Table of Contents

1 Introduction **1**

1.1 Importance and production of faba bean 1

1.2 Distribution 3

1.3 Breeding 4

2 Objectives **8**

3 Plant material **9**

4 Results and discussion **14**

4.1 Production and scoring of the AFLP markers (I, II, III) 14

4.2 Consistency of the AFLP banding pattern (I, II) 14

4.3 The appropriate genetic similarity coefficient (II) 16

4.4 Clustering and Principal Coordinate analysis (I, II, III) 16

4.5 Applications of AFLP markers in faba bean breeding 19

4.5.1 Genetic diversity studies (I, II, III) 19

4.5.2 Prediction of hybrid performance and heterosis (III) 19

5 Summary **22**

6 Zusammenfassung **23**

7 Arabic summary **24**

8 References **25**

The Roman numbers from I-III refer to the manuscripts presented in the pages to follow.
