**TABLE OF CONTENTS**

<b>List of tables</b> .....	<b>iv</b>
<b>List of figures</b> .....	<b>vi</b>
<b>List of abbreviations</b> .....	<b>vii</b>
<b>1 Introduction</b> .....	<b>1</b>
1.1 Problem statement .....	1
1.2 Research gaps .....	6
1.3 Research objective.....	7
1.3.1 <i>General objective</i> .....	7
1.3.2 <i>Specific objectives</i> .....	7
1.4 Structure of the dissertation.....	8
<b>2 Integrated multi-agent models of agricultural systems</b> .....	<b>9</b>
2.1 Introduction .....	9
2.2 Integrated modeling approach .....	9
2.3 Bio-economic models.....	9
2.4 Agent-based models .....	10
2.5 General structure of an integrated MAS.....	10
2.5.1 <i>The agent component</i> .....	10
2.5.2 <i>The biophysical component</i> .....	10
2.6 Features of MAS .....	11
2.6.1 <i>Integration</i> .....	11
2.6.2 <i>Interactions</i> .....	11
2.6.3 <i>Heterogeneity</i> .....	12
2.7 MAS applications .....	12
2.8 Strengths and challenges .....	12
2.8.1 <i>Strengths</i> .....	12
2.8.2 <i>Challenges</i> .....	13
2.9 MP-MAS and soil conservation practices .....	13
<b>3 Materials and methods</b> .....	<b>14</b>
3.1 Introduction .....	14
3.2 Study area.....	14
3.3 Data .....	16
3.4 Household characteristics in the Chieng Khoi catchment.....	17
3.5 Model description.....	18
3.5.1 <i>Purpose</i> .....	18

---

3.5.2	<i>State variables and scales</i> .....	18
3.5.3	<i>Process overview and scheduling</i> .....	21
3.5.4	<i>Design concept</i> .....	22
3.5.5	<i>Initialization</i> .....	23
3.5.6	<i>Sub-models</i> .....	23
3.5.7	<i>Input</i> .....	28
3.6	Scenario setup for sensitivity analysis.....	49
3.6.1	<i>Model verification</i> .....	49
3.6.2	<i>Impact assessment of sustainability and policy option scenarios</i> .....	50
<b>4</b>	<b>Model validation and verification</b> .....	<b>54</b>
4.1	Introduction .....	54
4.2	Model validation .....	54
4.2.1	<i>Validation of the TSPC model</i> .....	54
4.2.2	<i>MP-MAS validation</i> .....	55
4.3	Verification of model dynamics .....	59
4.3.1	<i>Fertilizer experiments</i> .....	59
4.3.2	<i>Simulation results of baseline scenario</i> .....	62
4.4	Concluding remarks .....	65
<b>5</b>	<b>Simulation Results</b> .....	<b>66</b>
5.1	Introduction .....	66
5.2	Impacts of growing hybrid maize.....	66
5.3	Adoption of soil conservation practices .....	68
5.3.1	<i>Diffusion curves</i> .....	68
5.3.2	<i>Constraints to adopt soil conservations</i> .....	69
5.4	Sustainability analysis .....	72
5.4.1	<i>Effects on soil erosion and a negative value for the soil nutrient balance</i> ....	72
5.4.2	<i>Land use and farm income</i> .....	75
5.4.3	<i>Trade-off between environmental sustainability and farm incomes</i> .....	77
5.4.4	<i>Costs of reducing soil erosion</i> .....	78
5.5	Subsidy policies.....	80
5.5.1	<i>Diffusion of soil conservation</i> .....	80
5.5.2	<i>Changes in conservation area due to subsidies</i> .....	81
5.5.3	<i>Costs of erosion reduction in different subsidy scenarios</i> .....	82
5.6	Concluding remarks .....	84
<b>6</b>	<b>Discussion and conclusion</b> .....	<b>85</b>
6.1	Introduction .....	85

## TABLE OF CONTENTS

---

6.2	Strengths and weaknesses of the modeling approach used .....	85
6.2.1	<i>Strengths</i> .....	85
6.2.2	<i>Weaknesses</i> .....	85
6.2.3	<i>Future extensions</i> .....	86
6.2.4	<i>Comparison with previous studies</i> .....	86
6.3	The relationship between decision making and soil fertility.....	87
6.3.1	<i>Fertilizer experiments</i> .....	87
6.3.2	<i>Exclusion of past innovations</i> .....	88
6.3.3	<i>Simulation of the baseline</i> .....	88
6.4	Constraints on the adoption of soil conservation practices .....	89
6.5	Trade-off between sustainability and farm incomes .....	90
6.6	Subsidy policy .....	91
<b>7</b>	<b>Summary</b> .....	<b>92</b>
<b>8</b>	<b>Zusammenfassung</b> .....	<b>94</b>
<b>9</b>	<b>References</b> .....	<b>97</b>
<b>10</b>	<b>Appendix</b> .....	<b>108</b>
	Appendix 1: The value of cumulative segments for random generation.....	108
	Appendix 2: Annual precipitation in Yen Chau (mm) .....	115
	Appendix 3: Classification of soil nutrient response units (NRU).....	116
	Appendix 4: Spatial map presenting the 48 nutrient response units .....	119
	Appendix 5: Explanation of variables in ordered logistic regression models .....	120
	Appendix 6: Validation graphs.....	121
	Appendix 7: Land use and income change by sustainability constraint.....	124
	Appendix 8: Diffusion of soil conservation practices by subsidy policy .....	127
	Appendix 9: Land use changes by subsidy policy .....	130
