1	Introduction	1
1.1	Prosthetic heart valves.....	1
1.1.1	Mechanical heart valve	1
1.1.2	Prosthetic tissue valve	3
1.2	Cell adhesion.....	8
1.2.1	Cell surface.....	8
1.2.2	Integrins – transmembrane receptors	9
1.2.3	ECM (Extracellular Matrix).....	11
1.2.4	Cell adhesion to polymer surfaces	13
1.3	Photochemical coupling for biomaterial surface modification	16
2	Goal of this work	20
3	Synthesis and Characterization.....	23
3.1	Synthesis of the benzophenone silane.....	23
3.1.1	Synthesis of 4-Allyloxybenzophenone	23
3.1.2	Synthesis of 4-(3'-Chlorodimethylsilyl)propyloxybenzophenone (BP-silane)	24
3.2	Immobilization of BP-silane on SiO _x surfaces.....	26
3.3	Synthesis of hydrophilic polymers.....	27
3.4	Monomer synthesis and characterization.....	29
3.4.1	Synthesis of (4-benzoyl-phenyl)-methacrylester (BPME).....	29
3.4.2	Synthesis of N-(4-benzoyl-phenyl)-methacrylamide (BPMA).....	30
3.4.3	Synthesis of 4-benzoyl-benzoyl chloride (BBC)	32
3.4.4	Synthesis of <i>N</i> -acryloyl amino caproic acid oxy succinimide ester.....	32
3.5	Synthesis of benzophenone-containing polymers	35
3.5.1	Synthesis of photocrosslinkable polymers via free radical polymerization	35
3.5.2	Polymers by polymer modification strategy	36
3.6	Synthesis of functional terpolymers.....	42
4	Monolayers as model surfaces for <i>in vitro</i> cell adhesion	46

4.1	Introduction	46
4.2	Preparation of polymer monolayers	47
4.2.1	Preparation of benzophenone monolayers on SiO _x surfaces.....	47
4.2.2	Preparation of polymer monolayers onto the benzophenone-immobilized surfaces.....	51
4.3	Properties of the polymer monolayers	56
4.3.1	Properties of the polymers used for monolayer formation and <i>in vitro</i> testing	56
4.3.2	Properties of the polymer monolayers for <i>in vitro</i> cell adhesion tests	58
4.3.3	<i>In vitro</i> cell adhesion tests with polymer monolayers.....	68
5	Surface-attached hydrogels	74
5.1	Introduction	74
5.1.1	General remarks on the formation of polymer networks	74
5.1.2	The aim of this chapter.....	75
5.1.3	Properties of the polymer precursors used for network formation and <i>in vitro</i> testing.....	78
5.2	Investigation of the crosslinking process	82
5.2.1	Preparation of model polymer network surfaces.....	82
5.2.2	Investigation of the film formation process	87
5.3	Investigation of the hydrophilicity and the swelling behavior of the surface-attached hydrogels.....	97
5.3.1	Contact angles measurements	97
5.3.2	Swelling behavior.....	99
5.4	<i>In vitro</i> cell adhesion test on polymer networks	114
5.5	Networks on genuine tissue heart valves	117
6	Surface-attached hydrogels containing moieties which promote cell adhesion	118
6.1	Introduction	118
6.2	Properties of functional network polymers	119
6.2.1	Preparation of surface-attached functional networks.....	119
6.2.2	Properties of surface-attached functional networks	127

6.2.3	Synthesis of surface-attached functional networks containing cell adhesion promoter molecules	128
7	Experimental section	133
7.1	Reagents and solvents	133
7.2	Synthesis of the benzophenone silane.....	135
7.2.1	Synthesis of 4-Allyloxybenzophenone	135
7.2.2	Synthesis of 4-(3'-Chlorodimethylsilyl)propyloxybenzophenone (BP-silane)	135
7.3	Immobilization of benzophenone monolayers on SiO _x surfaces	136
7.4	Preparation of hydrophilic polymers for monolayers	136
7.5	Synthesis of the monomers	138
7.5.1	Synthesis of N-(4-benzoyl-phenyl)-methacrylester (BPME).....	138
7.5.2	Synthesis of N-(4-benzoyl-phenyl)-methacrylamide (BPMA)	139
7.5.3	Synthesis of 4-benzoyl-benzoyl chloride (BBC)	139
7.5.4	Synthesis of <i>N</i> -acryloyl amino caproic acid oxy succinimide ester.....	140
7.5.4.1	Synthesis of 6-acryloylamino-hexanoic acid.....	140
7.5.4.2	Synthesis of <i>N</i> -acryloyl amino caproic acid oxy succinimide ester ..	140
7.6	Synthesis of benzophenone-containing polymers	141
7.6.1	Free radical copolymerization.....	141
7.6.2	Synthesis of modified PEtOx (polyethyloxazoline).....	145
7.6.2.1	Partial hydrolysis of PEtOx	145
7.6.2.2	Preparation of LPEI by total hydrolysis of PEtOx.....	145
7.6.2.3	Preparation of hPEtOx-BP	146
7.7	Synthesis of functional terpolymers.....	146
7.7.1	Preparation of PNIPAAm-AE-BP.....	146
7.7.2	Preparation of PMTA-AE-BP	147
7.8	Instruments	148
8	Summary	151
9	References	153
