Contents

1. Introduction	1
2. Dirichlet Processes	7
2.1. Definition of the Dirichlet Process	7
2.2. Stick Breaking Representation	12
2.3. Pólya Urn Scheme	16
2.4. Dirichlet Process Mixtures	19
3. Linear Mixed Models with a Group Fused Lasso Penalty	21
3.1. Introduction	21
3.2. Linear Mixed Models with a Group Fused Lasso Penalty	23
3.2.1. Estimation	23
3.2.2. Model Choice: Predictive Cross-Validation	27
3.3. Applications	28
3.3.1. Unemployment	28
3.3.2. Hormonotherapy	31
3.3.3. Lung Function Growth	36
3.4. Simulation Study	38
3.4.1. Settings	38
3.4.2. Results	40
3.4.3. Impact on Test Characteristics	48
3.4.4. Heterogeneity of Random Effects	49
3.5. Summary and Discussion	51
4. Linear Mixed Models with DPMs using EM Algorithm	53
4.1. Introduction	53
4.2. Linear Mixed Models with Dirichlet Process Mixtures	54
4.2.1. Model Hierarchy	54
4.2.2. Inference	56
4.3. Simulation Study	61
4.3.1. Settings	62
4.3.2. Results	63
4.3.3. Comparison of Simulation Results	69
4.4. Applications	73
4.4.1. Unemployment	73
4.4.2. Lung Function Growth	76
4.5. Summary and Discussion	78

5. Additive Mixed Models with DPMs using MCMC methods	79
5.1. Introduction	79
5.2. Additive Mixed Models with DPM Priors	82
5.2.1. Model Hierarchy	82
5.2.2. Inference	84
5.2.3. Block Gibbs Algorithm	85
5.3. Simulation Study	88
5.3.1. Settings	88
5.3.2. Results	91
5.4. Application: Childhood Obesity	95
5.5. Summary and Discussion	100
6. Additive Mixed Models with DPMs using EM Algorithm	103
6.1. Introduction	103
6.2. Additive Mixed Models with Dirichlet Process Mixtures	104
6.2.1. Model Hierarchy	104
6.2.2. Inference	105
6.2.3. Discussion of the P-spline Term	111
6.3. Simulation Study	113
6.3.1. Settings	113
6.3.2. Results	115
6.4. Applications	120
6.4.1. Theophylline	120
6.4.2. Childhood Obesity	122
6.5. Summary and Discussion	127
7. Conclusion and Outlook	129
A. Appendix	131
A.1. Proof of the Conjugacy of the Dirichlet Process	131
A.2. Pólya Sequence via Dirichlet Process	132
A.3. Derivations in the M-step	133
A.3.1. Derivation of $Q(\alpha, \mathbf{v})$	133
A.3.2. Derivation of $Q(\boldsymbol{\psi})$	135
A.4. Prediction of Random Effects	138
A.5. Standardization	139
A.6. Predictive Cross-Validation	140
A.7. Proof of Full Conditionals	142
A.8. Reparametrization of the P-spline	149
A.9. Simulation of Observation Times	150
