

W. Lestari (Autor)

The fish community of a tropical organically polluted river: a case study of the Logawa River, Central Java, Indonesia

*The fish community of a tropical organically
polluted river:*

*a case study of the Logawa River, Central Java,
Indonesia*

W. Lestari

	page
1. Introduction	
1.1 General introduction	1
1.2 General condition in tropical rivers	2
1.3 Tropical freshwater fish species	3
1.4 Organic pollution in rivers	4
2. Background and objectives	
2.1 Background	6
2.2 Hypotheses and questions	7
2.2.1 Hypotheses	7
2.2.2 Questions	8
2.3 Principal objectives	8
3. Study area	
3.1 The Logawa River and its tributaries	9
3.2 Study sites along the Logawa River and its tributaries	11
3.3 Research period	15
4. Research methods	
4.1 Measured parameters	17
4.2 Environmental parameters	17
4.3 Biological parameters	19
4.4 Data analysis	21
4.4.1 General description	21
4.4.2 Longitudinal change in river properties	21
4.4.3 Impact of land use types on water quality	22
4.4.4 Differences in fish abundance between types of land use	22
4.4.5 Differences in fish diversity and similarity between types of land use	23
4.4.6 The impact of water quality changes on fish community	25
5. Results	
5.1 General description of the Logawa River and its tributaries	26
5.2 Longitudinal change in the river properties	31
5.3 Impact of land use types on water quality	38
5.3.1 Land use types in upper stream section	39
5.3.2 Land use types in middle stream section	40
5.3.3 Land use types in down stream section	43
5.4 Comparison of fish sampling methods	44
5.5 Impact of land use types on species abundance of fish	48
5.5.1 General patterns	48
5.5.2 Species abundance	50

5.6	Impact of land use types on fish diversity	54
5.6.1	Fish diversity	54
5.6.2	Similarity	59
5.7	Impact of water quality changes on fish community	61
6.	Discussion	
6.1	The Logawa River and its environmental problems	65
6.1.1	Water quality changes	65
6.1.2	Longitudinal changes	66
6.1.3	Land use types	68
6.2	The fish community of the Logawa river and its tributaries	70
6.2.1	Fish community changes	70
6.2.2	Species abundance	73
6.2.2.1	Turnover of dominant fish species	73
6.2.2.2	Efficiency of sampling methods	75
6.2.3	Diversity and similarity of fish community	76
6.2.4	Fish community responses	77
6.3	Sustainable management of the Logawa River	79
	Summary	82
	References	86
	Appendix 5.5.1	
	Appendix 5.5.2	
	Appendix 5.5.3	
	Appendix 5.7.1
