## Table of contents

<b>Table of contents</b> .....	<b>i</b>
<b>List of figures</b> .....	<b>vi</b>
<b>List of tables</b> .....	<b>ix</b>
<b>List of Plates</b> .....	<b>xii</b>
Dedication .....	xiii
Acknowledgements .....	xiv
Summary.....	xvi
Zusammenfassung.....	xx
<b>Chapter 1:</b>	
<b>General introduction, research objectives and thesis outline</b> .....	<b>1</b>
1.1 Introduction .....	2
1.2 Broomrape status in Sudan.....	2
1.3 The life cycle of <i>Phelipanche</i> .....	3
1.4 Natural and other germination stimulants.....	7
1.5 <i>Orobanch</i> e and <i>Phelipanche</i> control .....	9
1.5.1 Control through enhanced germination .....	9
1.5.1.1 Suicidal germination.....	9
1.5.1.2 Trap and catch Crops.....	10
1.5.2 Control through reduced germination.....	10
1.5.2.1 Using Chemicals.....	10
1.5.2.2 Breeding for low germination stimulants.....	11
1.6 Bringing together different components into a systems approach .....	12
1.6.1 Strigolactones and nutrient status of the plants .....	12
1.6.2 Mycorrhiza and strigolactones .....	13
1.6.3 Integration of various components into the a system approach .....	13
1.6.4 Research objectives and thesis outline .....	14

References.....	15
<b>Chapter 2:</b>	
<b>Species composition and diversity of arbuscular mycorrhizal fungi in White Nile state, Central Sudan.....</b>	<b>25</b>
Abstract.....	26
2.1 Introduction .....	27
2.2 Materials and methods .....	28
2.2.1 Study sites and sampling .....	28
2.2.2 Soil analysis.....	29
2.2.3 Staining and estimation of mycorrhizal root infection.....	29
2.2.4 Extraction and estimation of mycorrhizal spores.....	29
2.2.5 Ecological AMF diversity indices.....	30
2.2.6 Statistical analysis .....	31
2.3 Results .....	31
2.3.1 Soil analyses.....	31
2.3.2 AMF root colonization and spore density in the soil .....	31
2.3.3 AMF species found and diversity .....	32
2.3.4 Relationship between soil physico-chemical properties, crops and parameters of AMF diversity.....	32
2.4. Discussion.....	33
References.....	36
<b>Chapter 3:</b>	
<b>Influence of root and stem exudates of tomatoes infected by different <i>Glomus</i> species on germination of <i>Phelipanche ramosa</i> L. Pomel in vitro .....</b>	<b>51</b>
Abstract.....	52
3.1 Introduction .....	53
3.2 Materials and methods .....	55
3.2.1 Plant materials and growing conditions.....	55

3.2.2 Experimental design and inoculation .....	55
3.2.3 Root exudate collection and assessment of mycorrhizal infection .....	55
3.2.4 Conditioning of <i>P. ramosa</i> seeds .....	56
3.2.5 Germination assays .....	57
3.2.6 Stem cut assay .....	57
3.2.7 Statistical analysis .....	57
3.3 Results .....	58
3.4 Discussion .....	59
References .....	61
<b>Chapter 4:</b>	
<b>Effects of powder and aqueous extracts of <i>Euphorbia hirta</i> on <i>Phelipanche ramosa</i> germination and haustorium initiation .....</b>	<b>69</b>
Abstract .....	70
4.1 Introduction .....	71
4.2 Materials and methods .....	72
4.2.1 Plant materials.....	72
4.2.2 Chemicals used and preparation of plant extracts.....	72
4.2.3 Conditioning of <i>P. ramosa</i> seeds .....	73
4.2.4 Exp 1. Effects of extracts from <i>E. hirta</i> on germination.....	73
4.2.5 Exp 2. Effects of extracts from <i>E. hirta</i> on haustorial initiation.....	73
4.2.6 Exp 3. Effects of extracts from <i>E. hirta</i> applied during conditioning on seed germination .....	74
4.2.7 Exp 4. Effects of extracts from <i>E. hirta</i> applied during conditioning on haustorial initiation.....	74
4.2.8 Exp 5. Effects of <i>E. hirta</i> powder or aqueous extract on <i>P. ramosa</i> seed germination in soil.....	74
4.2.9 Statistical analysis .....	75
4.3 Results .....	75

4.3.1 Effects of extracts from <i>E. hirta</i> on <i>P. ramosa</i> germination and haustorium initiation (Exp 1 and 2).....	75
4.3.2 Effects of extracts from <i>E. hirta</i> , applied during conditioning, on seed germination and haustorial initiation (Exp 3 and 4).....	76
4.3.3 Activity of <i>E. hirta</i> powder and extract on <i>P. ramosa</i> seed germination in soil (Exp 5).....	76
4.4 Discussion.....	78
References.....	81
<b>Chapter 5:</b>	
<b>Arbuscular mycorrhizal fungi have the potential to reduce infection caused by the parasitic weed <i>Phelipanche ramosa</i> L. (Pomel) in tomato.....</b>	<b>87</b>
Abstract.....	88
5.1 Introduction.....	89
5.2 Materials and methods.....	90
5.2.1 Plant materials and growth conditions.....	90
5.2.2 Effects of <i>P. ramosa</i> seed concentration on tomato performance.....	91
5.2.3 Interactions of AMF and <i>P. ramosa</i> with tomatoes.....	91
5.2.4 Statistical analysis.....	92
5.3 Results.....	93
5.3.1 Effects of <i>P. ramosa</i> seed concentration on tomato performance.....	93
5.3.2 Interactions of AMF and <i>P. ramosa</i> with tomatoes.....	93
5.4 Discussion.....	94
References.....	97
<b>Chapter 6:</b>	
<b>Effects of mycorrhiza inoculation, nitrogen levels, and sugar cane residue based organic amendments on <i>Phelipanche ramosa</i> incidence, and tomato performance in the field.....</b>	<b>107</b>
Abstract.....	108
6.1 Introduction.....	109

6.2 Materials and Methods .....	111
6.2.1 Study site .....	111
6.2.2 Experimental setup .....	111
6.2.3 Assessments .....	112
6.2.4 Data processing and statistical analysis .....	114
6.3 Results .....	114
6.3.1 AMF root colonization .....	114
6.3.2 Tomato growth and development .....	115
6.3.3 Development of <i>P. ramosa</i> .....	115
6.3.4 Yield data .....	116
6.3.5 Fruit quality .....	116
6.4 Discussion .....	117
References .....	120
<b>Chapter 7:</b>	
<b>General discussion and conclusions .....</b>	<b>133</b>
7.1 General discussion .....	134
7.2 Concluding remarks .....	137
References .....	139
<b>Appendix of figures .....</b>	<b>A-1</b>
<b>Appendix tables .....</b>	<b>A-15</b>
<b>Affidavit .....</b>	<b>A-22</b>
