Contents

1 Introduction

1.1	Teak in Myanmar.....	1
1.2	A brief retrospect of Myanmar teak forests.....	4
1.3	Current status of natural teak forests.....	7
1.4	Objectives of the study.....	8

2 Biological and ecological characteristics of teak and its management systems

2.1	Distribution of natural teak forests.....	9
2.2	Autecological characteristics	
2.2.1	Climatic condition	
2.2.1.1	Rainfall.....	11
2.2.1.2	Temperature.....	11
2.2.1.3	Light.....	12
2.2.2	Topography, geology and soil.....	12
2.2.3	Vegetation (types of teak forests).....	14
2.3	Physiognomic characteristics.....	16
2.4	Phenology.....	17
2.5	Silvicultural characteristics.....	18
2.6	Management systems of natural teak forests.....	19

3 Materials and methods

3.1	General description of the study areas.....	25
3.2	Climate.....	25
3.3	Topography, geology and soil.....	29
3.4	Forest types and vegetation.....	33
3.5	Data collection	
3.5.1	Selection of sampling area.....	34
3.5.2	Sampling method.....	34
3.5.3	Measurements and sample collections.....	36

3.6	Data analysis.....	39
4	Results and discussion	
4.1	Tree species diversity and composition	
4.1.1	Species richness.....	40
4.1.2	Species diversity.....	42
4.1.3	Coefficient of similarity.....	45
4.1.4	Tree species composition and Importance Value Index (IVI).....	48
4.2	Stand structure	
4.2.1	Horizontal structure.....	53
4.2.2	Vertical structure.....	64
4.3	Phenotypical characteristics of natural grown teak	
4.3.1	Bole height.....	72
4.3.2	Crown diameter, K/d ratio, and crown position.....	73
4.3.3	Bark thickness.....	77
4.3.4	Stem form and axis persistence.....	78
4.3.5	Branch size and mode of branching.....	81
4.3.6	Bole quality.....	83
4.4	Growth analysis of teak	
4.4.1	Climate-growth relationship.....	90
4.4.2	Growth dynamics and productivity	
4.4.2.1	Diameter growth.....	98
4.4.2.2	Volume growth.....	104
4.5	Internal water balance of teak.....	112
5	Conclusion and recommendations	120
6	Summary	134
7	Zusammenfassung	139
8	References	145
	Appendices	156
