Wie alles sich zum Ganzen webt,
Eins in dem andern wirkt und lebt !
Wie Himmelskräfte auf und nieder steigen
Und sich die goldnen Eimer reichen !
Mit segenduftenden Schwingen
Vom Himmel durch die Erde dringen,
Harmonisch all das All durchklingen !

Welch Schauspiel ! Aber ach ! ein Schauspiel nur !
Wo fass ich dich, unendliche Natur ?

Johann Wolfgang von Goethe
Faust

Preface

This work is a result of my post-graduate studies at the Institute of Microwave Engineering, Technical University of Hamburg-Harburg since September 1997. After so many years, it is impossible to adequately thank all of the people whose help has made this work possible. I apologize in advance to anyone I forget to mention in this brief acknowledgment.

First of all, I would like to thank my supervisor Prof. Dr.-Ing. K. Schünemann for inviting me to his institute and for his patient guidance and wholehearted support during this work. Moreover, I would like to gratefully acknowledge his comprehensive review of my thesis.

At this place, I would also like to thank Prof. Dr.-Ing. H. Singer and Prof. Dr. M. Thumm for taking the trouble to review my thesis.

Furthermore, I am grateful to Prof. Dr. M. Thumm and the members of his “gyrotron-team” for their close cooperation and stimulating discussions.

A strong interest and valuable comments of Prof. Dr. K. R. Chu are sincerely appreciated as well.

Finally, my special thanks to all my colleagues for a very comfortable working environment and their constant support in every-day life over all these years.

Hamburg, Dec. 2002

Contents

List of Symbols	x
1 Introduction	1
1.1 What is a Gyro-Device ?	1
1.1.1 Coherent Radiation of Electrons	1
1.1.2 Electron Bunching	2
1.1.3 Classification of Gyro-Devices	5
1.2 Gyro-Oscillators: Gyromonotron and Gyro-BWO	6
1.2.1 Schematic Layout	6
1.2.2 Dispersion Diagram and Feedback Mechanism	9
1.2.3 A Brief History, State-of-the-Art, and Applications	10
1.3 Theoretical Modeling of Gyro-Oscillators	12
1.3.1 Linear Theory	12
1.3.2 Nonlinear Models	12
1.3.3 Nonstationary Multimode Theory	13
1.3.4 Particle-In-Cell (PIC) Simulations	14
1.4 Motivation	14
1.4.1 Mode Interaction in Gyro-Oscillators	15
1.4.2 Influence of Reflections on Gyromonotron Operation	15
1.4.3 Dynamics of the Gyromonotron in the Presence of Reflections	16
1.4.4 Nonstationary Behavior of the Gyro-BWO	18
1.4.5 Injection-Locked Operation of the Gyro-BWO	18
1.4.6 Accurate Modeling within Broad Spectral Bandwidth	19
2 Representation of Electromagnetic Fields in Open Cavities	21
2.1 System of Equations under Matched Conditions	21
2.1.1 Eigenfunction Expansion of Maxwell Equations	21
2.1.2 Boundary Condition for the Eigenfunctions	24
2.1.3 Consideration of the Apertures	25
