Content

Preface	1
1. Fundamentals of grain boundaries.....	4
1.1. Introduction	4
1.2. Classification.....	4
1.3. Presentation of misorientations	5
1.4. Atomic structure.....	8
1.4.1. Low angle grain boundaries	8
1.4.2. High angle grain boundaries	11
1.5. Classical model of grain boundary motion	15
1.6. Driving forces of grain boundary migration	19
1.6.1. Magnetic driving force	19
1.6.2. Capillary driving force	24
2. Experimental investigations of grain boundary migration.....	26
2.1. General remarks	26
2.2. Temperature dependence of grain boundary mobility.....	32
2.3. Misorientation dependence of grain boundary mobility.....	33
2.4. Inclination dependence of grain boundary motion	35
2.5. Compensation effect	38
3. Applied methods to measure grain boundary motion.....	41
3.1. Introduction	41
3.2. Bicrystal fabrication	41
3.3. Discontinuous method.....	46
3.4. Continuous method	48
3.4.1. Polarization microscopy probe	48

3.4.2. Polarization microscope setup for curvature driven boundary motion measurements	52
3.5. Experimental procedure and data evaluation.....	53
4. Grain boundary migration in Zn bicrystals	56
4.1. Experimental results.....	56
4.1.1. Migration of asymmetrical $\langle 10\bar{1}0 \rangle$ tilt grain boundaries.....	56
4.1.2. Migration of symmetrical $\langle 10\bar{1}0 \rangle$ grain boundaries.....	65
4.1.3. Migration behavior of twist and near twist grain boundaries	69
4.1.4. Behavior of asymmetrical and symmetrical $\langle 11\bar{2}0 \rangle$ tilt grain boundaries	74
4.1.5. Curvature driven migration of $\langle 10\bar{1}0 \rangle$ tilt grain boundaries ..	78
4.1.6. Measurement of grain boundary energy	84
4.2. Discussion	88
4.3. Summary	99
5. Magnetically affected Grain growth in Zn polycrystals	102
5.1. Introduction	102
5.2. Sample preparation, measurements and characterization of microstructure	102
5.3. Experimental Results	105
5.3.1. Macrotecture	105
5.3.2. EBSD maps	109
5.3.3. Grain boundary character distributions.....	115
5.4. Discussion	119
6. Conclusions and Outlook	126
6.1. General outline of this work.....	126
6.2. Grain boundary migration in bicrystalline specimens	126

6.3. Grain boundary energy measurements.....	128
6.4. Microtexture evolution in polycrystalline Zinc specimens	128
6.5. Outlook.....	130
7. Summary	131
8. Zusammenfassung.....	134
9. References	137
