Table of contents

1	Introduction.....	1
1.1	Impacts of predation on spatial and temporal community structures.....	2
1.2	Which stimuli can a fish perceive?.....	3
1.2.1	Mechanoreceptive systems.....	3
1.2.2	Chemoreceptive systems.....	5
1.2.3	Electroreception.....	6
1.3	Which cue may give away a predator or prey?.....	7
1.3.1	Acoustic and hydrodynamic stimuli.....	7
1.3.2	Chemical cues.....	8
1.3.3	Electric cues.....	8
1.4	Known stimuli in nocturnal piscine predator-prey interactions.....	9
1.4.1	Acoustic and hydrodynamic stimuli.....	9
1.4.2	Chemical interactions.....	10
1.4.3	Electric fields.....	10
1.5	Aims of this study.....	11
2	Tracking wakes: the nocturnal predatory strategy of piscivorous catfish.....	13
2.1	Introduction.....	13
2.2	Material and Methods.....	14
2.2.2	Attack characterisation.....	14
2.2.3	Quantitative path analyses.....	15
2.3	Results.....	16
2.4	Discussion.....	20

3	The importance of the lateral line in nocturnal predation of piscivorous catfish.....	25
3.1	Introduction.....	25
3.2	Materials and Methods.....	28
3.2.1	Experimental techniques and protocol.....	28
3.2.2	Ablations.....	29
3.2.3	Parameters and evaluation.....	30
3.3	Results.....	31
3.4	Discussion.....	33
4	To see or not to see – predatory strategies of two nocturnal piscivores.....	37
4.1	Introduction.....	37
4.2	Material and Methods.....	39
4.2.1	Behavioural parameters investigated.....	40
4.3	Results.....	41
4.4	Discussion.....	45
5	Creepy nights: alarm substance elicits anti-predator reactions of juvenile dace in darkness.....	49
5.1	Introduction.....	49
5.2	Material and Methods.....	51
5.2.1	Stimulus preparation.....	51
5.2.2	Experimental protocol.....	51
5.2.3	Parameters.....	52
5.2.4	Statistical analyses.....	53
5.3	Results.....	54
5.3.1	Alarm reaction in light.....	54
5.3.2	Alarm reaction in darkness.....	56
5.4	Discussion.....	58

6	An automated radiotelemetry system to locate fish in 3D.....	63
6.1	Introduction.....	63
6.2	Methods development.....	63
6.2.1	Hardware.....	63
6.2.2	Calibration.....	68
6.3	Algorithms for 3D position calculation.....	68
6.3.1	Smoothing of calibration data.....	68
6.3.2	Predicting positions.....	69
6.4	Results.....	72
6.4.1	Signal structure and smoothing.....	72
6.4.2	Prediction.....	74
6.5	Discussion.....	77
7	Conclusions and suggestions for future research.....	79
8	Summary.....	85
	Zusammenfassung.....	87
9	References.....	89
10	Acknowledgements.....	103
