Table of Contents

Acknowledgments..... **i**

Acronyms and Abbreviations **vi**

1 Introduction

1.1	Forest and land degradation in Ethiopia.....	1
1.2	Development challenges in the Tigray Region	2
1.3	Rationale to study the ecology and management of dry forests in Ethiopia	4
1.4	Objectives of the study.....	10

2 *Boswellia papyrifera* and its frankincense in Ethiopia

2.1	<i>Boswellia papyrifera</i> : description and ecological distribution.....	11
2.2	Important uses of <i>Boswellia papyrifera</i>	14
2.3	Frankincense: its history and trade.....	15
2.4	Uses of frankincense in the international market.....	18
2.5	Economic importance of frankincense in Ethiopia	20
2.6	Tapping and grading of frankincense.....	23
2.7	Important issues and ecological concerns	28

3 Materials and methods

3.1	Description of the study areas	31
3.2	Study Methodology	35

4 Structure and floristic composition

4.1	Species-area relationships	50
4.2	Floristic composition of trees (Comp. A)	52
4.3	Floristic composition of small trees and shrubs (Comp. B).....	58
4.4	Floristic composition of saplings (Comp. C)	61
4.5	Impacts of closed areas on abundance and floristic composition	64

5 Stand structural analysis

5.1	Sampling error.....	73
5.2	Stem diameter size distribution	74
5.3	Total tree height distribution and non-linear estimators	82
5.4	Stem diameter and crown diameter.....	88
5.5	Tree volume	94
5.6	Vertical structure.....	95
5.7	Tree crown exposure	99

6 Natural regeneration of *Boswellia papyrifera*

6.1	Regeneration pattern	101
6.2	Spatial distribution in relation to mature trees	104
6.3	Mortality.....	109

7 Plant water potential of tree species and sites

7.1	Water potentials of dominant tree species	112
7.2	Comparison among species.....	114
7.3	Recovery from day time water stress	117
7.4	Characterisation of sites	121

8 Plant osmotic potential of tree species and sites

8.1	Osmotic potentials of dominant tree species.....	124
8.2	Comparison among species.....	125
8.3	Performance of species	126
8.4	Characterisation of sites	131

9 Soil and vegetation relationships

9.1	General soil properties	133
9.2	The effect of the use of closed areas on soil properties	135
9.3	Soil vertical gradient	137
9.4	Soil and vegetation structure.....	139

10 General discussion and conclusions

10.1	<i>Boswellia papyrifera</i> – its status and prospects	141
10.2	Research on dry forest ecology.....	142
10.3	Forest rehabilitation through closed areas	144
10.4	Enhancement of the rehabilitation process	147
10.5	Management planning.....	148
10.6	Conclusions.....	149
10.7	Recommendations.....	150

11 Summary	152
-------------------------	------------

12 Zusammenfassung.....	158
--------------------------------	------------

13 References	165
