Contents

List of figures	IV
List of tables	VI
Abbreviations	VIII
1 Introduction and objectives	1
1.1 Introduction	1
1.2 Motivation of the study and research questions	3
1.3 Objectives	5
1.4 Outline of the study	6
2 Background of the study	7
2.1 Olifants River Catchment	7
2.2 Water policy development	12
2.2.1 New institutional settings	14
2.2.2 Water pricing strategies and subsidies in the domestic sector	15
2.2.3 Current status of the water policy reform	18
2.3 Summary and conclusions	19
3 Economic valuation	21
3.1 Choice behavior and consumer theory	21
3.2 Definition and concepts	25
3.3 Valuation techniques for domestic water use	29
3.3.1 Revealed preferences methods for domestic water use	30
3.3.2 Stated preferences methods for domestic water use	30

3.4	Extensions of basic theory	38
3.4.1	Discrete choice theory	39
3.4.2	Welfare theory in discrete choice models	51
3.5	Summary and conclusion	53
4	Analysis of domestic water services	54
4.1	Literature overview	54
4.2	Data and survey design	58
4.2.1	Sampling design	58
4.2.2	Questionnaire design	60
4.2.3	Design of Choice experiments	60
4.3	Water use, services and prices	70
4.3.1	Socio-economic situation of households	71
4.3.2	Water use habits	77
4.3.3	Water quantity	78
4.3.4	Pricing of water	81
4.3.5	Productive uses of water	83
4.3.6	Satisfaction with current level of service	85
4.4	Preferences and Willingness to pay for in-house connections	86
4.4.1	Conditional logit model	87
4.4.2	Latent class model	90
4.4.3	Welfare estimations	96
4.5	Preferences and Willingness to pay for basic water services	99
4.5.1	Conditional logit model	100
4.5.2	Latent class model	101
4.5.3	Direct elasticities and marginal effects	107
4.5.4	Welfare estimations	108
4.6	Willingness to pay and demand curves	111
4.7	Comparison of results between Choice Experiment 1 and Choice Experiment 2 .	113
4.8	Comparison of results with other studies	115

4.9	Reflections on equity issues	116
4.10	Summary and conclusions	117
5	Discussion and policy recommendations	121
5.1	Summary	121
5.2	Discussion and conclusions	123
5.3	Issues for further research	127
	Bibliography	128
	Appendix	144
	Definition and Concepts of IWRM	144
	Sampling design	145
	Choice Experiment I	147
	Testing for IIA-assumption	148
	Choice Experiment II	151

List of Figures

2.1	Location of Olifants WMA	7
2.2	Population growth and migration in Olifants WMA	8
2.3	Landuse in Olifants WMA	9
2.4	New institutional setting in the water sector in South Africa	15
2.5	Price chain	16
3.1	WTP and Demand Curve	26
3.2	Consumer Surplus, Compensating and Equivalent Variation	27
3.3	Compensating and Equivalent Surplus for a change in q when $r = 0$	29
3.4	Nested logit model	44
4.1	Survey sites, own presentation	59
4.2	Urban and rural areas	71
4.3	Lorenz curves	73
4.4	Relationship to Head of household	74
4.5	Main water sources	76
4.6	Average weekly household water consumption	78
4.7	Average consumption by water source	79
4.8	Purpose of water re-use	80
4.9	Pictures of tank and canister	80
4.10	Percentage of households in different consumption categories	81
4.11	Payment of water bills	82
4.12	Productive uses of water in the Middle Olifants	85
4.13	Problems with irrigation in the Middle Olifants	86
4.14	Satisfaction with current water services	87

4.15 CE 1 - Relative importance of attributes within classes	94
A.1 Expenditure for food and drinks	147
A.2 Expenditure for non-food items	147
