Table of Contents

List of Figures.....	XIX
List of Tables.....	XXV
Chapter 1: Introduction.....	1
1.1 General introduction.....	1
1.2 Introduction to the reactions of oxygen atoms with saturated hydrocarbons....	2
1.3 Experimental studies of O(³ P) + hydrocarbons.....	5
1.3.1 Experimentally determined dynamical quantities.....	12
1.3.1.1 Excitation functions.....	12
1.3.1.2 Internal state distributions in the OH product.....	16
1.3.1.2.1 OH vibrational states.....	16
1.3.1.2.2 OH rotational states.....	17
1.3.1.2.3 OH fine-structure states.....	22
1.3.1.3 Internal state distributions in the organic radical coproduct.....	24
1.3.1.3.1 Direct observations.....	24
1.3.1.3.2 Indirect evidence.....	27
1.3.1.4 Differential cross-sections.....	28
1.4 Interpretation and theoretical modelling.....	33
1.4.1 Nuclear motions.....	33
1.4.1.1 Qualitative conclusions based on the experimental data.....	33
1.4.1.2 Semi-empirical surfaces.....	39
1.4.1.3 Ab initio surfaces.....	41
1.4.1.4 Recent theoretical developments.....	47
1.4.1.5 Theoretical work on reactions of O(¹ D) with methane.....	55
1.4.1.6 Electronic effects of the reaction of O(³ P) with saturated hydrocarbons.....	58
1.5 Open questions.....	59
1.6 Introduction to the reaction of O(³ P) with unsaturated hydrocarbons.....	61
1.6.1 Short summary of the general picture.....	61

1.6.2 Introduction to $O(^3P) + H_3CCN$	62
Chapter 2: Spectroscopy of the investigated systems.....	65
2.1 Methods applied in the current study.....	65
2.1.1 Laser induced fluorescence (LIF).....	65
2.1.2 Infrared pumping of a specific vibrational mode.....	67
2.2 Introduction to the spectroscopy of the molecules of interest.....	67
2.2.1 Hund's coupling cases.....	67
2.2.1.1 Hund's coupling case (a).....	68
2.2.1.2 Hund's coupling case (b).....	69
2.2.2 The OH / OD radical.....	71
2.2.2.1 General introduction.....	71
2.2.2.2 The $X^2\Pi_i$ state of the OH-radical.....	72
2.2.2.3 The $A^2\Sigma^+$ -state of the OH-radical.....	73
2.2.2.4 The OH $A^2\Sigma^+ \leftarrow X^2\Pi_i$ transition.....	74
2.2.3 Photolysis of NO_2 at 266 nm.....	78
2.2.3.1 Accessible product channels.....	78
2.2.3.2 Internal energy distribution of the NO fragment.....	78
2.2.4 The NO radical.....	79
2.2.4.1 General introduction.....	79
2.2.4.2 The $X^2\Pi_r$ state of the NO radical.....	79
2.2.4.3 The $A^2\Sigma^+$ state of the NO radical.....	80
2.2.4.4 The $B^2\Pi_r$ state of the NO radical.....	80
2.2.4.5 The NO $A^2\Sigma^+ \leftarrow X^2\Pi_r$ transition.....	80
2.2.4.6 The NO $B^2\Pi_r \leftarrow X^2\Pi_r$ transition.....	81
2.2.5 The CN radical.....	82
2.2.5.1 General introduction.....	82
2.2.5.2 The $X^2\Sigma^+$ state of the CN-radical.....	82
2.2.5.3 The $B^2\Sigma^+$ state of the CN-radical.....	82
2.2.5.4 The CN $B^2\Sigma^+ \leftarrow X^2\Sigma^+$ transition.....	82

2.2.6 The NCO radical.....	86
2.2.6.1 General introduction.....	86
2.2.6.2 The $\tilde{X}^2\Pi$ state of the NCO-radical.....	86
2.2.6.3 The $\tilde{B}^2\Pi$ state of the NCO-radical.....	86
2.2.6.4 The NCO $\tilde{B}(0,0,0)^2\Pi \leftarrow \tilde{X}(0,0,0)^2\Pi$ transition.....	86
2.2.7 Infrared spectroscopy of the CH ₄ molecule.....	89
2.2.7.1 General introduction.....	89
2.2.7.2 Fundamental vibrations of the CH ₄ molecule.....	89
2.2.7.3 Rotational structure of the A ₁ vibrational ground state.....	91
2.2.7.4 Transitions in the F ₂ -A ₁ band of CH ₄	91
Chapter 3: Experimental section.....	95
3.1 General features.....	95
3.1.1 Vacuum cell and gas handling.....	95
3.1.2 Opto-acoustic cell.....	97
3.1.3 Laser systems.....	98
3.1.4 Light detection.....	99
3.1.5 Data collection and experimental control.....	100
3.2 Special features.....	103
3.2.1 LIF experiments in the bulk gas-phase.....	103
3.2.2 LIF experiments using a supersonic nozzle.....	104
3.2.3 Absorption measurements.....	105
3.2.4 Opto-acoustic measurements.....	105
3.2.5 IR-pumping experiments.....	107
Chapter 4: Results: Reactions of ground state oxygen atoms with saturated hydrocarbons.....	109
4.1 General remarks.....	109
4.2 Experimental features and raw data.....	109
4.2.1 Preliminary observations.....	109
4.2.2 Experimental conditions.....	110

