio	31
3.2.6. Relative water content	34
4. Discussion	35
4.1. Visual appearance	35
4.2. Growth analysis	35
5. Summary	37
References	38

C. Differences in NaCl stress tolerance of strawberry cvs ‘Elsanta’ and ‘Korona’:

Leaf gas exchange

1. Introduction	42
2. Materials and methods	43
2.1. Plant material and growth conditions	43
2.2. Treatments	43
2.3. Measurements	43
2.3.1. Gas exchange measurements	43
2.3.2. Chlorophyll fluorescence measurements of intact leaves	44
2.3.3. Chlorophyll and carotenoid analyses	45
2.3.4. Leaf sodium and chloride contents	45
2.3.5. Leaf water potential and cell sap osmotic potential	46
2.3.6. Leaf disc experiments	46
2.4. Statistical analysis	47
3. Results	47
3.1. Leaf gas exchange of intact fully expanded leaves	47
3.2. Chlorophyll fluorescence of intact leaves	50
3.3. Chlorophyll and carotenoid contents	51
3.4. Leaf sodium and chloride contents	52
3.5. Leaf water potential and cell sap osmotic potential	53
3.6. Leaf disc experiments	54
3.6.1. Visual appearances	54
3.6.2. Chlorophyll fluorescence of PEG and NaCl stressed leaf discs	54
4. Discussion	56

5. Summary	59
References	59

D. Differences in NaCl stress tolerance of strawberry cvs ‘Elsanta’ and ‘Korona’:

Macronutrients and carbohydrates

1. Introduction	62
2. Materials and methods	63
2.1. Plant material, growth conditions and treatments	63
2.2. Mineral analyses	63
2.3. Analyses of carbohydrates	64
2.4. Statistical analysis	65
3. Results	65
3.1. Mineral contents	65
3.2. Carbohydrate contents	72
4. Discussion	79
5. Summary	82
References	83

E. Differences in NaCl stress tolerance of strawberry cvs ‘Elsanta’ and ‘Korona’:

Fruit yield and quality

1. Introduction	86
2. Materials and methods	87
2.1. Plant material, growing conditions and treatments	87
2.2. Storage conditions	87
2.3. Measurements	87
2.3.1. Fruit yield	87
2.3.2. Fruit quality	88
2.3.2.1. Fruit colour	88
2.3.2.2. calyx colour	88
2.3.2.3. pH, total soluble solids and titratable acids	88
2.3.2.4. Sensory test	89
2.3.3. Analyses of carbohydrates	89
2.3.4. Mineral analyses	89
2.4. Statistical analysis	89

3. Results	89
3.1. Fruit yield	89
3.2. Fruit quality	91
3.2.1. Fruit colour	91
3.2.2. Calyx colour	95
3.2.2.1. Visual observations	95
3.2.2.2. Chlorophyll fluorescence	95
3.2.3. Carbohydrate contents	96
3.2.4. pH, total soluble solids and titratable acids	98
3.2.5. Sensory test	98
3.3. Mineral contents	99
4. Discussion	101
4.1. Fruit yield	101
4.2. Fruit quality	101
4.3. Mineral contents	103
5. Summary	103
References	104
F. Summary and conclusions	107
