### **Interrelationships between melatonin and oxidative stress:**

Mechanistic studies of the reactions of melatonin and its metabolites with free radicals

|                      |            |
|----------------------|------------|
| <b>Contents.....</b> | <b>I-V</b> |
|----------------------|------------|

|                            |              |
|----------------------------|--------------|
| <b>Abbreviations .....</b> | <b>VI-IX</b> |
|----------------------------|--------------|

|                              |              |
|------------------------------|--------------|
| <b>1. Introduction .....</b> | <b>1- 41</b> |
|------------------------------|--------------|

|                                 |             |
|---------------------------------|-------------|
| <b>1.1. Free radicals .....</b> | <b>1- 8</b> |
|---------------------------------|-------------|

|  |   |
|--|---|
| 1.1.1. Definition and generation ..... | 1 |
|--|---|

|   |   |
|---|---|
| 1.1.2. Functions and oxidative stress ..... | 3 |
|---|---|

|                                    |   |
|------------------------------------|---|
| 1.1.3. Antioxidative defense ..... | 6 |
|------------------------------------|---|

|                             |             |
|-----------------------------|-------------|
| <b>1.2. Melatonin .....</b> | <b>8-22</b> |
|-----------------------------|-------------|

|                                       |   |
|---------------------------------------|---|
| 1.2.1. Structure and properties ..... | 8 |
|---------------------------------------|---|

|                        |   |
|------------------------|---|
| 1.2.2. Evolution ..... | 9 |
|------------------------|---|

|                           |   |
|---------------------------|---|
| 1.2.3. Biosynthesis ..... | 9 |
|---------------------------|---|

|                         |    |
|-------------------------|----|
| 1.2.4. Regulation ..... | 12 |
|-------------------------|----|

|                           |    |
|---------------------------|----|
| 1.2.5. Distribution ..... | 16 |
|---------------------------|----|

|                         |    |
|-------------------------|----|
| 1.2.6. Metabolism ..... | 18 |
|-------------------------|----|

|                                      |    |
|--------------------------------------|----|
| 1.2.7. Physiological functions ..... | 20 |
|--------------------------------------|----|

|   |              |
|---|--------------|
| <b>1.3. Melatonin as a free radical scavenger and a broad-spectrum antioxidant.....</b> | <b>23-39</b> |
|---|--------------|

|   |    |
|---|----|
| 1.3.1. Direct scavenging activity ..... | 23 |
|---|----|

|  |    |
|--|----|
| 1.3.2. Indirect antioxidant activity ..... | 27 |
|--|----|

|  |    |
|--|----|
| 1.3.3. Metabolic cascade reaction..... | 28 |
|--|----|

|   |    |
|---|----|
| 1.3.4. Protection of macromolecular oxidative injury <i>in vitro</i> and <i>in vivo</i> ..... | 31 |
|---|----|

|   |    |
|---|----|
| 1.3.5. Melatonin and its metabolites in plants..... | 36 |
|---|----|

|   |    |
|---|----|
| 1.3.6. Comparison to classic antioxidants ..... | 37 |
|---|----|

|   |              |
|---|--------------|
| <b>1.4. Statement of problems .....</b> | <b>40-41</b> |
|---|--------------|

|   |              |
|---|--------------|
| <b>2. Materials and methods .....</b>   | <b>42-52</b> |
| <b>2.1. Chemicals .....</b>   | <b>42-42</b> |
| <b>2.2. Experimental Animals.....</b>   | <b>42-43</b> |
| 2.2.1. Source.....  | 42           |
| 2.2.2. Care and housing .....   | 42           |
| 2.2.3. Melatonin administration .....   | 43           |
| 2.2.4. Animal radiation.....  | 43           |
| 2.2.5. Rat urine collection .....   | 43           |
| 2.2.6. Human urine collection.....  | 43           |
| <b>2.3. Cell culture.....</b>   | <b>44-44</b> |
| <b>2.4. Assays.....</b>   | <b>44-52</b> |
| 2.4.1. Cell viability analysis .....  | 44           |
| 2.4.2. Lipid peroxidation products assay .....  | 45           |
| 2.4.3. Protein assay.....   | 46           |
| 2.4.4. Thin layer chromatography (TLC) assay .....  | 46           |
| 2.4.5. HPLC assay .....   | 47           |
| 2.4.6. UV/Vis spectrophotometer analysis.....   | 49           |
| 2.4.7. Electron impact mass spectra (EI-MS) assay.....  | 50           |
| 2.4.8. Proton nuclear magnetic resonance ( $^1\text{H}$ NMR)<br>and $^1\text{H}$ NMR COSY analyses .....  | 50           |
| 2.4.9. Cyclic voltammetry (CV) measurements .....   | 51           |
| <b>3. Experiments.....</b>  | <b>53-65</b> |
| <b>3.1. Mechanistic studies of melatonin as a ·OH scavenger.....</b>  | <b>53-55</b> |
| 3.1.1. Experiment I: ·OH generation and its interaction with melatonin .....  | 53           |
| 3.1.2. Experiment II: Isolation of the products of melatonin's interaction<br>with ·OH.....   | 54           |
| 3.1.3. Experiment III: Structural identification of the isolated<br>melatonin metabolite .....  | 54           |
| 3.1.4. Experiment IV: Generation and isolation of the metabolite which is<br>produced via the interaction between melatonin and ·OH<br>in rat and in human..... | 55           |

