

TABLE OF CONTENTS

1	INTRODUCTION	1
2	STATE OF KNOWLEDGE	2
2.1	Nitrogen along succession and in primary forests	2
2.2	Biological nitrogen fixation (BNF)	2
2.2.1	Legume BNF	2
2.2.2	Non-legume BNF	3
2.3	Factors regulating legume BNF	4
2.4	BNF along succession and in primary forests	5
2.5	The ¹⁵ N natural abundance method	6
2.5.1	General considerations	6
2.5.2	Factors affecting the $\delta^{15}\text{N}$ -signal	7
2.6	Summary of knowledge	8
3	RESEARCH STRATEGY	10
4	MATERIALS AND METHODS	11
4.1	Study area	11
4.2	Study sites	13
4.3	Species inventory	15
4.3.1	Plant mapping	15
4.3.2	Leguminosae and ‘legume functional groups’	16
4.3.3	Selected non-legume species	17
4.4	Sampling scheme	18
4.4.1	Leaf sampling	18
4.4.2	Plot-based sampling	19
4.5	Quantification of phytomass	20
4.5.1	Allometric phytomass estimation	20
4.5.2	Destructive phytomass measurement	21
4.6	Sample processing and analyses	22
4.6.1	Sample processing	22
4.6.2	Chemical analyses	23
4.6.3	‘Plant-available’ topsoil $\delta^{15}\text{N}$ -signal	24
4.7	Estimation of biologically fixed nitrogen	25
4.8	Statistics	26
4.9	Sources of error	28
4.9.1	False time-series approach and the constancy assumption	28
4.9.2	Adequacy of the plot-based sampling scheme	30
4.9.3	Vegetation components not covered	32

5 RESULTS	35
5.1 General vegetation characteristics	35
5.1.1 Total aboveground phytomass	35
5.1.2 Non-tree phytomass components along succession	37
5.1.3 Important pioneer tree species and genera	39
5.1.4 Number of shoots per plant	41
5.1.5 Plant size distribution along succession	42
5.1.6 Summary and conclusions	46
5.2 Legume vegetation	47
5.2.1 Legume vegetation share along succession	47
5.2.2 Legume nodulation capacity and growth forms	48
5.2.3 Legume genera and species	51
5.2.4 Exceptional terra morena site	53
5.2.5 Summary and conclusions	55
5.3 Spatial organization of legume vegetation	56
5.3.1 Distribution patterns of potentially N ₂ -fixing legumes	56
5.3.2 Distribution patterns at different levels of species aggregation	61
5.3.3 Summary and conclusions	67
5.4 Legume - vegetation interactions	67
5.4.1 Impact of potential N ₂ -fixers on vegetation phytomass	68
5.4.2 Influence of growth form	69
5.4.3 Summary and conclusions	71
5.5 Soil nitrogen pools	71
5.5.1 Leaf litter nitrogen along succession	72
5.5.2 Factors influencing leaf litter nitrogen	74
5.5.3 Topsoil 'plant-available' nitrogen	76
5.5.4 Summary and conclusions	77
5.6 Nitrogen in the leaves	78
5.6.1 Differences between species and functional groups of species	79
5.6.2 Foliar nitrogen along succession	82
5.6.3 Impact of the individual plant size on foliar δ ¹⁵ N-signals	84
5.6.4 Summary and conclusions	86
5.7 Evaluation of the ¹⁵ N natural abundance method	87
5.7.1 Differences between reference categories	87
5.7.2 Effect of reference plant pairing method	92
5.7.3 Summary and conclusions	94
5.8 Spatial distribution of BNF	96
5.8.1 Spatial distribution of δ ¹⁵ N-signals and of %Ndfa-estimates	96
5.8.2 Causes and consequences of irregular BNF distribution	102
5.8.3 Summary and conclusions	109

6 DISCUSSION	110
6.1 Rapid regrowth and the sustainability of slash-and-burn	110
6.2 Legume composition as an indicator of BNF	112
6.3 Potentially N ₂ -fixing lianas: a key functional group?	113
6.4 Spatial patterns of legumes and of BNF	115
6.5 Validity of the ¹⁵ N natural abundance method for BNF-estimation	116
6.6 The ‘δ ¹⁵ N dilution problem’	117
6.7 BNF along succession	119
6.8 Do primary forests fix nitrogen?	120
7 CONCLUSIONS	122
8 REFERENCES	123

List of Appendices

Appendix 1 The 25 study sites	138
Appendix 2 List of legume species	139
Appendix 3 Systematic foliar sampling-scheme: exemplary maps	144
Appendix 4 Structural characteristics of four pioneer trees along succession	147
Appendix 5 Species composition of the two main legume genera	148
Appendix 6 Spatial distribution of potentially N ₂ -fixing vegetation	149
Appendix 7 Plant distribution patterns of non-legume pioneer tree species	154
Appendix 8 Foliar δ ¹⁵ N-signals of five functional groups of plants in 19 sites	157
Appendix 9 N ₂ -fixer’s nitrogen on 19 analyzed sites, impact of plant size	160
Appendix 10 Foliar nitrogen of pot. N ₂ -fixing species, impact of plant size	161
Appendix 11 Percentage of negative %Ndfa-estimates	162
Appendix 12 Interpolated %Ndfa-estimates of selected sites	163
