

# Contents

<b>1</b>	<b>Introduction</b>	<b>13</b>
1.1	Problem Statement and Approach . . . . .	15
1.2	Contributions of this Thesis . . . . .	16
1.3	Structure of this Thesis . . . . .	18
<b>2</b>	<b>Background</b>	<b>21</b>
2.1	Wireless Communication . . . . .	21
2.1.1	Large-scale Signal Attenuation: Path Loss . . . . .	23
2.1.2	Signal to Interference and Noise Ratio . . . . .	24
2.1.3	Multiple Access Techniques . . . . .	26
2.2	ETSI Protocol Architecture for Intelligent Transportation Systems . . . . .	28
2.2.1	ETSI ITS Communication Architecture . . . . .	28
2.2.2	Access Layer . . . . .	30
2.2.3	Network & Transport Layer . . . . .	35
2.2.4	Facilities Layer . . . . .	36
2.2.5	Application Layer . . . . .	37
2.3	Characteristics of Road Traffic and Accidents . . . . .	38
2.3.1	Urban Road Traffic . . . . .	38
2.3.2	Highway Traffic . . . . .	38
2.3.3	Accidents on the Road . . . . .	40
2.3.4	Special Dangers in Road Traffic . . . . .	40
2.4	Simulation of Wireless Communication Networks and Road Traffic . . . . .	40
2.4.1	Java in Simulation Time - Scalable Wireless Ad-Hoc Networks Framework . . . . .	41
2.4.2	Simulation of Urban Mobility . . . . .	44
2.4.3	Combination of Simulators and Evaluation Framework . . . . .	46
2.5	Intervehicle Communication in the Field . . . . .	48
2.5.1	Communication Platform . . . . .	48
2.5.2	Experiment Equipment and Measurement Tools . . . . .	49
2.6	Summary . . . . .	50
<b>3</b>	<b>State of the Art</b>	<b>53</b>
3.1	Requirements for Efficient Resource Management . . . . .	53
3.1.1	Functional Requirements . . . . .	54
3.1.2	Non-Functional Requirements . . . . .	54
3.2	Common Performance Evaluation Metrics . . . . .	56
3.2.1	Throughput . . . . .	56
3.2.2	Delay and Jitter . . . . .	56

3.2.3	Delivery Rate . . . . .	57
3.2.4	Channel Busy Fraction . . . . .	58
3.2.5	Summary . . . . .	58
3.3	Evaluations of VANETs under High Load . . . . .	58
3.3.1	Performance Evaluation of Wireless Local Area Networks . . . . .	59
3.3.2	Performance Evaluation of Vehicular Ad-Hoc Networks . . . . .	61
3.3.3	Summary and Comparison . . . . .	65
3.4	Approaches for Resource Management in VANETs . . . . .	66
3.4.1	Resource Management in Wireless Communication . . . . .	66
3.4.2	Single-Parameter/Single-Layer Approaches . . . . .	70
3.4.3	Multi-Parameter/Multi-Layer Approaches . . . . .	73
3.5	Comparison and Discussion . . . . .	75
<b>4</b>	<b>Problem Analysis</b>	<b>81</b>
4.1	Research Questions for the Problem Analysis . . . . .	82
4.2	Conceptual Analysis of Resource Limitation . . . . .	82
4.2.1	Classification of Packet Loss . . . . .	83
4.2.2	Network Capacity Assessment . . . . .	87
4.2.3	Summary . . . . .	88
4.3	Reference Scenarios . . . . .	89
4.3.1	Motivation for Dedicated Reference Scenarios . . . . .	89
4.3.2	Scenario Category 1: Urban and Rural roads (U) . . . . .	90
4.3.3	Scenario Category 2: Highways (H) . . . . .	90
4.3.4	Scenario Category 3: Urban & Rural Roads plus Highways (UH) . . . . .	91
4.3.5	Scenario category 4: Isolated End of Traffic Jam (T) . . . . .	92
4.4	Simulation Studies . . . . .	93
4.4.1	Study on Communication Range Degradation . . . . .	93
4.4.2	Study on Spatial Reuse . . . . .	97
4.5	Measurement Campaign . . . . .	100
4.5.1	Application Scenario and Communication Challenge . . . . .	101
4.5.2	Scenario Transfer . . . . .	101
4.5.3	Communication Range Calibration . . . . .	102
4.5.4	Equipment & Setup . . . . .	103
4.5.5	Measurement Results and Comparison . . . . .	104
4.6	Summary . . . . .	107
<b>5</b>	<b>Cross-Layer Resource Management</b>	<b>109</b>
5.1	VANET Resource Management Architecture . . . . .	109
5.2	Situation-Adaptive CAM Rate Adaptation . . . . .	112
5.2.1	Requirements for Adaptive CAM Rate Adaptation in VANETs . . . . .	113
5.2.2	Position Accuracy Metrics . . . . .	113
5.2.3	Conceptual Analysis of Position Accuracy . . . . .	115
5.2.4	Overview of Schemes for Situation-Adaptive CAM Rate Adaptation . . . . .	118
5.2.5	Selected Schemes for Common Scenarios . . . . .	121
5.2.6	Summary . . . . .	124
5.3	CAM Forwarding . . . . .	124
5.3.1	Design Goals and Metrics for CAM Forwarding . . . . .	125
5.3.2	Selective CAM Forwarding Overview . . . . .	129