|  |              |
|--|--------------|
| <b>3.2. Mechanistic studies of melatonin interaction with ABTS<sup>+</sup></b> .....   | <b>55-61</b> |
| 3.2.1. Experiment V: Studies of electron donating capacity of melatonin .....  | 55           |
| 3.2.2. Experiment VI: Concentration-absorbance standard curve of ABTS <sup>+</sup> .....   | 56           |
| 3.2.3. Experiment VII: Comparative studies of melatonin and classic<br>antioxidants in scavenging ABTS <sup>+</sup> .....                          | 56           |
| 3.2.4. Experiment VIII: Studies on the synergistic effects of melatonin and<br>classic antioxidants in scavenging ABTS <sup>+</sup> .....          | 57           |
| 3.2.5. Experiment IX: Influence of pH on melatonin and classic antioxidants<br>in scavenging ABTS <sup>+</sup> .....                               | 59           |
| 3.2.6. Experiment X: Consumption of reactants and generation of products<br>in the reaction of melatonin with ABTS <sup>+</sup> .....              | 59           |
| 3.2.7. Experiment XI: Studies to determine if cyclic 3-hydroxymelatonin<br>scavenges ABTS <sup>+</sup> .....                                       | 60           |
| <b>3.3. Antioxidative studies of the melatonin metabolite,<br/>    N<sup>1</sup>-acetyl-N<sup>2</sup>-formyl-5- methoxykynuramine (AFMK)</b> ..... | <b>61-65</b> |
| 3.3.1. Experiment XII: Synthesis of AFMK .....   | 61           |
| 3.3.2. Experiment XIII: Studies of electron donating capacity of AFMK .....  | 62           |
| 3.3.3. Experiment XIV: Studies of the interactions between AFMK<br>and Cr <sup>3+</sup> or Fe <sup>2+</sup> .....                                  | 62           |
| 3.3.4. Experiment XV: Studies of the protective effects of AFMK on<br>lipid peroxidation .....   | 63           |
| 3.3.5. Experiment XVI: Studies of the protective effects of AFMK on DNA<br>oxidative damage .....  | 63           |
| 3.3.6. Experiment XVII: Neuroprotection by AFMK against toxin exposure.....  | 64           |
| <b>3.4. Statistical analysis</b> .....   | <b>65-65</b> |
| <b>4. Results</b> .....  | <b>66-89</b> |
| <b>4.1. Mechanistic studies of melatonin as a ·OH scavenger</b> .....  | <b>66-71</b> |
| 4.1.1. Experiment I: ·OH generation and its interaction with melatonin .....   | 66           |
| 4.1.2. Experiment II: Isolation of the products of melatonin's interaction<br>with ·OH.....  | 66           |

|   |              |
|---|--------------|
| 4.1.3. Experiment III: Structural identification of the isolated melatonin metabolite .....   | 66           |
| 4.1.4. Experiment IV: Generation and isolation of the metabolite which was produced via the interaction between melatonin and ·OH in rat and in human ..... | 70           |
| <b>4.2. Mechanic studies of melatonin interaction with ABTS<sup>+</sup></b> .....   | <b>71-83</b> |
| 4.2.1. Experiment V: Studies of electron donating capacity of melatonin .....   | 71           |
| 4.2.2. Experiment VI: Concentration-absorbance standard curve of ABTS <sup>+</sup> ....   | 72           |
| 4.2.3. Experiment VII: Comparative studies of melatonin and classic antioxidants in scavenging ABTS <sup>+</sup> .....                                      | 73           |
| 4.2.4. Experiment VIII: Studies on the synergistic effects of melatonin and classic antioxidants in scavenging ABTS <sup>+</sup> .....                      | 76           |
| 4.2.5. Experiment IX: Influence of pH on melatonin and classic antioxidants in scavenging ABTS <sup>+</sup> .....   | 78           |
| 4.2.6. Experiment X: Consumption of reactants and generation of products in the reaction of melatonin with ABTS <sup>+</sup> .....                          | 80           |
| 4.2.7. Experiment XI: Studies to determine if cyclic 3-hydroxymelatonin scavenges ABTS <sup>+</sup> .....   | 83           |
| <b>4.3. Antioxidative studies of the melatonin metabolite, N<sup>1</sup>-acetyl-N<sup>2</sup>-formyl-5-methoxykynuramine (AFMK)</b> .....                   | <b>84-89</b> |
| 4.3.1. Experiment XII: Synthesis of AFMK .....  | 84           |
| 4.3.2. Experiment XIII: Studies of electron donating capacity of AFMK .....   | 84           |
| 4.3.3. Experiment XIV: Studies of the interactions between AFMK and Cr <sup>3+</sup> or Fe <sup>2+</sup> .....  | 85           |
| 4.3.4. Experiment XV: Studies of the protective effects of AFMK on lipid peroxidation. ....   | 85           |
| 4.3.5. Experiment XVI: Studies of the protective effects of AFMK on DNA oxidative damage. ....  | 86           |
| 4.3.6. Experiment XVII: Neuroprotective studies of AFMK against toxin exposure.....   | 87           |
