

Table of Contents

1	Introduction	1
2	Self-Stabilization	5
2.1	Distributed Algorithms	5
2.2	Fault Tolerance and Self-Stabilization	9
2.2.1	Classification of Faults in Distributed Systems	9
2.2.2	Fault Tolerance and Self-Stabilizing Algorithms	10
2.2.3	Terms and Definitions	12
2.2.4	Complexity of Self-Stabilizing Algorithms	18
2.3	Design Methods for Self-Stabilizing Algorithms	20
2.3.1	Composition	21
2.3.2	Distance- k Information	22
2.3.3	Scheduler Transformation	24
2.4	Self-Stabilizing Algorithms for Classical Graph Problems	25
2.4.1	Independent Sets	26
2.4.2	Dominating Sets	27
2.4.3	Spanning Trees	31
2.4.4	Coloring	34
2.4.5	Covering	36
2.4.6	Matching	37
3	Analysis of Self-Stabilizing Algorithms	41
3.1	Elements of the Analysis	41
3.1.1	Closure	42
3.1.2	Convergence	42
3.1.3	Worst-Case Example	43
3.2	Proof Methods for the Complexity Analysis	43
3.2.1	Global State Analysis	44
3.2.2	Analysis of Local States, Properties and Sequences	45
3.2.3	Potential Functions and Convergence Stairs	46
3.2.4	Graph Reduction and Induction	47
3.2.5	Invariancy-Ranking	48

TABLE OF CONTENTS

4	Distance-Two Knowledge and Network Decomposition	49
4.1	Example: Weakly Connected Minimal Dominating Set	50
4.1.1	Introduction	50
4.1.2	Related Work	51
4.2	Algorithm of Srimani and Xu	52
4.2.1	Complexity Analysis	53
4.3	Network Decomposition	56
4.4	Central Scheduler	57
4.5	Distributed Scheduler	62
4.6	Conclusion	66
5	Analysis of Local States and Sequences	67
5.1	Example: Vertex Cover Approximation in Anonymous Networks . .	68
5.1.1	Introduction	68
5.1.2	Related Work	69
5.2	Basic Algorithm	70
5.2.1	Preliminaries	70
5.2.2	Algorithm Description	72
5.2.3	Analysis	75
5.3	Approximation Ratio Improvement	77
5.4	Conclusion	86
6	Analysis of Local States and Sequences (II)	87
6.1	Example: Edge Monitoring	88
6.1.1	Introduction	88
6.1.2	Related Work	88
6.2	Basic Algorithm	90
6.2.1	Preliminaries	90
6.2.2	Simple Edge Monitoring Algorithm	90
6.2.3	Knowledge about Monitored Edges	94
6.3	Conclusion	96
7	Potential Function and Induction via Graph Reduction	97
7.1	Example: Weighted Matching with Approximation Ratio 2	98
7.1.1	Introduction	98
7.1.2	Related Work	99
7.2	Algorithm Description	101
7.3	Synchronous Scheduler	104
7.4	Central Scheduler	104
7.4.1	Potential Function	105
7.4.2	Graph Reduction and Induction	108
7.5	Distributed Scheduler	121

TABLE OF CONTENTS

7.6 Conclusion	125
8 Conclusion	127
8.1 Summary	127
8.2 Future Perspectives	128
List of Algorithms	131
List of Figures	133
Bibliography	135
Author's Publications	151
Curriculum Vitae	153
