

## Contents

<b>Abstract</b>	vii
<b>Kurzfassung</b>	ix
<b>Glossary</b>	xiv
<b>1 Introduction</b>	1
1.1 Motivations . . . . .	2
1.2 Organization of the thesis . . . . .	3
1.3 Contributions . . . . .	4
<b>2 MIMO fundamentals</b>	5
2.1 SISO system model . . . . .	5
2.2 MIMO system model . . . . .	6
2.3 Capacity of MIMO systems . . . . .	7
2.4 The Rayleigh channel model . . . . .	9
2.5 Breaking Shannon's boundary . . . . .	9
2.6 One ring model . . . . .	11
2.7 Effect of number of scatterers . . . . .	13
2.8 Making the case for reconfigurable antennas . . . . .	15
2.9 Kronecker channel model . . . . .	17
2.10 Antennas . . . . .	18
2.10.1 Antenna parameters . . . . .	19
2.11 Conclusion . . . . .	20

<b>3 Spatial correlation</b>	<b>23</b>
3.1 Introduction . . . . .	23
3.2 Definition of spatial correlation (SC) . . . . .	23
3.3 Spatial correlation of a uniform rectangular dipole array (URDA) . . . . .	25
3.4 Spatial Correlation with mutual coupling . . . . .	28
3.5 Capacity . . . . .	30
3.6 Conclusion . . . . .	31
<b>4 A three-layer pattern-reconfigurable Antenna</b>	<b>33</b>
4.1 Introduction . . . . .	33
4.2 Reconfigurable antenna design and fabrication process . . . . .	34
4.3 Beam switching three-layer reconfigurable antenna . . . . .	36
4.3.1 Antenna description . . . . .	36
4.3.2 Balun . . . . .	38
4.3.3 Theory of operation . . . . .	39
4.3.4 Antenna with the biasing circuit . . . . .	41
4.3.5 Results and discussion . . . . .	43
4.4 Conclusion . . . . .	46
<b>5 Window frame and crossed dipole reconfigurable antennas</b>	<b>47</b>
5.1 Introduction . . . . .	47
5.2 Window frame reconfigurable antenna . . . . .	48
5.2.1 Antenna concept . . . . .	48
5.2.2 Antenna model . . . . .	50
5.2.3 Results . . . . .	52
5.2.4 Microstrip feeding . . . . .	55
5.3 Reconfigurable antenna based on printed dipole . . . . .	57
5.3.1 Antenna description and the radiation mechanism . . . . .	57
5.3.2 Current distribution and the beam pattern . . . . .	59
5.3.3 Return loss . . . . .	59
5.4 Conclusion . . . . .	60
<b>6 60 GHz MIMO proposals</b>	<b>61</b>
6.1 Switched beam antennas as element of a $2 \times 2$ MIMO . . . . .	61
6.1.1 Introduction . . . . .	61
6.1.2 MIMO capacity and channel matrix formation . . . . .	61
6.1.3 Simulation and results . . . . .	63
6.1.4 Switched beam elements . . . . .	65

6.2	LOS MIMO . . . . .	67
6.2.1	Analysis of an alternatively polarized $4 \times 4$ LOS MIMO . . . . .	68
6.2.2	Beam width and offset . . . . .	73
6.3	Conclusions . . . . .	75
7	<b>Conclusions and future work</b>	77
7.1	Conclusions . . . . .	77
7.2	Future work . . . . .	78
A	<b>Appendix</b>	81
	<b>Bibliography</b>	83
	<b>List of publications</b>	89