---

5.3.3	Detailed Structure of SCF . . . . .	131
5.3.4	Bootstrapping . . . . .	134
5.3.5	CAM Forwarding as a Service (CFaaS) . . . . .	134
5.3.6	Comparison . . . . .	135
5.3.7	Summary . . . . .	136
5.4	Advanced Carrier Sensing . . . . .	137
5.4.1	Dynamic Carrier Sensing versus Transmit Power Control . . . . .	137
5.4.2	Requirements for Advanced Carrier Sensing . . . . .	139
5.4.3	Awareness QuaLity (AQL) . . . . .	139
5.4.4	Dynamic Adaptation Concepts . . . . .	142
5.4.5	Prioritization and Traffic Shaping . . . . .	144
5.4.6	Summary . . . . .	146
5.5	VANET Resource Management . . . . .	147
5.5.1	Considered Metrics for Situation Classification . . . . .	147
5.5.2	Prerequisite Coordination Actions . . . . .	151
5.5.3	Extension of Complex Performance Evaluation Metrics . . . . .	152
5.5.4	Triggered Coordination Actions . . . . .	153
5.5.5	VANET Situation Classification based on a Finite-State Transducer	154
5.5.6	VANET Resource Management Configuration . . . . .	157
5.6	Summary of Cross-Layer Resource Management . . . . .	160
<b>6</b>	<b>Evaluation</b>	<b>163</b>
6.1	Research Questions and Applied Metrics . . . . .	163
6.1.1	Research Questions for the Evaluation of VRM . . . . .	163
6.1.2	Overview of Complex Metrics . . . . .	165
6.2	Evaluation of Situation-Adaptive CAM Rate Adaptation . . . . .	167
6.2.1	Subject of Evaluation and Expectations . . . . .	167
6.2.2	Rate-Adaptation in Urban Scenarios . . . . .	168
6.2.3	Rate-Adaptation in Highway Scenarios . . . . .	170
6.2.4	Discussion . . . . .	173
6.3	Evaluation of Selective CAM Forwarding . . . . .	175
6.3.1	Subject of Evaluation and Expectations . . . . .	175
6.3.2	Simulation Results . . . . .	176
6.3.3	Discussion . . . . .	179
6.4	Evaluation of Advanced Carrier Sensing . . . . .	180
6.4.1	Subject of Evaluation and Expectations . . . . .	181
6.4.2	Low and Medium Load . . . . .	181
6.4.3	High Load . . . . .	182
6.4.4	Inaccurate CCA Thresholds . . . . .	184
6.4.5	Discussion of Simulation Results . . . . .	185
6.4.6	Summary . . . . .	186
6.5	Evaluation of VANET Resource Management . . . . .	187
6.5.1	Subject of Evaluation and Expectations . . . . .	187
6.5.2	Simulation Results for the Base Configuration . . . . .	188
6.5.3	Simulation Results for the Enhanced Configuration . . . . .	197
6.6	Summary and Discussion . . . . .	199

<b>7 Conclusion and Outlook</b>	<b>203</b>
7.1 Summary and Conclusions . . . . .	203
7.2 Outlook . . . . .	205
