

Contents

Abbreviations and symbols	iv
Introduction	1
1 Basics of <i>in vivo</i> ^1H MRS	5
1.1 Bloch equation and relaxation	5
1.2 Chemical shifts and spin-spin coupling	7
1.3 Localized NMR	9
1.3.1 Principle of localization	10
1.3.2 Selective excitation	11
1.3.3 Slice selection	12
1.3.4 Point resolved spectroscopy (PRESS)	13
1.4 Proton MR spectroscopy	15
2 Quantification of MR spectroscopy	21
2.1 Introduction	21
2.2 Spectral preprocessing	22
2.2.1 Windowing and filtering	22
2.2.3 Lineshape correction and transform	22
2.2.4 Phase correction	23
2.2.5 Baseline correction	24
2.3 Quantification strategies	25
2.3.1 External standard	25
2.3.2 Internal standard	26
2.4 Quantification methods	27
2.4.1 Time domain and frequency domain	27
2.4.2 Frequency domain methods	29
2.4.3 Time domain methods	32

2.5 Literature values of metabolite concentrations	36
3 Quantification of ^1H MRS without water suppression	39
3.1 Introduction	39
3.1.1 Dynamic range problems	39
3.1.2 Motivation	40
3.1.3 Problems associated with <i>in vivo</i> ^1H MRS	42
3.2 Matrix Pencil Method based spectral fitting	44
3.2.1 Introduction	44
3.2.2 Implementation of MPM	45
3.2.3 Matrix Pencil Method based spectral fitting	46
3.2.4 Quantification strategies	51
3.2.5 Monte Carlo studies	51
3.2.6 Phantom and <i>in vivo</i> experiments	54
3.2.7 Discussion	58
3.3 Experimental method to eliminate first order phase errors	59
3.4 Experimental elimination of frequency modulation sidebands	61
3.4.1 Introduction	61
3.4.2 Refocusing gradients	63
3.4.3 Gradient strength/orientation dependencies of FM sidebands	67
3.4.4 Optimization	68
3.5 Spectral Simulation	75
3.5.1 GAMMA library	76
3.5.2 Prior knowledge and spectral simulation	76
3.5.3 Examples	78
3.5.4 Discussion	81
3.6 Baseline Characterization by Wavelet Transformation	82

3.6.1 Wavelet transform	83
3.6.2 Wavelet denoising	85
3.6.3 Wavelet baseline characterization	86
3.7 Time domain non-linear least squares spectral fitting	91
3.7.1 Time domain model function	91
3.7.2 Non-linear least squares fitting	93
3.7.3 Implementation	93
3.7.4 Monte Carlo studies	95
3.7.5 Phantom experiment	107
3.7.6 <i>In vivo</i> experiment	110
3.7.7 Comparisons with other methods	121
4 Summary	125
4.1 Discussions	125
4.2 Outlook	128
References	129