4.2.3	Detection of OH and OD LIF excitation spectra.....	110
4.3	Methods of analysis of the observed LIF spectra.....	116
4.3.1	Methods of analysis of the bulk phase LIF experiments.....	116
4.3.1.1	General comments.....	116
4.3.1.2	Analysis of the reactive rotational distributions.....	117
4.3.1.3	F ₁ /F ₂ and Λ -doublet populations.....	124
4.3.1.4	Estimation of vibrational branching.....	127
4.3.2	Analysis of the IR pumping experiments.....	129
4.3.2.1	Estimation of vibrational enhancement.....	129
4.3.2.2	Reactive rotational population.....	132
4.3.2.3	Establishing upper limits for detection.....	132
4.4	Calculation of the collision energy distribution.....	133
4.5	Observed internal state distribution in OH and OD reaction products in the bulk LIF experiments.....	139
4.5.1	Rotational distributions.....	139
4.5.1.1	General remarks.....	139
4.5.1.2	Rotational distribution of the OH product.....	139
4.5.1.3	Rotational distribution of the OD product.....	141
4.5.1.4	Calculation of rotational temperatures for the OH / OD products.....	141
4.5.1.5	Prior distributions for the OH / OD product rotational distribution.....	146
4.5.1.6	Rotational distributions as function of rotational energy.....	150
4.5.2	F ₁ /F ₂ Spin-orbit manifold distribution.....	153
4.5.3	Λ -doublet distribution.....	156
4.5.4	Vibrational branching.....	158
4.6	Attempts to observe the reaction of O(³ P) with methane in a supersonic beam.....	160
4.7	Results of CH ₄ absorption and opto-acoustic measurements.....	164
4.8	Results of IR pumping of the methane (OH-LIF).....	166

Chapter 5: Discussion of the reaction of ground state oxygen atoms with deuterated and non-deuterated saturated hydrocarbons.....	171
5.1 OH / OD rotational distribution.....	171
5.1.1 Previous experimental results and their interpretation.....	171
5.1.2 Previous theoretical work on the OH product rotation.....	173
5.1.3 Confirmation of previous studies.....	179
5.1.4 New results and conclusions.....	180
5.2 OH / OD fine-structure distribution.....	185
5.2.1 Previous results and interpretation.....	185
5.2.1.1 Fully adiabatic electronic coupling model.....	187
5.2.1.2 Non-adiabatic mixing.....	190
5.2.2 Confirmation of previous studies.....	193
5.2.3 Interpretation of the new data.....	194
5.3 OH / OD Λ -doublet distribution.....	200
5.4 OH / OD vibrational branching.....	201
5.4.1 Previous work.....	201
5.4.2 Own results and interpretation.....	203
5.5 Information on the hydrocarbon radical fragment.....	210
5.6 IR-pumping of methane.....	210
5.6.1 Estimation of experimental parameters.....	211
5.6.2 Estimate of the expected vibrational enhancement.....	215
5.6.3 Theoretical predictions of relative reactivity.....	216
5.6.3.1 Predicted increased reactivity on the basis of the theoretical work	219
5.6.3.2 Comparison of predicted vibrational enhancement and experimental data.....	221
5.7 Summary.....	226

Chapter 6: Additional work attempted.....	229
6.1 Reaction of ground state oxygen atoms with acetonitrile.....	229
6.2 Attempts to detect OH from the reaction of ground state oxygen atoms with acetonitrile.....	231
6.3 Attempts to detect NCO from the reaction of ground state oxygen atoms with acetonitrile.....	232
6.4 Discussion and conclusion.....	237
Chapter 7: Outlook.....	239
Bibliography.....	243
Appendices.....	251
A Courses attended.....	251
B Conferences attended.....	251
C Published Papers.....	251
