

Christina A. Bormann (Autor)

Genetic and molecular analysis of quantitative and qualitative late blight resistance in tetraploid potato

**Genetic and molecular analysis of
quantitative and qualitative late blight
resistance in tetraploid potato**

Christina Angelika Bormann

Table of contents

Abbreviations

Chapter 1 • Introduction.....	1
1.1 The potato.....	1
1.2 <i>Phytophthora infestans</i> Mont.: the cause of late blight.....	4
1.3 Disease resistance.....	8
1.3.1 Disease resistance in plants.....	8
1.3.2 Disease resistance in potato.....	13
1.4 Breeding for late blight resistance.....	18
1.5 DNA markers.....	20
Goal of this study.....	21
Chapter 2 • Material and Methods.....	22
2.1 Chemicals, enzymes, and oligonucleotides.....	22
2.2 Frequently used buffers, solutions, and media.....	22
2.3 Plant material.....	23
2.4 Generation of transgenic T ₁ populations.....	24
2.5 Cultivation of <i>Phytophthora infestans</i>	25
2.6 Assessment of phenotypic traits.....	26
2.6.1 Field assessment of late blight and maturity.....	26
2.6.2 Detached leaf assay.....	28
2.7 Molecular biology methods.....	29
2.7.1 Isolation of total genomic DNA.....	29
2.7.2 Plasmid and BAC purification.....	31
2.7.3 Polymerase-chain-reaction (PCR) based analysis.....	31
2.7.4 Cloning of PCR products.....	34
2.7.5 Sequencing and sequence analysis.....	34

2.8 Fluorescence <i>in-situ</i> hybridization (FISH).....	35
2.9 Statistical analysis.....	37
Chapter 3 • Results.....	40
3.1 QTL analysis for quantitative late blight resistance.....	40
3.1.1 Phenotypic data (field experiments).....	40
3.1.1.1 Maturity.....	41
3.1.1.2 Late blight resistance: Area under disease progress curve (AUDPC).....	43
3.1.1.3 Correlation between maturity and rel. AUDPC.....	47
3.1.1.4 Late blight resistance: maturity corrected resistance.....	51
3.1.2 Genotyping of Escort x Leyla and Nikita x Leyla with PCR markers.....	53
3.1.2.1 Mapping of SSCP-marker P450.....	54
3.1.2.2 Determination of segregation.....	54
3.1.2.3 QTL analysis for maturity and late blight resistance.....	58
3.1.3 Interactions between pairs of marker alleles.....	62
3.1.4 Development of allele specific oligonucleotides (ASO).....	64
3.2 Marker assisted selection (MAS) for quantitative late blight resistance.....	68
3.2.1 MAS with Escort x Leyla and Nikita x Granola.....	68
3.2.2 A model for MAS using multiple linear regression.....	71
3.3 Characterization of <i>R1</i> transgenic T ₀ and T ₁ lines.....	75
3.3.1 <i>R1</i> complementation with T ₀ lines.....	75
3.3.2 T ₁ lines.....	76
3.3.2.1 Crossing of T ₀ lines.....	76
3.3.2.2 Genotypic characterization of T ₁ lines.....	77
3.3.2.3 Phenotypic characterization of T ₁ lines.....	78
3.3.2.4 Fluorescence <i>in-situ</i> hybridization (FISH) of parental transgenic lines (T ₀).....	81
Chapter 4 • Discussion.....	83
4.1 QTL analysis for quantitative late blight resistance.....	83
4.1.1 Phenotypic data (field experiments).....	83

4.1.2 Genotyping of Escort x Leyla and Nikita x Leyla with PCR markers.....	85
4.2 Marker assisted selection (MAS) for quantitative late blight resistance.....	95
4.2.1 MAS in the Escort x Leyla and Nikita x Granola populations.....	95
4.2.2 A model for MAS using multiple linear regression.....	96
4.3 Outlook for application of markers in late blight resistance breeding.....	97
4.4 Characterization of <i>R1</i> transgenic T ₀ and T ₁ lines.....	98
Summary.....	101
Zusammenfassung (German summary).....	103
Literature.....	105
A. Books and journals.....	105
B. Internet pages.....	114
C. Publications from this Dissertation.....	115
Appendix.....	i
Table A. List of primer pairs used for QTL analysis.....	ii
Table B. List of new designed ASO.....	v
Table C. Segregation ratios of markers that did not show an effect on late blight resistance or maturity.....	vi
Sequence alignments for ASO design:	
∅ Sequence a: 57T3.....	viii
∅ Sequence b: 683.....	ix
∅ Sequence c: NL27.....	x
∅ Sequence d : GP34.....	xiii
Table D: T ₁ lines.....	xv
