Summary xvi
Zusammenfasung xx
Chapter 1:
General introduction, research objectives and thesis outline **1**
1.1 Introduction 2
1.2 Broomrape status in Sudan 2
1.3 The life cycle of *Phelipanche* 3
1.4 Natural and other germination stimulants 7
1.5 *Orobanche* and *Phelipanche* control 9
1.5. 1 Control through enhanced germination *9*
1.5.1.1 Suicidal germination *9*
1.5.1.2 Trap and catch Crops *10*
1.5.2 Control through reduced germination *10*
1.5.2.1 Using Chemicals *10*
1.5.2.2 Breeding for low germination stimulants *11*
1.6 Bringing together different components into a systems approach 12
1.6.1 Strigolactones and nutrient status of the plants *12*
1.6.2 Mycorrhiza and strigolactones *13*
1.6.3 Integration of various components into the a system approach *13*
1.6.4 Research objectives and thesis outline *14*

Chapter 2:

Species composition and diversity of arbuscular mycorrhizal fungi in White Nile state, Central Sudan 25

Abstract 26

2.1 Introduction 27

2.2 Materials and methods 28

2.2.1 Study sites and sampling 28

2.2.2 Soil analysis 29

2.2.3 Staining and estimation of mycorrhizal root infection 29

2.2.4 Extraction and estimation of mycorrhizal spores 29

2.2.5 Ecological AMF diversity indices 30

2.2.6 Statistical analysis 31

2.3 Results 31

2.3.1 Soil analyses 31

2.3.2 AMF root colonization and spore density in the soil 31

2.3.3 AMF species found and diversity 32

2.3.4 Relationship between soil physico-chemical properties, crops and parameters of AMF diversity 32

2.4. Discussion 33

References 36

Chapter 3:

Influence of root and stem exudates of tomatoes infected by different *Glomus* species on germination of *Phelipanche ramosa* L. Pomel in vitro 51

Abstract 52

3.1 Introduction 53

3.2 Materials and methods 55

3.2.1 Plant materials and growing conditions 55

Dieses Werk ist copyrightgeschützt und darf in keiner Form vervielfältigt werden noch an Dritte weitergegeben werden.
Es gilt nur für den persönlichen Gebrauch.

3.2.2 Experimental design and inoculation *55*

3.2.3 Root exudate collection and assessment of mycorrhizal infection *55*

3.2.4 Conditioning of P. ramosa seeds *56*

3.2.5 Germination assays *57*

3.2.6 Stem cut assay *57*

3.2.7 Statistical analysis *57*

3.3 Results 58

3.4 Discussion 59

References 61

Chapter 4:

Effects of powder and aqueous extracts of *Euphorbia hirta* on *Phelipanche ramosa* germination and haustorium initiation 69

Abstract 70

4.1 Introduction 71

4.2 Materials and methods 72

4.2.1 Plant materials *72*

4.2.2 Chemicals used and preparation of plant extracts *72*

4.2.3 Conditioning of P. ramosa seeds *73*

4.2.4 Exp 1. Effects of extracts from E. hirta on germination *73*

4.2.5 Exp 2. Effects of extracts from E. hirta on haustorial initiation *73*

4.2.6 Exp 3. Effects of extracts from E. hirta applied during conditioning on seed germination *74*

4.2.7 Exp 4. Effects of extracts from E. hirta applied during conditioning on haustorial initiation *74*

4.2.8 Exp 5. Effects of E. hirta powder or aqueous extract on P. ramosa seed germination in soil *74*

4.2.9 Statistical analysis *75*

4.3 Results 75

Dieses Werk ist copyrightgeschützt und darf in keiner Form vervielfältigt werden noch an Dritte weitergegeben werden.
Es gilt nur für den persönlichen Gebrauch.

4.3.1 Effects of extracts from E. hirta on P. ramosa germination and haustorium initiation (Exp 1 and 2) *75*

4.3.2 Effects of extracts from E. hirta, applied during conditioning, on seed germination and haustorial initiation (Exp 3 and 4) *76*

4.3.3 Activity of E. hirta powder and extract on P. ramosa seed germination in soil (Exp 5) *76*

4.4 Discussion 78

References 81

Chapter 5:

Arbuscular mycorrhizal fungi have the potential to reduce infection caused by the parasitic weed *Phelipanche ramosa* L. (Pomel) in tomato 87

Abstract 88

5.1 Introduction 89

5.2 Materials and methods 90

5.2.1 Plant materials and growth conditions *90*

5.2.2 Effects of P. ramosa seed concentration on tomato performance *91*

5.2.3 Interactions of AMF and P. ramosa with tomatoes *91*

5.2.4 Statistical analysis *92*

5.3 Results 93

5.3.1 Effects of P. ramosa seed concentration on tomato performance *93*

5.3.2 Interactions of AMF and P. ramosa with tomatoes *93*

5.4 Discussion 94

References 97

Chapter 6:

Effects of mycorrhiza inoculation, nitrogen levels, and sugar cane residue based organic amendments on *Phelipanche ramosa* incidence, and tomato performance in the field 107

Abstract 108

6.1 Introduction 109

Dieses Werk ist copyrightgeschützt und darf in keiner Form vervielfältigt werden noch an Dritte weitergegeben werden.
Es gilt nur für den persönlichen Gebrauch.

6.2 Materials and Methods 111

6.2.1 Study site 111

6.2.2 Experimental setup 111

6.2.3 Assessments 112

6.2.4 Data processing and statistical analysis 114

6.3 Results 114

6.3.1 AMF root colonization 114

6.3.2 Tomato growth and development 115

6.3.3 Development of P. ramosa 115

6.3.4 Yield data 116

6.3.5 Fruit quality 116

6.4 Discussion 117

References 120

Chapter 7:

General discussion and conclusions 133

7.1 General discussion 134

7.2 Concluding remarks 137

References 139

Appendix of figures A-1

Appendix tables A-15

Affidavit A-22
