LIST OF TABLES		**v**
LIST OF FIGURES		**vi**
LIST OF APPENDICES		**viii**
LIST OF ABBREVIATIONS		**ix**
1.	**INTRODUCTION**	**1**
2.	**LITERATURE REVIEW**	**4**
2.1.	Chlorocholine chloride (CCC) properties	4
2.2.	Metabolism and effects of CCC on plants	7
2.2.1.	Metabolism and conversion of CCC in plants	7
2.2.2.	CCC function in the biosynthesis of phytohormones	11
2.2.3.	Effect and accumulation of CCC in plants	14
2.2.3.1.	Effect of CCC on organs	14
2.2.3.2.	Effect of CCC on plant yield	17
2.2.3.3.	Other CCC effects on plants	18
2.2.3.4.	Residual accumulation of CCC in plants and plant products	18
2.3.	Metabolism and effects of CCC in animals	19
2.3.1.	Metabolism and conversion of CCC in animals	19
2.3.2.	Effects and accumulation of CCC in animals	27
2.3.2.1.	Effects of CCC on animal performance	27
2.3.2.2.	Effects of CCC on animal reproduction and fertility	27
2.3.2.3.	Effects of CCC on animal health	28
2.3.2.4.	Effects of CCC on animal organs	30
2.3.2.5.	Other effects of CCC on animals	31
2.3.2.6.	Accumulation of CCC residues in animals and animal products	31
2.4.	Degradation and fragmentation model of CCC in chromatography detection	32
2.5.	Using stable isotope labelling in CCC studies	36
2.6.	Determination of CCC residues	37
2.6.1.	Methods utilised to determine residual CCC	37

2.6.1.1. Thin layer chromatography 37
2.6.1.2. High performance liquid chromatography 39
2.6.1.3. Gas chromatography 40
2.6.1.4. Liquid chromatography 41
2.6.1.5. Other chromatographic methods 44
2.6.2. Extraction, isolation and determination of CCC by several methods 45

3. STUDY I. DISTRIBUTION AND ACCUMULATION OF CHLOROCHOLINE CHLORIDE (CCC) RESIDUES IN TISSUES OF LAYING HENS FED DIETS WITH VARYING LEVELS OF ^{15}N-CCC 46
3.1. Objectives 46
3.2. Materials and methods 46
3.2.1. Animals and housing 46
3.2.2. Feed and feeding procedures 46
3.2.3. Sample collection and preparation 48
3.2.4. ^{15}N abundance determination 48
3.2.5. Statistical analysis 52
3.3. Results 52
3.3.1. The δ^{15}N and At%^{15}N values in diets containing varying levels of ^{15}N-CCC 52
3.3.2. Effect of dietary ^{15}N-CCC for eleven days on δ^{15}N excess (δ^{15}N-ex) and atom percentage excess ^{15}N (APE) 53
3.3.2.1. δ^{15}N excess (δ^{15}N-ex) 53
3.3.2.2. Atom percentage excess ^{15}N (APE) 54
3.3.3. δ^{15}N excess (δ^{15}N-ex) and Atom percentage excess ^{15}N (APE) seven days after ^{15}N-CCC treatment withdrawal 55
3.3.3.1. ^{15}N excess (δ^{15}N-ex) 55
3.3.3.2. Atom percentage excess ^{15}N (APE) 56
3.3.4. Estimation of CCC and/or CCC metabolite product residues in laying hen tissues 57
3.4. Discussion 58

3.4.1. $\delta^{15}N$ and atom percentage $\%^{15}N$ ($At\%^{15}N$) in treatment diets 60
3.4.2. Effect of dietary ^{15}N-CCC for eleven days on $\delta^{15}N$ excess ($\delta^{15}N$-ex) and At% excess ^{15}N (APE) 60
3.4.3. $\delta^{15}N$ excess ($\delta^{15}N$-ex) and At% excess ^{15}N (APE) seven days after ^{15}N-CCC treatment withdrawal 62
3.4.4. Estimation of CCC and/or CCC metabolite product residues in laying hen tissues 64
3.5. Conclusion 64

4. STUDY II. METABOLIC PRODUCTS OF CHLOROCHOLINE CHLORIDE IN EGGS AND MEAT OF LAYING HENS FED DIETS WITH VARYING LEVELS OF ^{15}N-CCC 65
4.1. Objectives 65
4.2. Materials 65
4.3. Methods 66
4.3.1. Thin layer chromatography (TLC) 66
4.3.1.1. Extraction 66
4.3.1.2. Isolation (separation) 67
4.3.1.3. Determination 68
4.3.2. Gas chromatography mass spectrometry (GC-MS) 70
4.3.2.1. Standard preparation 70
4.3.2.2. Heterogeneous conditions 70
4.3.2.3. Homogeneous conditions 71
4.3.2.4. GC-MS specification 71
4.3.2.5. GC-MS analysis 71
4.3.3. High performance liquid chromatography (HPLC) 71
4.3.3.1. Sample preparation 71
4.3.3.2. HPLC analysis 73
4.3.4. Liquid chromatography electrospray ionisation ion trap mass spectrometry 73
4.3.4.1. Chemical and preparation of standard solutions 73
4.3.4.2. Sample preparation 73

4.3.4.3. Mass spectrometry specifications 74
4.4. Results 76
4.4.1. Thin layer chromatography (TLC) 76
4.4.2. Gas chromatography mass spectrometer (GC-MS) 78
4.4.3. High performance liquid chromatography (HPLC) 79
4.4.4. Liquid chromatography electrospray ionisation ion trap mass spectrometer (LC-ESI-MS/MS) 80
4.5. Discussion 86
4.5.1. Determination of chlorocholine chloride and/or its metabolite products using thin layer chromatography 86
4.5.2. Determination of chlorocholine chloride compound using gas chromatography 87
4.5.3. Determination of chlorocholine chloride compound using high performance liquid chromatography 88
4.5.4. Determination of chlorocholine chloride compound using liquid chromatography electrospray ionisation ion trap mass spectrometry 89
4.6. Conclusion 91

5. GENERAL DISCUSSION 92

6. GENERAL CONCLUSIONS 97

7. SUMMARY 98
