Contents

1 Introduction 1

2 Centrifugation. Fundamentals and state of the art. 5

2.1 Flow in centrifugal field 5

2.1.1 Tangential flow 5

2.1.2 Axial flow. The Plug Flow theory and the Boundary Layer theory 7

2.1.3 Spin-up process in centrifuges 13

2.2 Sedimentation in centrifugal field 14

2.2.1 Sedimentation of a single particle 14

2.2.2 Effect of the concentration on the sedimentation 16

2.2.3 Calculation of the separation efficiency 18

3 Numerical simulation. Fundamentals and state of the art 23

3.1 Fundamentals of the Computational Fluid Dynamics 23

3.1.1 Conservation equations 23

3.1.2 Methodology to solve the conservation equations 25

3.1.3 Turbulence models 28

3.1.4 Multiphase flow approaches 31

3.2 Mathematical formulation of the fluid 34

3.3 Mathematical formulation of the particles 36

3.3.1 Discrete Phase Model 36

3.3.2 Discrete Element Method 38

4 Flow simulation 41

4.1 Geometry and grid 41

4.2 Boundary conditions and solution method 45

4.2.1 Boundary and domain conditions 45

4.2.2 Discretisation schemas 47

4.2.3 Solver 49

4.3 Results – 2D simulations 51

4.3.1 Phase distribution 52

4.3.2 Flow pattern 54

4.4 Results – 3D simulations 61

4.4.1 Phase distribution 63

4.4.2 Tangential flow 65

4.4.3 Axial flow 71

4.4.4 Radial flow 76

4.4.5 Comparison of turbulence models 79

4.4.6 Pressure 82

4.4.7 Shear stress 84

5 Validation of the flow with a model centrifuge 85
5.1 Colour tracking 85
5.2 Residence time distribution 86
5.3 Laser Doppler Anemometry 90
5.3.1 Theory of the Laser Doppler Anemometry 90
5.3.2 Experimental set-up and measurement procedure 93
5.3.3 Experimental results and validation 96

6 Single particle simulation 103
6.1 Geometry and grid 103
6.2 Boundary conditions and solution method 103
6.3 Particle treatment at the gas-liquid interface 105
6.4 Results 108
6.4.1 Particle traces 108
6.4.2 Grade efficiency 110
6.4.3 Particle accumulation 112

7 Sediment simulation 116
7.1 Geometry and grid 116
7.2 Boundary conditions and solution method 117
7.3 Results 122
7.3.1 Verification of the coupling methodology 122
7.3.2 Sediment behaviour 123
7.3.3 Influence of the sediment on the flow 127

8 Experiments and validation with industrial centrifuges 129
8.1 Experimental set-up and procedure 129
8.2 Experiments with the centrifuge A-25 133
8.3 Experiments with the centrifuge S-15 137
8.4 Development of a new A-25 139

9 Conclusions and further work 141
