

Table of Contents

| | | |
|-------|---|----|
| 1 | INTRODUCTION | 1 |
| 1.1 | Rainfed lowland paddy field | 1 |
| 1.2 | Soil fauna as a community | 2 |
| 1.3 | The role of soil fauna in ecosystem processes..... | 4 |
| 1.3.1 | Soil fauna in terrestrial ecosystems | 5 |
| 1.3.2 | Soil fauna in rice field ecosystems | 6 |
| 1.4 | Objectives | 7 |
| 1.5 | Hypotheses | 8 |
| 2 | MATERIALS AND METHODS | 10 |
| 2.1 | Study site description | 10 |
| 2.1.1 | Location..... | 10 |
| 2.1.2 | Climate | 10 |
| 2.2 | Cropping system..... | 12 |
| 2.3 | Outline of the experiments | 13 |
| 2.4 | Study of soil fauna in rainfed paddy field and surrounding ecosystems..... | 16 |
| 2.4.1 | Screening of soil fauna in different ecosystems in the region..... | 16 |
| 2.4.2 | Bait-lamina feeding activity | 17 |
| 2.4.3 | Study of soil fauna dynamics | 19 |
| | Calculation of animal abundances and biomass..... | 19 |
| | Calculation of soil animal diversity..... | 21 |
| | Grouping and identification..... | 22 |
| 2.5 | Study of organic matter decomposition..... | 22 |
| 2.6 | Study of nitrogen mineralization | 24 |
| 2.6.1 | Nitrogen mineralization..... | 24 |
| | Determination of ammonium and nitrate..... | 25 |
| | Calculation of nitrogen mineralization | 25 |
| 2.6.2 | Nitrifiers and denitrifiers | 26 |
| 2.7 | Statistical analysis | 26 |
| 3 | RESULTS AND DISCUSSION..... | 28 |
| 3.1 | Screening of soil fauna in different ecosystems of the region..... | 28 |
| 3.1.1 | Abundance and biomass | 28 |
| 3.1.2 | Diversity | 30 |
| 3.1.3 | Bait-lamina feeding activity | 33 |
| | Feeding activity | 34 |
| | Feeding stratification | 36 |
| | Resume | 36 |
| 3.2 | Soil fauna dynamics in rainfed paddy field..... | 37 |
| 3.2.1 | Soil fauna dynamics in fallow and rice field phases | 37 |
| | Soil fauna abundance..... | 37 |
| | Soil fauna biomass..... | 41 |
| | Soil fauna diversity..... | 42 |
| | Dynamics of oribatid mites | 46 |
| | Dynamics of Collembola | 47 |
| | Resume | 48 |
| 3.2.2 | The effect of bund distance and crop-planted bunds on soil fauna abundance, biomass and diversity | 49 |

| | |
|--|-----|
| Bund distance | 49 |
| Crop-planted bund | 55 |
| Resume | 64 |
| 3.3 Litter decomposition in the fallow and rice seasons | 67 |
| 3.3.1 Effects of mesh size on litter decomposition..... | 67 |
| 3.3.2 Effects of different bund distances and crop-planted bunds in litter decomposition..... | 69 |
| Resume | 75 |
| 3.4 Nitrogen mineralization in rainfed paddy fields: relationship with soil fauna | 76 |
| 3.4.1 Nitrogen mineralization in fallow and rice fields..... | 76 |
| 3.4.2 The effect of bund distance and crop-planted bund on net nitrogen mineralization | 78 |
| 3.4.3 Nitrifiers and denitrifiers | 80 |
| Resume | 82 |
| 4 GENERAL DISCUSSION AND CONCLUSIONS | 83 |
| 4.1 Screening of soil fauna in different ecosystems in the study area..... | 83 |
| 4.2 Soil fauna population dynamics in rainfed paddy ecosystem..... | 84 |
| 4.3 Effect of bund distance and crop-planted bund on soil fauna, litter decomposition and nitrogen mineralization | 86 |
| 4.3.1 Soil fauna population..... | 86 |
| 4.3.2 Litter decomposition and nitrogen mineralization..... | 87 |
| 4.4 Concluding remarks..... | 89 |
| 5 SUMMARY | 91 |
| 6 REFERENCES | 94 |
| 7 APPENDICES | 102 |
| Acknowledgments | 116 |
