Table of Contents

Acknowledgements	vii
Summary.....	ix
Zusammenfassung.....	xii
Chapter 1	
General introduction, study objective and research hypotheses	1
1.1. Livestock farming system in West Africa: potential and constraints	2
1.2. The role of ligneous fodder resources for ruminant husbandry in semi-arid and sub-humid West Africa.....	3
1.3. Anticipated climate change in West Africa.....	5
1.3.1. Consequences for farming systems in semi-arid and sub-humid zones.....	5
1.3.2. System vulnerability and adaptive capacity	6
1.3.3. Farmers' coping measures and adaptation strategies.....	7
1. 4. Study objective, research hypotheses, and thesis outline.....	8
1.5. References.....	10
Chapter 2	
Spatio-temporal variation in grazing areas use and foraging behaviour of cattle and small ruminants across three agro-ecological zones of Burkina Faso	15
2.1. Introduction	17
2.2. Materials and methods	18
2.2.1. Study location.....	18
2.2.2. Data collection.....	18
2.2.2.1. Livestock herd tracking and observation of grazing behaviour	18
2.2.2.2. GPS data processing and land use mapping	19
2.3. Results.....	20
2.3.1. Characteristics of daily grazing itineraries.....	20
2.3.2. Daily behaviour at pasture	21
2.3.3. Spatio-temporal orientation of grazing itineraries.....	23

2.4. Discussion.....	28
2.5. Conclusions.....	30
2.6. References.....	31

Chapter 3

Consequences of climate change for the contribution of browse to ruminant nutrition and health care across three agro-climatic zones of Burkina Faso. 37

3.1. Introduction	39
3.2. Material and methods	40
3.2.1. Study locations	40
3.2.2. Monitoring of grazing behaviour on pasture.....	41
3.2.3. Proximate composition and nutritive value of browse species	42
3.2.4. Ligneous plants use by livestock keepers.....	43
3.2.5. Statistical analyses.....	43
3.3. Results	44
3.3.1. Nutritive value and preference of browse species by cattle and small ruminants	44
3.3.2. Contribution of browse species to ruminants' diet on pasture	47
3.3.3. Livestock keepers' use of woody plants, and perceptions of changes in the recent past	48
3.4. Discussion.....	49
3.4.1. Browse species selection by cattle and small ruminants.....	49
3.4.2. Contribution of browse species to livestock nutrition and health care	53
3.4.3. Implications of climate change on browse use by livestock	54
3.5. Conclusions.....	55
3.6. References.....	56

Chapter 4

Perception of and adaptation to climate change by pastoralists and agro-pastoralists across three agro-ecological zones of Burkina Faso 63

4.1. Introduction	65
4.2. Materials and methods	67
4.2.1. Study sites.....	67

4.2.2. Assessment of perceptions and adaptation strategies	67
4.2.3. Data analysis.....	68
4.3. Results	71
4.3.1. Recorded changes of temperature and rainfall variables	71
4.3.2. Perceptions of long-term changes in temperature and rainfall	71
4.3.3. Perceived impacts of temperature and rainfall change on crop and livestock production	77
4.3.4. Current and anticipated adaptations to climate change	77
4.3.5. Factors affecting anticipated adaptations.....	78
4.4. Discussion.....	82
4.4.1. Perception of changes in temperature and rainfall and of their impacts	82
4.4.2. Novelty of farmers' adaptation strategies	82
4.4.3. Effectiveness of farmers' adaptation strategies.....	84
4.5. Conclusions.....	85
4.6. References.....	87
Chapter 5	
General discussion, conclusions and recommendations	93
5.1. Contribution of browse fodder to livestock nutrition under climate change	94
5.2. Impact of climate change on livestock nutrition and grazing management.....	95
5.3. Adaptive capacity of pastoralist and agro-pastoralist systems to climate change and variability	96
5.4. Main conclusions and recommendations.....	97
5.5. References.....	99
